Motherhood changes a woman. And it affects her relationships with everyone. Moms need solid connections they can trust and relationships that are growing in order to feel nurtured and loved. But in the chaos of raising children, cultivating relationships can take a backseat to just getting the kids fed and to school on time. Author Lisa T. Bergren helps busy moms prioritize their relationships with others and offers practical ideas to enhance their six key relationships: with self, spouse, friends, family of origin, community, and God. With in-depth research, heartfelt personal experience, and expert advice, Bergren shows women that keeping their six key relationships vital may take work--but it's well worth the effort. Whether she has just brought a new baby home or is still trying to find her footing raising young children, every mom can benefit from the wisdom found in this book.

At last! Java programming explained in plain language. Visit www.naturalprogramming.com. In *Hollywood Left and Right*, Steven J. Ross tells a story that has escaped public attention: the emergence of Hollywood as a vital center of political life and the important role that movie stars have played in shaping the course of American politics. Ever since the film industry relocated to Hollywood early in the twentieth century, it has had an outsized influence on American politics. Through compelling larger-than-life figures in American cinema--Charlie Chaplin, Louis B. Mayer, Edward G. Robinson, George Murphy, Ronald Reagan, Harry Belafonte, Jane Fonda, Charlton Heston, Warren Beatty, and Arnold Schwarzenegger--*Hollywood Left and Right* reveals how the film industry's engagement in politics has been longer, deeper, and more varied than most people would imagine. As shown in alternating chapters, the Left and the Right each gained ascendancy in Tinseltown at different times. From Chaplin, whose movies almost always displayed his leftist convictions, to Schwarzenegger's nearly seamless transition from action blockbusters to the California governor's mansion, Steven J. Ross traces the intersection of Hollywood and political activism from the early twentieth century to the present. *Hollywood Left and Right* challenges the commonly held belief that Hollywood has always been a bastion of liberalism. The real story, as Ross shows in this passionate and entertaining work, is far more complicated. First, Hollywood has a longer history of conservatism than liberalism. Second, and most surprising, while the Hollywood Left was usually more vocal and visible, the Right had a greater impact on American political life, capturing a senate seat (Murphy), a governorship (Schwarzenegger), and the ultimate achievement, the Presidency (Reagan).

What has Jung to do with the Postmodern? Chris Hauke's lively and provocative book, puts the case that Jung's psychology constitutes a critique of modernity that brings it in line with many aspects of the postmodern critique of contemporary culture. The metaphor he uses is one in which 'we are gazing through a Jungian transparency or filter being held up against the postmodern while, from the other side, we are also able to look through a transparency or filter of the postmodern to gaze at Jung. From either direction there will be a new and surprising vision.' Setting Jung against a range of postmodern thinkers, Hauke recontextualizes Jung's thought as a response to modernity, placing it - sometimes in parallel and sometimes in contrast to - various postmodern discourses. Including chapters on themes such as meaning, knowledge and power, the contribution of architectural criticism to the postmodern debate, Nietzsche's perspective theory of affect and Jung's complex theory, representation and symbolization, constructivism and pluralism, this is a book which will find a ready audience in academy and profession alike.

A behind-the-scenes look from an insider. A comprehensive and objective study for Muslims seeking a fair & balanced analysis of traditionalist Islam; and for non-Muslims interested in gaining rarely found insight. Written by a prominent anti-Islamist activist over the course of 8 years detailing his reasons for leaving Islam & becoming an agnostic humanist. All funds donated to support related humanitarian causes.-----A single question kickstarts the journey for this book. My Muslim cousin came to stay with us in the UK when he was over on holiday from Pakistan. I knew his stay would prove contentious as previously he had told me that as a Muslim I had to believe in all of it as it stood, or I had to admit I was no longer a Muslim. This time I was prepared for the inevitable question of “Why?” I had subsequently left Islam. Sure enough it soon came and started the ball-rolling till 4 a.m. as he attempted to refute each one of my contentions, but this time to no avail. The following day, prior to boarding his flight back to Pakistan, he made me promise one thing. As he was well connected, he asked me to put all my arguments together so he could take them in writing to a learned scholar of Islam. I did so, and looking forward to his response I also copied in all my siblings. After waiting 3 months my brother received a phone call from my cousin saying that he hadn't forgotten and was still working on the reply. It's been 8 years, and I never did hear back from him. Nonetheless it was an invigorating exercise. Over the course of these subsequent years I became an exmuslim activist and the original letter (contained in next chapter) was used as a skeletal working document which I

regularly updated with new findings. A comprehensive Scribd online blog was borne. It was heartening to see it climb to 49,000 views and being powerful enough to influence many of its Muslim readers to leave Islam. To connect with a wider audience, I developed the blog for use in visual media and from it spawned my 'ExMuslim Confession' YouTube series. It flourished as it climbed to half-a-million hits along with my group grew to 7,500 members, but along with its success so did the harassment. My more vocal presence was paralleled with increasing resistance, reaching up to 139 death threats to date. Undeterred this spurred me on to make the blog ever more mainstream, and the original Letter-Blog-YouTube Series finally matured into the Book you see before you today..------(You can read more about this author online by seeing his RaheelQ interview)

The state of the Northeast Atlantic fisheries in recent years has highlighted - plementation as the Achilles heel of modern fisheries management: discards and unreported or misreported landings are in many cases recognised to effectively subvert sound conservation goals. Social science literature on fisheries mana- ment has tended to regard the implementation of resource conservation policies mainly as a question of effective enforcement. This literature regards surveillance and penalty as the key mechanism through which fishermen keep to catch restr- tions and loyally report their catches. This book emerged because several years of research on fishermen's compliance had made us uneasy about this rather narrow approach to the problem of implementation. This uneasiness motivated us to widen the approach to the question of

implementing conservation policies in the fisheries. Taking Norway as an example, its fishing fleet consists of some 7,000 vessels spread along a coastline of more than 20,000 km, populated by less than 5 million people. The idea of ensuring desirable behaviour through surveillance and - enforcement alone is almost absurd in such a context, as the task is impossible by any reasonable means. The Norwegian implementation system has thus had to rely heavily on the incentives provided by the rules and legitimacy created through a century of state/industry collaboration. Different coastal states face very different conditions in terms of solving typical implementation problems such as discards and misreporting.
