These lectures and essays were regarded by Marcel as the best introduction to his thought. Creative Fidelity not only deals with perennial themes of faith, fidelity, belief, incarnate being, and participation, but also includes chapters on religious tolerance and orthodoxy and an important critical essay on Karl Jaspers.

The book provides comprehensive coverage of the processing and preservation aspects of food science that include chemical, microbiological and technological processes on the one hand, and assessment of food quality and safety, new and modified foods by fermentation, food-borne diseases and food spoilage on the other. The preservation operations involving the use of high and low temperatures and radiation have also been discussed in detail. Intended as a textbook for undergraduate students of science and engineering, this study would also be of great help to postgraduate students offering courses in food science, and to professionals as well as academicians.

In response to the No Child Left Behind Act of 2001 (NCLB), Systems for State Science Assessment explores the ideas and tools that are needed to assess science learning at the state level. This book provides a detailed examination of K-12 science assessment: looking specifically at what should be measured and how to measure it. Along with reading and mathematics, the testing of science is a key component of NCLB—it is part of the national effort to establish challenging academic content standards and develop the tools to measure student progress toward higher achievement. The book will be a critical resource for states that are designing and implementing science assessments to meet the 2007-2008 requirements of NCLB. In addition to offering important information for states, Systems for State Science Assessment provides policy makers, local schools, teachers, scientists, and parents with a broad view of the role of testing and assessment in science education.

In *Growing Up Country: Memories of an Iowa Farm Girl*, Carol Bodensteiner tells the stories of a happy childhood growing up on a family-owned dairy farm in the middle of America in the 1950s, a time when a family could make a good living on 180 acres.

In this collection of essays, a distinguished group of innovative teachers and writers describe the approaches and techniques they have incorporated into their own teaching. The articles are designed to help classroom teachers make language classes more participatory and communication oriented. Successive articles deal with the structure of interaction in large and small groups: imaginative activities for listening, speaking, reading, writing, and testing; the use of poetry, song, and drama; how to perform grammar rules rather than recite them; the special contribution of authentic materials; using audio and video as well as computer software to enhance learning, tapping the community as a resource; learning to interact in different cultural styles; and preparing the student for real-life professional use of language. Teachers of any language and teachers in training will find in this volume a wealth of original and practical ideas for the classroom.

One of France's leading and most controversial political thinkers explores the central themes of Tocqueville's writings: the democratic revolution and the modern passion for equality. What becomes of people when they are overcome by this passion and how does it transform the contents of life? Pierre Manent's analysis concludes that the growth of state power and the homogenization of society are two primary consequences of equalizing conditions. The author shows the contemporary relevance of Tocqueville's teaching: to love democracy well, one must love it moderately. Manent examines the prophetic nature of Tocqueville's writings with breadth, clarity, and depth. His findings are both timely and highly relevant as people in Eastern Europe and around the world are grappling with the fragile, complicated, and frequently contradictory nature of democracy. This book is essential reading for students and scholars of political theory and political philosophy, as well as general readers interested in the nature of modern democracy.

The Philippines series of the PALI Language Texts, under the general editorship of Howard P. McKaughan, consists of lesson textbooks, grammars, and dictionaries for seven major Filipino languages.

Bikol Grammar Notes form part of a basic Bikol language course. They are to be used as a companion volume to Bikol Text also by Malcolm W. Mintz. Included also in the series for Bikol is a quite comprehensive dictionary which may be used as reference, but separate from a language course. The Bikol materials in turn form a part of a larger series on six other Philippine languages, all developed by the Pacific and Asian Linguistics Institute of the University of Hawaii under a contract with Peace Corps (PCZS-1507). It is the hope of the author of this volume and the editor of the series that many will be encouraged to learn Bikol through these materials.

Trust is central to our social lives. We know by trusting what others tell us. We act on that basis, and on the basis of trust in their promises and implicit commitments. So trust underpins both epistemic and practical cooperation and is key to philosophical debates on the conditions of its possibility. It is difficult to overstate the significance of these issues. On the practical side, discussions of cooperation address what makes society possible-of how it is that life is not a Hobbesian war of all against all. On the epistemic side, discussions of cooperation address what makes the pooling of knowledge possible-and so the edifice that is science. But trust is not merely central to our lives instrumentally; trusting relations are themselves of great value, and in trusting others, we realise distinctive forms of value. What are these forms of value, and how is trust central to our lives? These questions are explored and developed in this volume, which collects fifteen new essays on the philosophy of trust. They develop and extend existing philosophical discussion of trust and will provide a reference point for future work on trust.
