Discover why people like Russel Simmons Jr, Jennifer Aniston, Phil Jackson and Brad Pitt all incorporate the life-changing practice of Buddhism into their lives. Mindfulness meditation is everywhere these days, from the therapy couch to the Google campus, from prisons to athletic events. But what are the origins of this surge in mindfulness? What kind of worldview and lifestyle went along with these ancient techniques of meditative training? And, beyond the questionable metaphysics and well-worn pop-psychology bromides, what is meditation actually for? This book explores the Buddhist ideas behind the mindfulness techniques

that have seen such a groundswell of popularity. It covers meditation not just as a body of techniques for relaxation and stress relief to accessorize our busy modern lives, but as part of a radical system of self-transformation that offers the possibility of profound liberation. In this book, the Buddhist system and the ideas behind it are presented, not as a religion that's asking for your allegiance, but as a body of theory and practice geared towards fostering an inner revolution. Buddhism for beginners will teach you: The worldview underpinning Buddhist meditation techniques, and what those techniques were actually intended for. The principles that guide a life lived genuinely, gracefully, and compassionately. What meditation is all about in the context of the Buddhist path, and how to get into the practice of working with your mind. A surprising vision of the self, the mind, and the nature of human experience that can fundamentally alter the way you look at the world. Don't hesitate. Check out some of the testimonials below: "If I had the choice of being lectured about Buddhism or reading a book, I'd pick this specific book because it is so nicely written. It starts out pretty slow paced introducing a bunch of concepts related to Buddhism before moving towards meditation and the like. It sucked me in right away and I continued flipping page after page nonstop. Reading in a quiet room sure helped and I felt this great sense of calmness. It's pretty amazing!" "If you are beginning to practice Buddhism or are contemplating doing so, this book is a great place to start. It is the perfect book to give to friends or family members who are not familiar with Buddhism but want to understand your newfound spirituality. This book was extremely easy for me to understand and I fully as though the concepts presented were something that I could begin to apply now and by my own unaided strength. I would recommend this book to anyone else who is curious about Buddhism regardless of whether or not you intend on making Buddhism part of your life." - SCROLL UP AND CLICK THE ORANGE BUTTON NOW!

Do you want your children to read the fantastic stories to dream about for all ages, story for kids who love dinosaurs, the magic unicorn sleepy-for helping children fall to sleep? If yes, then keep reading... One of the most difficult things about bedtime is getting your child to calm down and be ready to lay down without bouncing and having a million more things to say. After a long day, you know that they need to relax and get to sleep, but when children get tired, they will often get hyperactive as well. Getting your child to come off that high and helping them to relax and be ready to fall asleep is never easy and can make the whole bedtime routine a big headache. The good news is that there are a few steps that we can take in order to help calm our children down and get them to be more relaxed and ready for bed. There are a number of techniques that we are able to use to help reduce the stress that children are feeling and help them relax. Depending on the specific child you work with, some of these will work better than others. Some of the options that you are able to choose from will include: Deep Breathing The first option is just simple deep breathing. This is a very effective and quick way to slow down our bodies and can get stress and other hyperactivity symptoms to calm down. Progressive Muscle Relaxation Another option to work with is known as progressive muscle relaxation. This is going to be a great way to relieve stress. And when you get your child to focus on the various muscle groups one at a time, this can be a natural way to get them to focus and relax, without having to worry about getting their minds to slow down in other

manners. Visualization The third option that you can work with is known as visualization, which is the same thing as working with visual guided imagery. This is going to be a good technique that relies on the imagination of the child but can help to slow down and cut out some of the chatter of the mind while getting rid of some of the worries and thoughts the child can deal with on a regular basis. Listen to some music Some children find that listening to music on a regular basis is one of the best ways to help a child to refocus and get ready for bed. When they are getting ready to fall asleep, perhaps during their bedtime routine of getting changed, taking a bath, and brushing their teeth, turn on some relaxing music to help out with this. Even children who are really young can enjoy listening to some classical music or even something newer like Josh Groban that can help to bring their levels down and get them ready to fall asleep. Meditation Many organizations, including the Mayo Clinic, pieces of advice that some of the basic meditation techniques, including yoga and transcendental meditation, will help to relax both the body and the mind. Toe Tensing Another option that can work well and will get your child to concentrate on one thing to calm down, and one you may not have heard about in the past, is known as toe tensing.
