Money is nothing more than what is commonly exchanged for goods or services, so why has understanding it become so complicated? In Money, renowned economist John Kenneth Galbraith cuts through the confusions surrounding the subject to present a compelling and accessible account of a topic that affects us all. He tells the fascinating story of money, the key factors that shaped its development, and the lessons that can be learned from its history. He describes the creation and evolution of monetary systems and explains how finance, credit, and banks work in the global economy. Galbraith also shows that, when it comes to money, nothing is truly new—least of all inflation and fraud.

The book gathers 14 articles on the reforms of the Austrian University system from 1848 to 1860 named after Leo Thun Hohenstein. The reforms mark a turning point in the history of the Austrian educational landscape. The book provides new perspectives on the work of Leo Thun-Hohenstein, using to date unknown sources and new approaches.
