Nigeria, the United States' most important strategic partner in West Africa, is in grave trouble. While Nigerians often claim they are masters of dancing on the brink without falling off, the disastrous administration of President Goodluck Jonathan, the radical Islamic insurrection Boko Haram, and escalating violence in the delta and the north may finally provide the impetus that pushes it into the abyss of state failure. In this thoroughly updated edition, John Campbell explores Nigeria's post-colonial history and presents a nuanced explanation of the events and conditions that have carried this complex, dynamic, and very troubled giant to the edge. Central to his analysis are the oil wealth, endemic corruption, and elite competition that have undermined Nigeria's nascent democratic institutions and alienated an increasingly impoverished population. However, state failure is not inevitable, nor is it in the interest of the United States. Campbell provides concrete new policy

options that would not only allow the United States to help Nigeria avoid state failure but also to play a positive role in Nigeria's political, social, and economic development.

This 1973 text was the first detailed study of that phenomenon of the African literary scene, Onitsha market literature. Pen names and pamphlet titles adopted by Onitsha authors have often been the subject of amused comment, but it took a long time for Onitsha writing to be recognised for what it is: a genuinely popular literature, unique on Africa, written in English by Africans for an exclusively African audience. What are the origins of this literature? Why did it start in Onitsha? Why do certain themes recur? Where have the writer acquired their unconventional attitudes to love, marriage, sex? What influences have shaped the robust and unorthodox language they use? Dr Obiechina answers these questions and asks what we can learn from the Onitsha authors about social change in Nigeria - how do they attempt to reconcile the traditional rural community and the aggressive individualistic urban society with alien values?

The overthrow in January 1966 of Nigeria's First Republic erased what had been regarded as perhaps the most promising prospect for liberal democracy in post-colonial Africa. Marking the sweeping failure of parliamentary institutions across a continent of new nations, it accelerated the slide into a ghastly civil war. *Class, Ethnicity and Democracy* is the first scholarly study to analyze the evolution, decay, and failure of Nigeria's First Republic and to weigh this crucial experience against theories of the conditions for stable democratic government. Rejecting explanations that focus on political culture, political institutions, or ethnic competition and conflict, Larry Diamond identifies the

root of Nigeria's democratic failure in the interrelationship between class, ethnic and state structures. This led the emergent dominant class in each region to mobilize and exploit ethnicity and to trample the democratic process in furious competition for state control, since that control was the primary means for accumulating wealth and consolidating class dominance. Tracing the polarization of conflict and the erosion of legitimacy through five major crises, Diamond presents a new methodology for analyzing the persistence and failure of democracies and points to the relationship between state and society as a crucial determinant of the possibility for liberal democracy.
