Magnetic Resonance in Food Science is an authoritative summary of state-of-the-art research contributions from the world's leading scientists. Contributions from the 8th International Conference on the Applications of Magnetic Resonance in Food Science, 2006 are presented here with a foreword by the Editors. This important resource provides an overview of: \* Food in the human body including MRI and metabonomics studies; \* Food quality covering animal metabonomics, structure of food systems, food stability and authentication; \* Food processing with emphasis on dynamic processes - including water migration and phase transformations; \* New technologies, novel data analysis and exploitation which includes innovations in NMR methodologies, hardware and data analysis. The International Conference on the Applications of Magnetic Resonance in Food Science is the principle conference in the field and attracts contributions from internationally acknowledged experts from industry and academia. The 8th conference was opened with a lecture by Sir Peter Mansfield, Medicine Nobel Prize Laureate.

The second installment in a planned three-volume series, this book provides the first substantive review of South American rodents published in over fifty years. Increases in the reach of field research and the variety of field survey methods, the introduction of bioinformatics, and the explosion of molecular-based genetic methodologies have all contributed to the revision of many phylogenetic relationships and to a doubling of the recognized diversity of South American rodents. The largest and most diverse mammalian order on Earth—and an increasingly threatened one—Rodentia is also of great ecological importance, and Rodents is both a timely and exhaustive reference on these ubiquitous creatures. From spiny mice and guinea pigs to the oversized capybara, this book covers all native rodents of South America, the continental islands of Trinidad and Tobago, and the Caribbean Netherlands off the Venezuelan coast. It includes identification keys and descriptions of all genera and species; comments on distribution; maps of localities; discussions of subspecies; and summaries of natural, taxonomic, and nomenclatural history. Rodents also contains a detailed list of cited literature and a separate gazetteer based on confirmed identifications from museum vouchers and the published literature.

Digital Humanities, Libraries, and Partnerships brings forward ideas and reflections that stay fresh beyond the changing technological landscape. The book encapsulates a cultural shift for libraries and librarians and presents a collection of authors who reflect on the collaborations they have formed around digital humanities work. Authors examine a range of issues, including labor equity, digital infrastructure, digital pedagogy, and community partnerships. Readers will find kinship in the complexities of the partnerships described in this book, and become more equipped to conceptualize their own paths and partnerships. Provides insight into the collaborative relationships among academic librarians and faculty in the humanities Documents the current environment, while prompting new questions, research paths and teaching methods Examines the challenges and opportunities for the digital humanities in higher education Presents examples of collaborations from a variety of international perspectives and educational institutions

This highly anticipated anthology presents a powerful and penetrating look at environmental justice from some of the key thinkers and activists in Unitarian Universalism today. Fourteen activist ministers and lay leaders apply a keen intersectional analysis to the environmental crisis, revealing ways that capitalism, white supremacy, patriarchy, and other systems of oppression intersect with and contribute to ecological devastation. They also explore how spiritual practices, congregational organizing, and progressive theology can inform faith-based justice work in the twenty-first century. These prophetic voices, from a wide range of perspectives, reveal new approaches and opportunities for more holistic, accountable, and connected justice efforts. Each essay is accompanied by suggested ways to take the next steps for further learning and action.

Excerpt from A History of Walpole, Mass: From Earliest Times, With Illustrations Every town, like every individual, has both character and history. Be it good or bad, some one is interested in it; some one is vitally bound fast to it, either for weal or woe. This grows wider and stronger with a town's age and influence. Our town', though; fast forgetting its ancient traditions and sturdy virtues} from its great age, alone, deserves the unselfish efforts of some one of its many children in its preservation and perpetuation. The older the town, the more difficult and meager its earliest history becomes. The following pages, mostly appearing from time to time during the past forty years of my life, in my contributions to newspaper, magazine, and public audiences, I now for the first time in book form offer to my native, though somewhat unworthy town, as a tribute to my departed co-workers of the old First Walpole Historical Society, of which I am now the only surviving. A colorful figure of 18th-century America, Israel Putnam (1718-1790) played a key role in both the French and Indian War and the Revolutionary War. In 1758 he barely escaped from being burned alive by Mohawk warriors. He later commanded a force of 500 men who were shipwrecked off the coast of Cuba. It was he who reportedly gave the command "Don't fire until you see the whites of their eyes" at the Battle of Bunker Hill. Detailing Putnam's close relationships with Aaron Burr, Alexander Hamilton, and John and Abigail Adams, this first full-length biography of Putnam in more than a century re-examines the life of a revolutionary whose seniority in the Continental Army was second only to that of George Washington.

The Phoenicians created the Mediterranean world as we know it-yet they remain a shadowy and poorly understood group. The academic study of the Phoenicians has come to an important crossroads; the field has grown in sheer content, sophistication of analysis, and diversity of interpretation, and we now need a current overview of where the study of these ancient seafarers and craftsman stands and where it is going. Moreover, the field of Phoenician studies is particularly fragmented and scattered. While there is growing interest in all things Phoenician and Punic, the latest advances are mostly published in specialized journals and conference volumes in a plethora of languages. This Handbook is the first of its type to appear in over two decades, and the first ever to appear in English. In these chapters, written by a wide range of prominent and promising scholars from across Europe, North America, Australia, and the Mediterranean world, readers will find summary studies on key historical moments (such as the history of Carthage), areas of culture (organized around language, religion, and material culture), regional studies and areas of contact (spanning from the Levant and the Aegean to Iberia and North Africa), and the reception of the Phoenicians as an idea, entangled with the formation of other cultural identities, both ancient and modern.

Post-Pandemic Pedagogy: A Paradigm Shift discusses how COVID-19 upended the college and university pedagogical paradigm. This collection looks at what we thought we knew about good teaching, how those notions changed during the pandemic, and speculates on where we will go from here in our classrooms and on our campuses.

The first martyr to the cause of American liberty was Major General Joseph Warren, a well-known political orator, physician, and president of the Provincial Congress of Massachusetts. Shot in the face at close range at Bunker Hill, Warren was at once transformed into a national hero, with his story appearing throughout the colonies in newspapers, songs, pamphlets, sermons, and even theater productions. His death, though shockingly violent, was not unlike tens of thousands of others, but his sacrifice came to mean something much more significant to the American public. Sealed with Blood reveals how public memories and commemorations of Revolutionary War heroes, such as those for Warren, helped Americans form a common bond and create a new national identity. Drawing from extensive research on civic celebrations and commemorative literature in the half-century that followed the War for Independence, Sarah Purcell shows how people invoked memories of their participation in and sacrifices during the war when they wanted to shore up their political interests, make money, argue for racial equality, solidify their class status, or protect their personal reputations. Images were also used, especially those of martyred officers, as examples of glory and sacrifice for the sake of American political principles. By the midnineteenth century, African Americans, women, and especially poor white veterans used memories of the Revolutionary War to articulate their own, more inclusive visions of the American nation and to try to enhance their social and political status. Black slaves made explicit the connection between military service and claims to freedom from bondage. Between 1775 and 1825, the very idea of the American nation itself was also democratized, as the role of "the people" in keeping the sacred memory of the Revolutionary War broadened.

THE STORY: Barry and Grace Enterprise, a couple in their seventies, have two sons; one a thriving two-year-old and the other Arnold, a young man in his thirties who crawls on all fours, insists on a lemon peel in his martini, and is forever misplacing his coloring book. The Enterprises also have a lavish air raid shelter complete with a library of old Our Gang movies and four years' worth of Readers Digest back copies; plus a rather snippy black maid whose feelings have been ruffled by their offer of a separate-but-equal shelter for her. As for Arnold, the Enterprises' concern about him has led to a consultation with Miss Sympathy, a pert, young psychiatric social worker who comes by to do what she can to help straighten him out-and up. She and Arnold are hitting it off rather well when the alert sounds for an air raid drill, and it's down to the shelter for everyone-except that Millie, the maid, has already locked herself in, and the white imperialists out. So Miss Sympathy joins Arnold on the floor (an accepted crisis position) and their increasingly intimate confessions continue to an off-stage obligato by the senior Enterprises. Arnold admits that he has rediscovered the forgotten value of being naughty, and Miss Sympathy concedes that she finds him overpoweringly attractive but what if the all-clear should sound? But it won't. It's broken. That's what Arnold did that was naughty today.

The end of the Bronze Age in the Eastern Mediterranean was a time of social, political, and economic upheaval – conditions reflected, in many ways, in the world of Homer's Odyssey. Jeffrey P. Emanuel examines the Odyssey's Second Cretan Lie (xiv 191 – 359) in the context of this watershed transition, with particular emphasis on raiding, warfare, maritime technology and tactics, and the evidence for the so-called 'Sea Peoples' who have been connected to the events of this period. He focuses in particular on the hero's description of his frequent raiding activities and on his subsequent sojourn in the land of the pharaohs, and connections between Odysseus' false narrative and the historical experiences of one particular Sea Peoples group: the 'Sherden of the Sea.'

A NPR CONCIERGE BEST BOOK OF THE YEAR "Jane fans rejoice! . . . Exceptional storytelling and a true delight." —Helen Simonson, author of the New York Times bestselling novels Major Pettigrew's Last Stand and The Summer Before the War Mary, the bookish ugly duckling of Pride and Prejudice's five Bennet sisters, emerges from the shadows and transforms into a desired woman with choices of her own. What if Mary Bennet's life took a different path from that laid out for her in Pride and Prejudice? What if the frustrated intellectual of the Bennet family, the marginalized middle daughter, the plain girl who takes refuge in her books, eventually found the fulfillment enjoyed by her prettier, more confident sisters? This is the plot of Janice Hadlow's The Other Bennet Sister, a debut novel with exactly the affection and authority to satisfy Jane Austen fans. Ultimately, Mary's journey is like that taken by every Austen heroine. She learns that she can only expect joy when she has accepted who she really is. She must throw off the false expectations and wrong ideas that have combined to obscure her true nature and

prevented her from what makes her happy. Only when she undergoes this evolution does she have a chance at finding fulfillment; only then does she have the clarity to recognize her partner when he presents himself—and only at that moment is she genuinely worthy of love. Mary's destiny diverges from that of her sisters. It does not involve broad acres or landed gentry. But it does include a man; and, as in all Austen novels, Mary must decide whether he is the truly the one for her. In *The Other Bennet Sister*, Mary is a fully rounded character—complex, conflicted, and often uncertain; but also vulnerable, supremely sympathetic, and ultimately the protagonist of an uncommonly satisfying debut novel.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt
