

Le Robert Micro

New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, *Sapiens* integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful

work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

A provocative look at an area few economists dare to tread, by Australia's most read economic commentator.

Do you believe that spending \$15,000 on a media center is vulgar, but that spending \$15,000 on a slate shower stall is a sign that you are at one with

the Zenlike rhythms of nature? Do you work for one of those visionary software companies where people come to work wearing hiking boots and glacier glasses, as if a wall of ice were about to come sliding through the parking lot? If so, you might be a Bobo. In his bestselling work of "comic sociology," David Brooks coins a new word, Bobo, to describe today's upper class -- those who have wed the bourgeois world of capitalist enterprise to the hippie values of the bohemian counterculture. Their hybrid lifestyle is the atmosphere we breathe, and in this witty and serious look at the cultural consequences of the information age, Brooks has defined a new generation.

Winner of the 2018 Epigram Books Fiction Prize Sukhin is a thirty-five-year-old teacher who lives alone. His life consists of reading, working and visiting his parents' to rearrange his piles of "collectibles". He has only one friend, another teacher who has managed to force Sukhin into a friendship by sheer doggedness. While on an errand one afternoon in Chinatown, he encounters a homeless person who recognises him. This chance reunion turns Sukhin's well-planned life upside down, and the pair learns about love and sacrifice over their shared fondness for cake.

NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. “A brilliant and thoroughly modern guide to learning new languages.”—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Gitars Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn’t learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he’s discovered. Starting with pronunciation, you’ll learn how to rewire your ears and turn foreign sounds into familiar sounds. You’ll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you’ll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you’ll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day. An obsessive word lover's account of reading the

entire Oxford English Dictionary, hailed as "the Super Size Me of lexicography." "I'm reading the OED so you don't have to," says Ammon Shea on his slightly masochistic journey to scale the word lover's Mount Everest: the Oxford English Dictionary. In 26 chapters filled with sharp wit, sheer delight, and a documentarian's keen eye, Shea shares his year inside the OED, delivering a hair-pulling, eye-crossing account of reading every word.

Argues that ecologist Charles Darwin's understanding of competition describes economic reality far more accurately than economist Adam Smith's theories ever did.

What makes ice cubes cloudy? How do shark attacks make airplanes safer? Can a person traveling in a car at the speed of sound still hear the radio? Moreover, would they want to...? Do you often find yourself pondering life's little conundrums? Have you ever wondered why the ocean is blue? Or why birds don't get electrocuted when perching on high-voltage power lines? Robert L. Wolke, professor emeritus of chemistry at the University of Pittsburgh and acclaimed author of *What Einstein Didn't Know*, understands the need to...well, understand. Now he provides more amusing explanations of such everyday phenomena as gravity (If you're in a falling elevator, will jumping at the last instant save your life?) and acoustics (Why does a whip make such a loud cracking noise?), along with amazing facts, belly-up-to-the-bar bets, and mind-blowing reality bites all with his trademark wit and wisdom. If you shoot a bullet into the air, can it kill somebody when it comes down? You can find out about all this and more in an astonishing compendium of the proverbial mind-boggling mysteries of the physical world we inhabit. Arranged in a question-and-answer format and grouped by subject for browsing ease, **WHAT EINSTEIN TOLD HIS BARBER** is for anyone who ever pondered such things as why colors fade in sunlight, what happens to the rubber from worn-out tires, what makes red-hot objects glow red, and other scientific curiosities. Perfect for fans of Newton's Apple, Jeopardy!, and The Discovery Channel, **WHAT EINSTEIN TOLD HIS BARBER** also includes a glossary of important scientific buzz words and a comprehensive index. -->

A Frequency Dictionary of French is an invaluable tool for all learners of French, providing a list of the 5000 most frequently used words in the language. Many of the combatants in the European wars of the late middle ages fought for their own gain, but they observed a code of regulations, part chivalrous and part commercial which they called the 'law of arms'. This book, originally published in 1965, examines this soldiers' code, to understand its rules and how they were enforced. How did a soldier sue for ransom money if his prisoner would not pay it, and before what court? How did he know whether what he took by force was lawful spoil? As the answers to these and other questions reveal, the workings of the law of arms gave practical point to the contemporary cult of chivalry. It also had an important influence on the early development of ideas of international law.
