Social and behavioral science has for decades studied and recognized leadership as a social exchange between leaders and followers. But leadership is rather complex, and as such, it tends to lead to an increased interest within and across different disciplines. This book is an attempt to provide theoretical and empirical framework to better understand leadership challenges in various contexts. The authors cover an array of themes that span from an individual level to an organizational and societal level. In this volume, two sections are presented. The first section based on individual level focuses on different leadership styles and abilities, and the other section provides theories to understand leadership in public administration, in industrial settings and in nonprofit organizations.

Team work, management, & leadership skills are an important part of being a nurse. This is the perfect book to help you on your way to being a well-rounded nursing professional. It uses friendly, accessible language to comprehensively cover all management theories & applies them to practical nursing settings.

"Understanding Legal and Ethical Issues" and "Imagining the Future."

Written specifically for the experienced nurse enrolled in an RN-to-BSN program, this text guides nurses through an interactive critical thinking process to become effective and confident nurse leaders. All nurses involved with direct patient care already rely on similar strategies to oversee patient safety, make care decisions, and integrate plan of care in collaboration with patients and families. This text expands upon that knowledge and provides a firm base to reach the next steps in academia and practice, enabling the BSN-prepared nurse to tackle serious issues in care delivery with a high level of self-awareness and skill. Leadership and Management Competence in Nursing Practice relies on a keen understanding of what experienced nurses already bring to the classroom. This text provides a core framework and useful skills and strategies to successfully lead nursing and healthcare forward. Clear, concise chapters cover leadership skills and personal attributes of leaders with minimal repetition of material covered in associate's degree programs. Content builds on the framework of AACN Essentials of Baccalaureate Education, IOM Competencies, and QSEN KSAs. Each chapter presents case scenarios to promote critical thinking and decision-making. Self-assessment tools featured throughout the text enable nurses to evaluate their current strengths, areas for growth, and learning needs. Key Features: Provides information needed for the associate's degree nurse to advance to the level of professionally prepared baccalaureate degree nurse Chapters contain critical thinking exercises, vignettes, and case scenarios targeted to the RN-to-BSN audience Self-assessment tools included in most chapters to help the reader determine where they are now on the topic and to what point they need to advance to obtain competence and confidence in the professional nursing role Provides information and skills needed by nurses in a variety of healthcare settings Includes an instructor's manual and PowerPoint slides

This concise essentials text, written by the authors of the popular Leadership Roles and Management Functions in Nursing, equips new nurses with invaluable leadership and management tools they need on the job. Developed for Associate Degree and LVN/LPN level nursing students, all case studies are aimed no higher than the charge nurse management level. An easy read with clear displays and tables, which emphasize core knowledge, this is an invaluable tool for the new nurse. Common stumbling blocks, such as effective time management, are addressed clearly and simply, and students will benefit from the practiced authors' own experience and skill. Reflective Questions in each chapter encourage the nurse to examine her own values, beliefs, and actions in developing common nursing management skills. The free accompanying ancillary package for students and instructors includes NCLEX-style chapter review questions, a test generator, an ebook, and a PowerPoint presentation, along with suggestions for responding to each of the case studies and reflective questions.

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the *Affordable Care Act (ACA)* enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

This is a comprehensive resource on leadership and management specific to nursing professionals. Topics include details of the leadership and management skills need to perform professionally in today's nursing profession. Included are modules of "content chunks" to assist in streamlining the material. Activities interwoven within the chapters and on the corresponding website encourage further research and critical thinking. Also found on the website are: video and audio examples and exercises, log on (internet-based exercises with student searching a particular topic); working together- team-based exercises, case applications and in the news - thinking about the future activities. *Nursing Professionals and Nursing Students*.
