

# Leadership Governance Accountability And Transparency

**Sander Schroevers, Christopher Higgings, Aynur Doğan**

**The Transparent Leader** Herb Baum, Tammy Kling, 2005-10-04 Drawing on his experience as a leader in some of the nation's largest corporations, Baum issues a convincing call for honest, ethical, transparent dealing throughout the business world. Baum outlines the management techniques he uses within and without the company to get outstanding results without skirting the rules or bending the truth. Baum maintains that by fostering trust, integrity and accountability at all levels within the corporation, managers can stop the erosion of employee loyalty, restore consumer trust in brands, products, and American business. Baum teaches executives fresh ways of managing Wall Street analysts, communicating with shareholders, and wading through the complex maze of social responsibility issues. As a member of six corporate boards, Baum offers unique insight into transparent leadership, including the advantages and pitfalls of corporate governance, and the pressures executives face in reporting earnings. He also discusses the importance of setting standards for ethical business practices, yet highlights the dangers of government regulations that may result in excessive compliance costs at the expense of shareholders, creative risk taking, and innovation.

Self-Serving Public Leadership and Governance Obinna Ubani-Ebere, 2022-12-19 Leadership matters in everything. Shared humanity is at risk of paralysis if the society lacks trustable, transparent, and accountable leadership for the well-being of the society. A nation is nothing but a perishable commodity if it lacks leadership foresight or vision and continually stands on a blind spot of political, social, and economic development. Government is an asset if it has utility or values that impact citizens positively and improve their well-being or livelihood. In contrast, the government is a total liability or lacks utility or values if its actions impede unity, progress, and development or undermine citizens' well-being. Greed is the common denominator of public corruption. Moreover, corruption is a consequence of self-serving leadership and governance in African countries, demolishing hopes, aspirations, and ingenuity. Thus, public corruption in African countries is the great conspiracy against innocent and poor citizens by the politicians, elites, and religious aristocrats, causing obstacles to development. Consequently, there is a high possibility of political, economic, and social failures or marginalization of the poor when a nation's political governance is besieged by sit-tight leadership syndrome, self-serving leaders, greedy mindsets, and

corrupt leaders. Here are the two critical questions: Can African countries escape paralysis, meltdowns, or extreme poverty if the government is controlled by self-serving public leaders who focus on themselves while ignoring the challenges of the larger society? Can African countries survive the mediocrity of governance and frequent devastations due to the menace of religion, tribalism, and corruption in government, public leadership, and governance?

Accountability and the Law Piotr Mikuli, Grzegorz Kuca, 2021-08-12 This book discusses contemporary accountability and transparency mechanisms by presenting a selection of case studies. The authors deal with various problems connected to controlling public institutions and incumbents' responsibility in state bodies. The work is divided into three parts. Part I: Law examines the institutional and objective approach. Part II: Fairness and Rights considers the subject approach, referring to a recipient of rights. Part III: Authority looks at the functional approach, referring to the executors of law. Providing insights into increasing understanding of various concepts, principles, and institutions characteristic of the modern state, the book makes a valuable contribution to the area of comparative constitutional change. It will be a valuable resource for academics, researchers, and policy-makers working in the areas of constitutional law and politics.

**Good Governance in Sport** Arnout Geeraert, Frank van Eekeren, 2021-10-03 This book fills an important gap in the sport governance literature by engaging in critical reflection on the concept of 'good governance'. It examines the theoretical perspectives that lead to different conceptualisations of governance and, therefore, to different standards for institutional quality. It explores the different practical strategies that have been employed to achieve the implementation of good governance principles. The first part of the book aims to shed light on the complexity and nuances of good governance by examining theoretical perspectives including leadership, value, feminism, culture and systems. The second part of the book has a practical focus, concentrating on reform strategies, from compliance policies and codes of ethics to external reporting and integrity systems. Together, these studies shed important new light on how we define and understand governance, and on the limits and capabilities of different methods for inducing good governance. With higher ethical standards demanded in sport business and management than ever before, this book is important reading for all advanced students and researchers with an interest in sport governance and sport policy, and for all sport industry professionals looking to improve their professional practice. Making Politics Work for Development World Bank, 2016-07-14 Governments fail to provide the public goods needed for development when its leaders knowingly and deliberately ignore sound technical advice or are unable to follow it, despite the best of intentions, because of political constraints. This report focuses on two forces—citizen engagement and transparency—that hold the key to solving government failures by shaping how political markets function. Citizens are not only queuing at voting booths, but are also taking to the streets and using diverse media to pressure, sanction and select the

leaders who wield power within government, including by entering as contenders for leadership. This political engagement can function in highly nuanced ways within the same formal institutional context and across the political spectrum, from autocracies to democracies. Unhealthy political engagement, when leaders are selected and sanctioned on the basis of their provision of private benefits rather than public goods, gives rise to government failures. The solutions to these failures lie in fostering healthy political engagement within any institutional context, and not in circumventing or suppressing it. Transparency, which is citizen access to publicly available information about the actions of those in government, and the consequences of these actions, can play a crucial role by nourishing political engagement.

**Transparency in Government Operations** Mr.J. D. Craig,Mr.George Kopits,1998-02-03 Transparency in government operations is widely regarded as an important precondition for macroeconomic fiscal sustainability, good governance, and overall fiscal rectitude. Notably, the Interim Committee, at its April and September 1996 meetings, stressed the need for greater fiscal transparency. Prompted by these concerns, this paper represents a first attempt to address many of the aspects of transparency in government operations. It provides an overview of major issues in fiscal transparency and examines the IMF's role in promoting transparency in government operations.

*Handbook of Research on Managing the Urban-Rural Divide Through an Inclusive Framework* Popoola, Ayobami

Abayomi, Magidimisha-Chipungu, Hangwelani Hope, Chipungu, Lovemore, 2023-02-10 In recent years, the growing disparities between rural and urban areas in developing countries have been a cause of major concern. The rural-urban gap remains the single most well-documented development and welfare disparity in the developing world. This gap can be seen in the low economic activities, higher poverty levels, and lower quality infrastructure and services in rural areas as opposed to urban areas. While the magnitude of this rural-urban divide is well-documented, very little has been documented about its impact on inclusive and sustainable urban development. The Handbook of Research on Managing the Urban-Rural Divide Through an Inclusive Framework aims to capture the spatial and socio-economic divide between rural and urban areas and provides a road map to revamping the discussion that surrounds the urban-rural sphere. Covering key topics such as development, food security, and rural regions, this premier reference source is ideal for policymakers, government officials, industry professionals, researchers, academicians, practitioners, scholars, instructors, and students.

**Public Service Accountability** Peter Murphy, Laurence Ferry, Russ Glennon, Kirsten Greenhalgh, 2018-07-17 How we manage public services and hold them to account is critically important. Yet austerity, recent changes to accountability frameworks, and the loss of the Audit Commission have created a huge deficit in our understanding of how well services are delivered. The time is thus right to re-examine the state of our vital public services, as well as how we can make them more accountable. This book reopens the debate on what accountability means and provides unique insights into an increasingly complex organizational landscape. It presents a new and innovative way of evaluating public services that should be of use to academics and public servants alike. Synthesising empirical work across local government, health and social care, the police, and fire services, this book also explores the relationship between financial and performance accountability and makes the case for the need for a distinctive sense of public service accountability.

Building on and challenging recent research in this area, this volume critically examines the contextual, behavioural and historical factors of governance.

**Urban Composite Development Index For 17 Shandong Cities: Ranking And Simulation Analysis Based On China's Five Development Concepts** Khee Giap Tan, Xuyao Zhang, Tao Oei Lim, Lin Song, 2018-12-19 Shandong is a thriving

economic centre with a Gross Regional Domestic Product of RMB 6.3 trillion in 2015, the third-highest in China. It is also the third-largest province by land area in the country with the second-largest resident population of 98,470,000. With such impressive characteristics, Shandong's urbanisation rate had quickly expanded from 45 percent in 2005 to 57 percent in 2017. As such, in line with the growing affluence of the province, the people's ever-growing demand for urban development in areas such as infrastructure, public services, education and environmental protection has exceeded the provision of such facilities. In view of these developments, the Asia Competitiveness Institute (ACI) at the Lee Kuan Yew School of Public Policy (LKYSPP), National University of Singapore (NUS) developed Shandong's first city-level index which assesses the levels of urban development and liveability for each city. The ranking and simulation analysis via the Urban Composite Development Index for 17 Shandong cities was constructed to provide an empirically robust framework to better understand the quality of urban development of Shandong cities in a comprehensive and rigorous manner, while at the same time highlight important policy implications for further growth and development. Further, this publication incorporates key elements which ensures that the construction of the index is unique, empirically sound and relevant to Shandong's development in the context of China. Overall, the analysis provided in this book relates to the broad dimensions of urban development of Shandong cities and can stand up to academic scrutiny as it is based on rigorous methodological foundations. In addition, the study will remain accessible and appealing to policymakers as it offers tailored policy recommendations based on the analysis that will enable them to take appropriate policy interventions in each city to improve their overall performance in urban development. This research will help to identify the strengths and weaknesses of each city and empower policymakers to formulate more effective development strategies.

**Contemporary Issues in Financial Reporting, Auditing and Corporate Governance (UUM Press)** Noor Afza Amran, 2013-01-01 Contemporary Issues in Financial Reporting, Auditing and Corporate Governance offers theoretical and empirical background on three fundamental areas of accounting, namely financial reporting, auditing and corporate governance.
