Leadership in Dangerous Situations provides in-depth coverage of the key psychological, social and organization factors that impact individual and organizational effectiveness for First Responders in dangerous environments. Leading scholars discuss how current theories and empirical research provides guidelines to help solve the challenges leaders are likely to face in dangerous contexts. This book is directed to First Responders leaders from the Military, Law Enforcement, Fire, Emergency Services and Not-for profit agencies working in dangerous areas. The purpose of this book is to assist the First Responders who risk their lives to serve the public, to prepare for the unique challenges of leading and operating in dangerous situations. Dangerous situations are environments where group members must routinely engage in events that place their physical and psychological well-being at risk to accomplish the organization's objectives. International scholars and practitioners from the military, law enforcement, fire and rescue, teamed together to address the unique challenges facing dangerous context leaders. Each chapter integrates theory and research with practical experience to address the various challenges these leaders will face while operating in dangerous situations. The intent is to provide practitioners an easily understandable guide, backed by scholarly findings, to prepare themselves and their organizations for the unique psychological, social, and physical challenges of leading and operating in dangerous contexts. The blending of theory and empirical research with practical experience clearly illustrates the principles of effective leadership in dangerous contexts Whether one is a young leader preparing for war, a seasoned commander with multiple combat tours, a Special Weapons and Tactics (SWAT) team leader, Emergency Medical Technician (EMT) supervisor, first line supervisor of a law enforcement patrol unit, or a lieutenant responsible for a shift of firemen, the challenges of leading people in contexts where life and death decisions are common are very similar. The purpose here is to provide the leader with a better understanding of what is required to lead in dangerous contexts. The contributing authors delve into the psychological, social, and physical factors that can impact the ability to lead, the ability of personnel to perform, and the organization's ability to accomplish the mission. In the end, the leader will take away not only a understanding of how leading in dangerous contexts is different than leading in contexts where lives are not on the line, but also gain a deeper understanding of why it differs, where commonalities occur, and – perhaps more importantly – how to prepare leaders, whether military or civilian to guide their first responder organizations to perform successfully in dangerous situations.

Lecturers/Instructors - Request a free digital inspection copy here Making a case for a reflexive approach to leadership, the authors draw upon decades of carrying out in-depth studies of professionals trying to “do” leadership. Through interviews with managers and their subordinates, getting a good understanding of organizational context, and critically interpreting their observations considering both leadership theories and a wealth of other perspectives, their celebration of reflexivity is used to question dominant leadership thinking. Considering and challenging various departures from lines of reasoning results in a book that draws upon rich empirical material and which has a number of new, provocative, critical and constructive ideas that help to develop sharper and more thoughtful thinking and practice - both in academic and practical contexts. Suitable for leadership and organisation courses at upper-level undergraduate and upwards (including MBA-classes and Executive Education) and a thought provoking read for practitioners and management development professionals interested in leadership thought.

In today’s complex work world, things no longer get done simply because someone issues an order and someone else follows it. Most of us work in socially intricate organizations where we need the help not only of subordinates but of colleagues, superiors, and outsiders to accomplish our goals. This often leaves us in a “power gap” because we must depend on people over whom we have little or no explicit control. This is a book about how to bridge that gap: how to exercise the power and influence you need to get things done through others when your responsibilities exceed your formal authority. Full of original ideas and expert insights

about how organizations—and the people in them—function, Power and Influence goes further, demonstrating that lower-level personnel also need strong leadership skills and interpersonal know-how to perform well. Kotter shows how you can develop sufficient resources of "unofficial" power and influence to achieve goals, steer clear of conflicts, foster creative team behavior, and gain the cooperation and support you need from subordinates, coworkers, superiors—even people outside your department or organization. He also shows how you can avoid the twin traps of naivete and cynicism when dealing with power relationships, and how to use your power without abusing it. Power and Influence is essential for top managers who need to overcome the infighting, foot-dragging, and politicking that can destroy both morale and profits; for middle managers who don't want their careers sidetracked by unproductive power struggles; for professionals hindered by bureaucratic obstacles and deadline delays; and for staff workers who have to "manage the boss." This is not a book for those who want to "grab" power for their own ends. But if you'd like to create smooth, responsive working relationships and increase your personal effectiveness on the job, Kotter can show you how—and make the dynamics of power work for you instead of against you.

Are leaders morally special? Is there something ethically distinctive about the relationship between leaders and followers? Should leaders do whatever it takes to achieve group goals? Leadership Ethics uses moral theory, as well as empirical research in psychology, to evaluate the reasons everyday leaders give to justify breaking the rules. Written for people without a background in philosophy, it introduces readers to the moral theories that are relevant to leadership ethics: relativism, amoralism, egoism, virtue ethics, social contract theory, situation ethics, communitarianism, and cosmopolitan theories such as utilitarianism and transformational leadership. Unlike many introductory texts, the book does more than simply acquaint readers with different approaches to leadership ethics. It defends the Kantian view that everyday leaders are not justified in breaking the moral rules. How are leaders successfully managing competitive companies in the 21st Century? Gulati/Mayo/Nohria's MANAGEMENT, 1E, by award-winning instructors and prominent Harvard business experts, addresses the many integrated facets in answering this key question to help you effectively prepare for successful leadership now and in the future. As a manager, you will be confronted with challenges and opportunities that are more dynamic and complex than ever before. As a leader in any business role, you need to understand how to harness technological advances, manage and lead a dispersed and diverse workforce, anticipate and react to constant competitive and geopolitical change and uncertainty, compete on a global scale, and operate in a socially responsible and accountable manner. Gulati/Mayo/Nohria's MANAGEMENT, 1E demonstrates the mutual interconnectivity between three key facets of management: strategic positioning, organizational design, and individual leadership. The book presents management from a tangible, integrated, and current perspective, teaching you to visualize how strategy informs leadership and how leaders influence strategic positioning and, ultimately, manage performance. CEO succession represents a challenge for many companies. The leadership style of the new CEO impacts employees'

attitudes which, in turn, might be biased by the comparison employees make with their previous CEO. Cristina Pratelli investigates how and why leadership style (dis)similarity between the predecessor and the successor develops and affects successor leadership effectiveness. After a literature review and a theoretical model, she presents results from a quantitative study with SMEs in Switzerland as well as a qualitative multiple-case study with family businesses based in Germany, Italy, and Switzerland. This work offers new insights into CEO selection, leadership development, and the effectiveness of organizations.

Over his fifteen years at Yum! Brands, Novak has developed a trademarked program—Taking People with You—that he personally teaches to thousands of managers around the world. He shows them how to make big things happen by getting people on their side. No skill in business is more important. And Yum!'s extraordinary success (at least 13 percent growth for each of the last ten years) proves his point. Novak knows that managers don't need leadership platitudes or business school theories. So he cuts right to the chase with a step-by-step guide to setting big goals, building strong teams, blowing past your targets, and celebrating after you shock the skeptics. And then doing it again and again until consistent excellence becomes a core element of your culture.

perspective through the eyes of some scholars of leadership. From the Islamic perspective, leadership is examined against the background of the Holy Quran and the Sunnah of our Beloved Messenger Prophet Muhammad (PBUH), as well as the guided Caliphs and previous Prophets of Allah starting from Prophet Adam (PBUH) up to Prophet Muhammad (PBUH). This book is for everyone irrespective of their background and what they do in life. At the same time it is a guide for those who aspire to be leaders purely for the pleasure of Allah on earth and who take their jobs and every activity as a form of worship without expecting anything in returned like power or money.

This accessible and comprehensive textbook is designed specifically to develop students' understanding of leadership in a variety of contexts. Assuming no prior experience of leadership in the business world, this book is a must-read for students embarking on their study of leadership, while thinking ahead to their own future employment. The book is divided into two clear parts, to logically guide the reader through the key theoretical models of leadership, as well as the issues and themes that surround the subject. This structure ensures a fundamental understanding of the basics of the subject, as well as a comprehensive grasp of relevant contemporary issues. To help to interpret the key theories, the book also illustrates leadership in action using a wealth of diverse case studies. The book offers a primer on complexity science and its applications to organization studies, and compares the logics of complexity science with those underlying traditional leadership approaches. It describes methodological approaches for studying leadership from a complexity perspective, and offers examples of applications of complexity science to leadership theory. How do leaders influence others? Although they sometimes appeal directly to good reasons, which we associate with rational persuasion, leaders also use guilt, pressure, flattery, bullying, and rewards and punishment—all to get the behaviors that they want. Even when leaders refrain from outright lying, they are nevertheless known to practice something approaching, perhaps reaching, the level of manipulation. Influence therefore presents a serious ethical problem across leadership contexts. *Leadership and the Ethics of Influence* argues that influence puts leaders at risk of using people. It is generally disrespectful of autonomy to figure out what makes people "tick" in an effort to "handle" them.

In contrast with physical force, influence works through agency, not around it. Despite this feature of influence—and, to a large extent because of it—the everyday influence associated with leadership is often morally troublesome. What matters morally is not only whether agency is bypassed or overridden but also who is ultimately in control. This book uses philosophy and leadership studies to show how leaders across different contexts can be justified in getting followers to do things. Connecting moral theory to leadership theory, and especially to charismatic leadership, authentic leadership, transforming leadership, and ethical leadership, this book is essential reading for leadership scholars, students, and practitioners.

These chapters on 'Responsible Leadership' represent the latest thinking on a topic of increasing relevance in a connected world. There are many challenges that still remain when it comes to establishing responsible leadership both in theory and practice. Whilst offering conceptualisations for the improvement of leadership is a first and perhaps easier response, what is more difficult is to facilitate the actual change to happen. These chapters will not only generate interest in the emerging domain of studies on responsible leadership, but also will pave the way for future research in this area in the years to come.
