THE JOURNEY MATTERS AS MUCH AS THE DESTINATION. Scrap the map and go full throttle. Most leadership books tell you how to set and achieve goals. This one is different. This one is written by a communications leader who's as passionate about riding motorcycles as she is about running her business. Her name is Elise Mitchell, and she wants to tell you about her journey—from starting her own agency to building a world-class brand to enjoying the ride along the way. But mostly, she wants to talk to you about your journey... Ask yourself: WHERE DO YOU WANT TO GO? Pick a destination. Not just for your career, but for your life. Answer this: HOW DO YOU PLAN TO GET THERE? Look at the road ahead. Then plot your course. But be prepared for some major twists, turns, and detours. Most importantly: ARE YOU ENJOYING THE JOURNEY? If not, maybe you need to throw away the map. Restart your engine. And get ready for the ride of your life. Whether you're just stepping into leadership an accomplished leader seeking something more, or simply stalled along the way, Mitchell's refreshing approach to modern leadership will help you navigate the curves and pit stops on your own path to fulfillment. You don't need a motorcycle. You just need to get revved up for the road ahead.

The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one

set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

“This inspiring book belongs on the desk of every CEO and politician. With eye-opening case studies and recommended behaviors in every chapter, it's an indispensable user guide for servant leaders.” —Ken Blanchard, coauthor of *The New One Minute Manager* and coeditor of *Servant Leadership in Action* On the most fundamental level, leaders must bring divergent groups together and forge a consensus on a path forward. But what makes that possible? Humility—a deep regard for the dignity of others—is the key, says distinguished leadership educator Marilyn Gist. Leadership is a relationship, and humility is the foundation for all healthy relationships. Leader humility can increase engagement and retention. It inspires and motivates. Gist offers a model of leader humility derived from three questions people ask of their leaders: Who are you? Where are we going? Do you see me? She explores each of these questions in depth, as well as the six key qualities of leader humility: a balanced ego, integrity, a compelling vision, ethical strategies, generous inclusion, and a developmental focus. Much of this book is based on Gist's interviews with a dozen distinguished leaders of organizations such as the Mayo Clinic, Costco, REI, Alaska Airlines, Starbucks, and others. And the foreword and a guest chapter are written by Alan Mulally, the legendary leader who brought Ford back from the brink of bankruptcy after the 2008 financial collapse and

whose work is an exemplar of leader humility.

"A breakthrough school improvement approach for K-12 principals that will help them to move beyond incremental gains and achieve dramatic transformation"--

Everyone is a leader in his or her own way. It could be in a company, in the government, with an NGO, in the classroom, or at home. There are tomes written about leadership. Most leaders have no time or inclination to pore over heavy stuff. But not many can resist a story, especially if it is only two or three pages long, as most of the stories in this book are.

These stories have come from all sources--from Aesop to the Internet. In most cases it is impossible to trace the origin of the stories. Even when the immediate source is traced, it only leads to another source, which in turn leads to another until the trail is lost. Stories belong to humanity as whole. I have even tweaked some of the stories.

Named one of 100 Leadership & Success Books to Read in a Lifetime by Amazon Editors To lead is to live dangerously. It's romantic and exciting to think of leadership as all inspiration, decisive action, and rich rewards, but leading requires taking risks that can jeopardize your career and your personal life. It requires putting yourself on the line, disturbing the status quo, and surfacing hidden conflict. And when people resist and push back, there's a strong temptation to play it safe. Those who choose to lead plunge in, take the risks, and sometimes get burned. But it doesn't have to be that way say renowned leadership authorities Ronald Heifetz and Marty Linsky. In Leadership on the Line, they show how it's possible to make a difference without getting "taken out" or pushed aside. They present everyday tools that give equal weight to the dangerous work of leading change and the critical importance of personal survival. Through vivid stories from all walks of

A personal and empowering blueprint—from one of America's rising Democratic stars—for outsiders who seek to become the ones in charge Leadership is hard. Convincing others—and often yourself—that you possess the answers and are capable of world-affecting change requires confidence, insight, and sheer bravado. *Minority Leader* is the handbook for outsiders, written with the awareness of the experiences and challenges that hinder anyone who exists beyond the structure of traditional white male power—women, people of color, members of the LGBTQ community, and millennials ready to make a difference. In *Minority Leader*, Stacey Abrams argues that knowing your own passion is the key to success, regardless of the scale or target. From launching a company, to starting a day care center for homeless teen moms, to running a successful political campaign, finding what you want to fight for is as critical as knowing how to turn thought into action. Stacey uses her experience and hard-won insights to break down how ambition, fear, money, and failure function in leadership, while offering personal stories that illuminate practical strategies. Stacey includes exercises to help you hone your skills and realize your aspirations. She discusses candidly what she has learned over the course of her impressive career: that differences in race, gender, and class are surmountable. With direction and dedication, being in the minority actually provides unique and vital strength, which we can employ to rise to the top and make real change.

Excellent leaders are not afraid of a crisis, instead they look upon it as an opportunity for growth. In this book, Aditi Chopra discusses what it means to lead under crisis in the corporate world. It is very important for great leaders to learn the art of turning every crisis into an opportunity and henceforth become even stronger leaders.

Why is it so hard to make lasting changes in our companies, in our communities, and in our own lives? The primary obstacle is a conflict that's built into our brains, say Chip and Dan Heath, authors of the critically acclaimed bestseller *Made to Stick*. Psychologists have discovered that our minds are ruled by two different systems - the rational mind and the emotional mind—that compete for control. The rational mind wants a great beach body; the emotional mind wants that Oreo cookie. The rational mind wants to change something at work; the emotional mind loves the comfort of the existing routine. This tension can doom a change effort - but if it is overcome, change can come quickly. In *Switch*, the Heaths show how everyday people - employees and managers, parents and nurses - have united both minds and, as a result, achieved dramatic results:

- The lowly medical interns who managed to defeat an entrenched,

decades-old medical practice that was endangering patients • The home-organizing guru who developed a simple technique for overcoming the dread of housekeeping • The manager who transformed a lackadaisical customer-support team into service zealots by removing a standard tool of customer service In a compelling, story-driven narrative, the Heaths bring together decades of counterintuitive research in psychology, sociology, and other fields to shed new light on how we can effect transformative change. Switch shows that successful changes follow a pattern, a pattern you can use to make the changes that matter to you, whether your interest is in changing the world or changing your waistline.

From a co-founder of Pixar Animation Studios—the Academy Award–winning studio behind *Coco*, *Inside Out*, and *Toy Story*—comes an incisive book about creativity in business and leadership for readers of Daniel Pink, Tom Peters, and Chip and Dan Heath. **NEW YORK TIMES BESTSELLER | NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Huffington Post • Financial Times • Success • Inc. • Library Journal** Creativity, Inc. is a manual for anyone who strives for originality and the first-ever, all-access trip into the nerve center of Pixar Animation—into the meetings, postmortems, and “Braintrust” sessions where some of the most successful films in history are made. It is, at heart, a book about creativity—but it is also, as Pixar co-founder and president Ed Catmull writes, “an expression of the ideas that I believe make the best in us possible.” For nearly twenty years, Pixar has dominated the world

of animation, producing such beloved films as the Toy Story trilogy, Monsters, Inc., Finding Nemo, The Incredibles, Up, WALL-E, and Inside Out, which have gone on to set box-office records and garner thirty Academy Awards. The joyousness of the storytelling, the inventive plots, the emotional authenticity: In some ways, Pixar movies are an object lesson in what creativity really is. Here, in this book, Catmull reveals the ideals and techniques that have made Pixar so widely admired—and so profitable. As a young man, Ed Catmull had a dream: to make the first computer-animated movie. He nurtured that dream as a Ph.D. student at the University of Utah, where many computer science pioneers got their start, and then forged a partnership with George Lucas that led, indirectly, to his co-founding Pixar in 1986. Nine years later, Toy Story was released, changing animation forever. The essential ingredient in that movie's success—and in the thirteen movies that followed—was the unique environment that Catmull and his colleagues built at Pixar, based on leadership and management philosophies that protect the creative process and defy convention, such as:

- Give a good idea to a mediocre team, and they will screw it up. But give a mediocre idea to a great team, and they will either fix it or come up with something better.
- If you don't strive to uncover what is unseen and understand its nature, you will be ill prepared to lead.
- It's not the manager's job to prevent risks. It's the manager's job to make it safe for others to take them.
- The cost of preventing errors is often far greater than the cost of fixing them.
- A company's communication structure should not mirror its

The inspirational bestseller that ignited a movement and asked us to find our WHY Discover the book that is captivating millions on TikTok and that served as the basis for one of the most popular TED Talks of all time—with more than 56 million views and counting. Over a decade ago, Simon Sinek started a movement that inspired millions to demand purpose at work, to ask what was the WHY of their organization. Since then, millions have been touched by the power of his ideas, and these ideas remain as relevant and timely as ever. **START WITH WHY** asks (and answers) the questions: why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. **START WITH WHY** shows that the leaders who have had the greatest influence in the world all think, act and communicate the same way—and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle,

and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.

The New York Times bestselling book about the early development, growth, and exercise of leadership from Pulitzer Prize-winning author Doris Kearns Goodwin “should help us raise our expectations of our national leaders, our country, and ourselves” (The Washington Post). “After five decades of magisterial output, Doris Kearns Goodwin leads the league of presidential historians” (USA TODAY). In her “inspiring” (The Christian Science Monitor) Leadership, Doris Kearns Goodwin draws upon the four presidents she has studied most closely—Abraham Lincoln, Theodore Roosevelt, Franklin D. Roosevelt, and Lyndon B. Johnson (in civil rights)—to show how they recognized leadership qualities within themselves and were recognized as leaders by others. By looking back to their first entries into public life, we encounter them at a time when their paths were filled with confusion, fear, and hope. Leadership tells the story of how they all collided with dramatic reversals that disrupted their lives and threatened to shatter forever their ambitions. Nonetheless, they all emerged fitted to confront the contours and dilemmas of their times. At their best, all four were guided by a sense of moral purpose. At moments of great challenge, they were able to summon their talents to enlarge the

opportunities and lives of others. Does the leader make the times or do the times make the leader? “If ever our nation needed a short course on presidential leadership, it is now” (The Seattle Times). This seminal work provides an accessible and essential road map for aspiring and established leaders in every field. In today’s polarized world, these stories of authentic leadership in times of apprehension and fracture take on a singular urgency. “Goodwin’s volume deserves much praise—it is insightful, readable, compelling: Her book arrives just in time” (The Boston Globe).

becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster.
