The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this “vital, necessary, and beautiful book” (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and “allows us to understand racism as a practice not restricted to ‘bad people’ (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.

No one is born with good writing skills. It takes time to learn proper writing techniques and a great deal of practice to improve your skills. Our exercises allow you to improve writing and grammar skills while rewriting real world English passages. The English passages included in this book are mostly workplace oriented. Therefore they are more suitable for working adults. Rewrite the passages as directed. One suggested answer is provided for each passage. "HELP! My Students Can't Write!" Why You Need a Writing Revolution in Your Classroom and How to Lead It. The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, TWR can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities TWR is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

The 25 chapters contained in this book were all written by scholars working in the field of applied linguistics and English language teaching in various East Asian contexts. East Asia is large and diverse in terms of socio-economic, linguistic, and ethnic parameters. Statistics alone cannot give a clear understanding of what goes on in rural and urban universities and what challenges English language teachers and learners face in those contexts. To understand this wide gamut of issues in English language teaching in East Asia is thus a very large undertaking. The book addresses some of these issues, arranging its 25 chapters into five sections: namely, Assessing Language Performance; Teaching English Writing; Learner Autonomy; Corpus and Discourse Research; and Learning English in East Asian Contexts. Many of the chapters in this volume concern familiar topics such as linking assessment to teaching, learning and curriculum; conducting assessment validation research; examining meta-cognitive strategies; investigating teaching and learning English for academic purposes; and profiling prevailing word lists for language learners. Other chapters are on novel or lesser known topics such as non-verbal delivery in speaking assessment; the use of visualization as a reading strategy; learner strategies in a Facebook corpus; effects of discourse signaling cues and rate of speech; and an ontogenetic analysis of college English textbooks. Collectively, these chapters showcase English language learning, teaching, and assessing in a range of contexts using a variety of methods and techniques to deal with issues relevant to East Asian teachers, learners and researchers.
