

Lecture Notes Rural Sociology

Controversial Issues in Social Studies Education in Turkey: The Contemporary Debates consists of different research each analyze a controversial topic that is significant to understand the social and political dynamics of Turkish society and culture. One of the purpose of this volume is to analyze and discuss how various controversial issues are perceived by Turkish educators. It also provides insight about how to think and re-organize education both in Turkey and in a global world by taking perceptions of in-service and pre-service social studies teachers on controversial issues and how to teach about them in the Turkish context into consideration. Lastly, it may provide educators and researchers who are interested in teaching and examining such issues with a holistic view.

This book gathers the latest advances, innovations, and applications in urban and regional planning processes and science, as presented by international researchers at the 11th International Conference on Innovation in Urban and Regional Planning (INPUT), held in Catania, Italy, on September 8-10, 2021. The overarching theme of the conference INPUT 2021 was Integrating Nature-Based Solutions in Planning Science and Practice, with contributes focusing on functionality of urban ecosystems toward more healthier and resilient cities, planning solutions for socio-ecological systems, technologies and hybrid models for spatial planning, geodesign, urban metabolism, computational planning, ecosystems services, green infrastructure, climate change adaptation and mitigation, rural landscapes, cultural heritage, and accessibility for urban planning. The conference brought together international scholars in the field of planning, civil engineering and architecture, ecology and social science, to build and consolidate the knowledge and evidence on NBS in urban and regional planning.

Contents: Introduction, History, Evolution and Development, People in Villages, Life in Rural Belts, The Infrastructure, Rural Economy, Agricultural Economy, Agricultural Projects, Farm Sector, Role of Education, Teaching Methods, Teaching Approaches, Teaching Techniques, Pace of Progress, New of Progress, New Trends, Social Revolution.

As network science and technology continues to gain popularity, it becomes imperative to develop procedures to examine emergent network domains, as well as classical networks, to help ensure their overall optimization. Advanced Methods for Complex Network Analysis features the latest research on the algorithms and analysis measures being employed in the field of network science. Highlighting the application of graph models, advanced computation, and analytical procedures, this publication is a pivotal resource for students, faculty, industry practitioners, and business professionals interested in theoretical concepts and current developments in network domains.

Foot and mouth disease and BSE have both had a devastating impact on rural society. Alongside these devastating developments, the rise of the organic food movement has helped to revitalize an already politicized rural population. From fox-hunting to farming, the vigour with which rural activities and living are defended overturns received notions of a sleepy and complacent countryside. Over the years "rural life" has been defined, redefined and eventually fallen out of fashion as a sociological concept--in contrast to urban studies, which has flourished. This much-needed reappraisal calls for its reinterpretation in light of the profound changes affecting the countryside. First providing an overview of rural sociology, Hillyard goes on to offer contemporary case studies that clearly demonstrate the need for a reinvigorated rural sociology. Tackling a range of contentious issues--from fox-hunting to organic farming--this book offers a new model for rural sociology and reassesses its role in contemporary society.

Proceedings of the NATO Advanced Study Institute, Cappuccini, San Miniato, Italy, July 18-30, 1982

The Third Edition of Our Social World: Introduction to Sociology is truly a coherent textbook that inspires students to develop their sociological imaginations, to see the world and personal events from a new perspective, and to confront sociological issues on a day-to-day basis. Key Features: * Offers a strong global focus: A global perspective is integrated into each chapter to encourage students to think of global society as a logical extension of their own micro world. * Illustrates the practical side of sociology: Boxes highlight careers and volunteer opportunities for those with a background in sociology as well as policy issues that sociologists influence. * Encourages critical thinking: Provides various research strategies and illustrates concrete examples of the method being used to help students develop a more sophisticated epistemology. * Presents "The Social World Model" in each chapter: This visually-compelling organizing framework opens each chapter and helps students understand the interrelatedness of core concepts. New to the Third Edition: * Thirty new boxed features, including the innovative 'Engaging Sociology' and 'Applied Sociologists at Work' features * Three substantially reorganised chapters (2. Examining the Social World, 3. Society and Culture, and 13. Politics and Economics) * 315 entirely new references and 120 new photos.

This academic book explores anthropological, geographical and rural sociological ways of studying rurality and the global rural-urban matrix under the contemporary world capitalist system. The main theme of these contributions by senior scholars is that the study of the rural is worthwhile and should not be ignored due to urban-normativity.

"A lucid and fascinating work about Chinese society and values. Fei's account of how China differs from the West is every bit as telling now as it was when this book was first published almost half a century ago."--Orville Schell "What are the fundamental characteristics of Chinese society and how does it differ from the West? In "From the Soil," China's foremost sociologist offered his insights, based on fieldwork in China and residence in the West, into this fascinating question. Vivid and clearly written, it has long been a classic of Chinese sociology, widely read by Chinese. It is wonderful finally to have it available in English."--David Arkush, University of Iowa

Digital cities constitutes a multidisciplinary field of research and development, where researchers, designers and developers of communityware interact and collaborate with social scientists studying the use and effects of these kinds of infrastructures and systems in their local application context. The field is rather young. After the diffusion of ICT in the world of organizations and companies, ICT entered everyday life. And this also influenced ICT research and development. The 1998 Workshop on Communityware and Social Interaction in Kyoto was an early meeting in which this emerging field was discussed. After that, two subsequent Digital Cities workshops were organized in Kyoto, and a third one in Amsterdam. This book is the result of the 3rd Workshop on Digital Cities, which took place September 18–19, 2003 in Amsterdam, in conjunction with the 1st Communities and Technologies Conference. Most of the papers were presented at this workshop, and were revised thoroughly afterwards. Also the case studies of digital cities in Asia, the US, and Europe, included in Part I, were direct offsprings of the Digital Cities Workshops. Together the papers in this volume give an interesting state-of-the-art overview of the field. In total 54 authors from the Americas, from Asia, and from Europe were contributed to this volume. The authors come from Brazil (two), the USA (eleven), China (three), Japan (fourteen), Finland (two), Germany (two), Italy (three), Portugal (two), the Netherlands (eight), and the UK (seven), indicating the international nature of the research field.

Rural Community Studies in Europe: Trends, Selected and Annotated Bibliographies, Analyses, Volume 2 documents studies concerning several rural areas in Europe. The book presents information concerning a specific area, which includes a review of historical trends; annotated bibliography; and an analysis of studies conducted on the area. This volume particularly covers rural areas in the Netherlands, Germany, Hungary, Italy, and Finland. This book will be of great interest to researchers who require information about rural communities.

Jean Martin was a pioneer of sociology, inventing a version of the discipline that was uniquely suited to Australia in the post-war period. Jean Isobel Martin (1923–79) made herself a sociologist before the discipline was established in Australia. Regarded as a founder of Australian sociology, her writing, teaching and policy helped shape Australia in the period of economic growth and social development that followed World War II. The Martin Presence is a biography that examines her life and her work across the concerns of the time – the needs of country towns, the factory work floor, families and urban structure, poverty and inequality, education and immigration – and explores her far-reaching influence on the social sciences in Australia.

In the age of globalization and the changing welfare state, community relations are now more important than ever. What are Community Studies? gives an overview of the community studies field, with particular focus on the research methods used, and how they have evolved in recent years. Defining the key terms in the field, it outlines the history of the methods used in community studies and uses examples and case studies to illuminate the theory. This book captures the organization of modern community life and shows how current researchers are working with broader and more imaginative definitions of community. Responding to criticisms of the field, What are Community Studies? challenges our traditional notions of communities and how they are analysed. Graham Crow's text will be a vital resource to researchers in the field.

Education and Communication for Development presents at one place the various research finding in the fields of rural psychology, rural sociology, communication, administration and training and programme planning for the quick dissemination of modern technologies to the rural people, who are the real partners of development. Contents: Concept and Types of Education / Educational Psychology as Applied to Development / Rural Sociology and Planned Social Change / Communication and Audio-Visuals for Development / Programme Planning and Five-Year Plans / Development Programmes / Extension, Administration and Training / Abbreviations and Titles of Development Programmes in India / Appendix A / Appendix B / Bibliography / Author Index / Subject Index

This book is about International Service for National Agricultural Research's (ISNAR) study to identify key factors that influenced the effectiveness and efficiency of links between research and technology transfer. It recommends ways to improve these links and reflects the progress made till date.

Teaching Rural Sociology A Resource Manual Methods Of Teaching Rural Sociology Discovery Publishing House

If mobile technologies are to be effectively used in education, how do we best implement sustainable mobile solutions for teaching and learning? The aim of this handbook is to support educators and policy makers who are investing in innovations in digital education to develop effective and sustainable mobile learning solutions for higher education environments. Authors from sixteen countries across the Asia-Pacific region have collaborated to share their experiences with developing and implementing mobile learning initiatives. These projects focus on a variety of aspects of mobile learning innovation, from the trial adoption of existing social media platforms on mobile devices and the development of specialised applications or mobile learning systems, to the large-scale, interuniversity implementation of technologies and pedagogies to support mobile learning. Each chapter addresses challenges and solutions at one or more levels of mobile learning innovation within the education system, encompassing the student perspective, the educator perspective, technical processes, policies and organisational strategy, and leadership. The book also offers a unique perspective on the integration of mobile learning innovations within the educational, political and cultural environments of Asia-Pacific countries.
