Research in science education is now an international activity. This book asks for the first time, Does this research activity have an identity? -It uses the significant studies of more than 75 researchers in 15 countries to see to what extent they provide evidence for an identity as a distinctive field of research. -It considers trends in the research over time, and looks particularly at what progression in the research entails. -It provides insight into how researchers influence each other and how involvement in research affects the being of the researcher as a person. -It addresses the relation between research and practice in a manner that sees teaching and learning in the science classroom as interdependent with national policies and curriculum traditions about science. It gives graduate students and other early researchers an unusual overview of their research area as a whole. Established researchers will be interested in, and challenged by, the identity the author ascribes to the research and by the plea he makes for the science content itself to be seen as problematic.

Beautiful, destitute, and desperate she is looking to get out any way she can. She has worked her whole life as a laundress with no hope of escaping her fate anytime soon. But then her life changes when a strange woman appears with the key to Ciardis's escape. With an offer to take her to the capital and a life she'd never dreamed of, it's hard to resist. There's only one catch. She wants Ciardis to become a companion: she'll be required to wear expensive dresses, learn to conduct suitable magic, educate herself on court proclivities, and - in the end - chain herself to the highest bidder. A Patron for life. Ciardis knows that this is her one opportunity to change her life. But what she does not know is that she will soon be at the heart of intrigues and power struggles, and that her new life in luxury demands a high price, perhaps even the life of a prince. Although Minecraft provides something for everyone, what it does not come with are directions, rules, or explanations telling you what the different items and blocks in the game are and what to do with them. The amount of information in the game can be overwhelming, and it can be difficult to know where to begin. The good news is, you don't need to know everything to start playing. Only the basics. So this mini-encyclopedia looks at some of the basic facets of the game, from common blocks and crafting recipes to enchantments and potions and transportation.

Andre Rival, at home in both Paris and Berlin, has created a fascinating project out of a relatively simple idea: 100 women taking photographs of themselves. The outcome is both startling and impressive. It is an expression of contemporary female identity - self-aware, distinctive and thoroughly positive, in a series of nude photographs that inexorably capture and hold our attention, revealing at the same time the artist's highly creative approach to the medium of photography and to the individual selves of the women portrayed. The author describes his project in this way: "We are inundated with pictures of women in the media.

Ordinarily, the pictures we see seek to achieve a kind of 'sameness' based on unwritten ideals of beauty; physical perfection, total fitness become the determining factors. These images of women, provoked as they are by the media industry, awakened in me the urge to confront both that industry and myself with something else. I chose to set aside my own ways of thinking and do a series of 100 women in which it was not I who would put together the photographs, but the women themselves. For this purpose, I gave them each a shutter-switch and left the room. That represented the beginning of the attempt to enable the women to become photographic subjects rather than objects; they were left to decide on their own which personal image of themselves they wanted to convey. The conditions were the same for all of the women: the same lighting, the same white background and the same unchanged camera position. It was essential to fix the location of the camera, so that the women did not perceive themselves as being pursued by an 'observer'; instead, they were able to establish distance and camera angle themselves with the aid of a video screen that showed them each camera exposure as a still photo."

In *Feeling Persecuted*, Anthony Bale explores the medieval Christian attitude toward Jews, which included a pervasive fear of persecution and an imagined fear of violence enacted against Christians. As a result, Christians retaliated with expulsions, riots, and murders that systematically denied Jews the right to religious freedom and peace. Through close readings of a wide range of sources, Bale exposes the perceived violence enacted by the Jews and how the images of this Christian suffering and persecution were central to medieval ideas of love, community, and home. The images and texts explored by Bale expose a surprising practice of recreational persecution and show that the violence perpetrated against medieval Jews was far from simple anti-Semitism and was in fact a complex part of medieval life and culture. Bale's comprehensive look at medieval poetry, drama, visual culture, theology, and philosophy makes *Feeling Persecuted* an important read for anyone interested in the history of Christian-Jewish relations and the impact of this history on modern culture.

"Documents the major breakthroughs in science from ancient times to the present with emphasis on the modern era."--Thomson Gale description.

This is a study of Central European nobles in revolution. As one of Germany's richest, most insular and most autonomous nobilities, the Free Knights in Electoral Mainz represented the early modern noble ideal of pure bloodlines and cosmopolitan loyalties

in the old society of orders. But this world came to an end with the outbreak of the revolutionary wars in 1792. Quite apart from the social, economic and political dislocations and loss, the era from 1789 to 1815 also meant a cultural reorientation for the nobility. William D. Godsey, Jr here explores how nobles in post-revolutionary Germany gradually abandoned their old self-understanding and assimilated with the new cultural 'nation' while aristocrats in the Habsburg Empire, which had taken in many emigres from Mainz, moved instead towards supranationalism. This is a major contribution to debates about the relationship between identity, cultural nationalism, supranationalism and religion in Germany and the Habsburg Empire.

Rebecca Rusch is one of the great endurance athletes of our time. Known today as the Queen of Pain for her perseverance as a relentlessly fast runner, paddler, and mountain bike racer, Rusch was a normal kid from Chicago who abandoned a predictable life for one of adventure. In her new book *Rusch to Glory: Adventure, Risk & Triumph on the Path Less Traveled*, Rusch weaves her fascinating life's story among the exotic locales and extreme conditions that forged an extraordinary athlete from ordinary roots. Rusch has run the gauntlet of endurance sports over her career as a professional athlete-- climbing, adventure racing, whitewater rafting, cross-country skiing, and mountain biking--racking up world championships along the way. But while she might seem like just another superhuman playing out a fistful of aces, her empowering story proves that anyone can rise above self-doubt and find their true potential. First turning heads with her rock climbing and paddling skills, Rusch soon found herself spearheading adventure racing teams like Mark Burnett's Eco-Challenge series. As she fought her way through the jungles of Borneo, raced camels across Morocco, threaded the rugged Tian Shan mountains, and river-boarded the Grand Canyon in the dead of winter, she was forced to stare down her own demons. Through it all, Rusch continually redefined her limits, pushing deep into the pain cave and emerging ready for the next great challenge. At age 38, Rusch faced a tough decision: retire or reinvent herself yet again. Determined to go for broke, she shifted her focus to endurance mountain bike racing and rode straight into the record books at a moment

Jane Austen began writing in her early teens, and filled three notebooks with her fiction. Her earliest work reflects her interest in the novel as a genre; in brilliant short pieces she plays with plots, stock characters, diction, and style, developing a sense of form at a remarkably early age. The characters of these stories have a jaunty and never-failing devotion to themselves. They perpetually lie, cheat, steal - and occasionally commit murder. Throughout these short or unfinished pieces, Austen exhibits her sense of the preposterous in life and fiction with tough-mindedness and robust humour. Alice, the mock-heroine of *Jack and Alice* has 'many rare and charming qualities, but Sobriety is not one of them'. In her later published fiction, Austen had learned to take demands for propriety seriously, reining in whatever might be thought boisterous or coarse. Here we see Jane Austen without her inhibitions. In addition to prose fiction and prayers, this collection also contains many of Jane Austen's poems, written to amuse or console friends, and rarely reprinted. The texts have been compared with the manuscripts and edited to give a number of new readings. The notes recreate the texture of daily life in Jane Austen's age, and demonstrate her knowledge of the fiction of her time. The introduction by Margaret Anne Doody sets the writings within the context of Jane Austen's life and literary career. ABOUT THE SERIES: For over 100 years Oxford

What causes two sisters who share a whimsical yet calamitous upbringing to become estranged adults? In her debut autobiography, *A Family Divided: A Memoir*, Jackson leaps brilliantly into the literary scene and candidly guides readers through a witty read as she searches for an answer to this very personal question. Clues are unearthed in a series of life events that combine sibling alcoholism, a secret life as a lesbian, a career in deaf education, and ever-faithful canine companions. She begins with a loving chronicle of her parents unlikely meeting and takes readers along as the family embarks on a transient military lifestyle. But when Jackson's mother is diagnosed with amyotrophic lateral sclerosis (ALS), the fabric of the family begins to fray, and the sisters experience their mother's declining health in vastly different ways. Told with a compelling and open heart, *A Family Divided: A Memoir*, highlights parenting with the best of intentions and the disastrous interpersonal relationship with which the sisters are

What does history really consist of? Centuries of people quietly going about their daily business - sleeping, eating, having sex, endeavouring to get comfortable. And where did all these normal activities take place? At home. This was the thought that inspired Bill Bryson to start a journey around the rooms of his own house, an 1851 Norfolk rectory, to consider how the ordinary things in life came to be. And what he discovered are surprising connections to anything from the Crystal Palace to the Eiffel Tower, from scurvy to body-snatching, from bedbugs to the Industrial Revolution, and just about everything else that has ever happened, resulting in one of the most entertaining and illuminating books ever written about the history of the way we live, enhanced in this new edition by hundreds of stunning photographs and illustrations.

The book is divided into three sections that cover the premeiotic and premitotic events; mitotic mechanisms and approaches to the study of mitosis; and mechanisms of cytokinesis. The authors used a uniform style in presenting the concepts by including an overview of the field, a main theme, and a conclusion so that a broad range of biologists could understand the concepts. This volume also explores the potential developments in the study of mitosis and cytokinesis, providing a background and perspective into research on mitosis and cytokinesis that will be invaluable to scientists and advanced students in cell biology. The book is an excellent reference for students, lecturers, and research professionals in cell biology, molecular biology, developmental biology, genetics, biochemistry, and physiology.

What does it mean to be a woman? The current cultural ideal for womanhood encourages women to be strident, sexual, self-centered, independent -- and above all -- powerful and in control. But sadly, this model of womanhood hasn't delivered the happiness and fulfillment it promised. The Bible teaches that it's not up to us to decide what womanhood is all about. God created male and female for a very specific purpose. His design isn't arbitrary or unimportant. It is very intentional and He wants women to discover, embrace, and delight in the beauty of His design. He's looking for True Women! Bible teachers Mary A. Kassian and Nancy Leigh DeMoss share the key fundamentals of biblical womanhood in this eight week study. Each week includes five daily individual lessons leading to a group time of sharing and digging deeper into God's Word. And to enhance this time of learning together, on-line videos are available featuring Mary and Nancy as they encourage women to discover and embrace God's design and mission for their lives.
