No country, no culture, no person today is untouched by what happens in the rest of the world, and globalization presents many challenges. The Dalai Lama understands that the essential task of humanity in the twenty-first century must be to cultivate peaceful coexistence. In this book the Dalai Lama shows how in our globalized world, nations, cultures and individuals can find opportunities to connect through their shared human nature. All faiths turn to compassion as a guiding principle for living a good life. It is the responsibility of all people with an aspiration to spiritual perfection to help develop a deep recognition of the value of other faiths, and it is on that basis alone that we can cultivate genuine respect and cooperation. Towards the True Kinship of Faiths is a hopeful yet realistic look at how humanity can embrace a harmonious future.

La società attuale è sottomessa all'arbitrio della finanza speculativa: il fondamentalismo del mercato si contrappone ai fondamentalismi religiosi, aspetti di una reazione alla modernità di stampo regressivo. In entrambi i casi, nel contrasto si sperimenta una grave lesione dei diritti delle persone: vanificando le aspettative di uomini e donne incolpevoli, vengono anche compromessi i piani di vita di intere generazioni. In questo saggio, l'autore argomenta la necessità di una nuova stagione dei diritti e la reinvenzione del divino come risposta alla crisi in cui è precipitata la società.

This book examines how the social and cultural paradigms of contemporary Israel are articulated through the body. To construct a panoramic view of how the Israeli body is chosen, regulated, cared for, and ultimately made perfect, the author draws upon some twenty years of ethnographic research in Israel in a range of subjects. These include premarital and prenatal screening, the regulation of the body and its imagery among appearance-impaired children and their families, the screening and sanctifying of the body as part of the bereavement and commemoration of fallen soldiers, and the discourse of the chosen body as it surfaces during terrorist attacks, military socialization, war, and the peace process.

Max Weber, widely recognized as the greatest of the founders of classical sociology, is often associated with the development of capitalism in Western Europe and the analysis of modernity. But he also had a profound scholarly interest in ancient societies and the Near East, and turned the youthful discipline of sociology to the study of these archaic cultures. The Agrarian Sociology of Ancient Civilizations – Weber's neglected masterpiece, first published in German in 1897 and reissued in 1909 – is a fascinating examination of the civilizations of Mesopotamia, Egypt, Hebrew society in Israel, the city-states of classical Greece, the Hellenistic world and, finally, Republican and Imperial Rome. The book is infused with the excitement attendant when new intellectual tools are brought to bear on familiar subjects. Throughout the work, Weber blends a description of socio-economic structures with an investigation into mechanisms and causes in the rise and decline of social systems. The volume ends with a magisterial explanatory essay on the underlying reasons for the fall of the Roman Empire.

Elegantly written by a distinguished culinary historian, Food Is Culture explores the innovative premise that everything having to do with food—its capture, cultivation, preparation, and consumption—represents a cultural act. Even the "choices" made by primitive hunters and gatherers were determined by a culture of economics (availability) and medicine (digestibility and nutrition) that led to the development of specific social structures and traditions. Massimo Montanari begins with the "invention" of cooking which allowed humans to transform natural, edible objects into cuisine. Cooking led to the creation of the kitchen, the adaptation of raw materials into utensils, and the birth of written and oral guidelines to formalize cooking techniques like roasting, broiling, and frying. The transmission of recipes allowed food to acquire its own language and grow into a complex cultural product shaped by climate, geography, the pursuit of pleasure, and later, the desire for health. In his history, Montanari touches on the spice trade, the first agrarian societies, Renaissance dishes that synthesized different tastes, and the analytical attitude of the Enlightenment, which insisted on the separation of flavors. Brilliantly researched and analyzed, he shows how food, once a practical necessity, evolved into an indicator of social standing and religious and political identity. Whether he is musing on the origins of the fork, the symbolic power of meat, cultural attitudes toward hot and cold foods, the connection between cuisine and class, the symbolic significance of certain foods, or the economical consequences of religious holidays, Montanari's concise yet intellectually rich reflections add another dimension to the history of human civilization. Entertaining and surprising, Food Is Culture is a fascinating look at how food is the ultimate embodiment of our continuing attempts to tame, transform, and reinterpret nature.

L'autrice, tacitando il timore di apparire retorica e di parte, con onestà intellettuale affronta lo spinoso problema del diritto negato alla pace e quello della difficoltà della risoluzione di esso. Il lettore si trova a percorrere con lei un itinerario partecipativo ed emozionale che si incontra con lo straordinario evento dell'Ecumenismo religioso codificato da Giovanni XXIII, con quello epocale della giornata delle preghiere

delle religioni nel mondo per la pace recitate ad Assisi nel 2002 e con l'Ecumenismo Laico, portatore, come quello autenticamente religioso, di valori egualitaristi e pacifisti. Ambedue gli Ecumenismi, al di là delle loro irrinunciabili diversità, possono individuare concordanze di ideali e progetti attraverso il dialogo aperto e costruttivo. È questo l'assunto fondamentale dell'opera. Essa si arricchisce della trascrizione integrale delle preghiere delle religioni, di dati storici relativi ad esse e ai papi ecumenici e di alcune liriche di autori vari. L'intento divulgativo, l'impianto prevalentemente discorsivo, lineare, dialogico, intessuto di moniti, interrogativi, preghiere, riflessioni, immagini, rendono più agevole la comprensione del testo, espresso a volte con stilemi più aulici quando la trattazione lo ha richiesto. Per l'autrice occorre recuperare la nozione di ragione che, congiunta alla fede religiosa e laica, non smarrisca il nesso originario tra logos, linguaggio e dialogo trasmessoci dalla grecoità. Solo in tal modo è sperabile che si realizzi la sinderesi.

Phantasies of a Love Thief

Nel corso della sua storia millenaria, l'India ha espresso un pensiero filosofico originale, che per profondità e sistematicità poco ha da invidiare a quello occidentale. Fin da tempi antichissimi, infatti, i maestri indiani diedero vita a ricche e profonde speculazioni sull'uomo e la natura. Il saggio è strutturato per guidare attraverso lo sviluppo dei concetti e delle nozioni fondanti la filosofia indiana, ponendo attenzione ai problemi e alle domande che hanno alimentato il confronto dialettico tra maestri e scuole di pensiero. Qual è l'origine dell'universo e dei fenomeni naturali? Che significato attribuire al sé e all'io? Che legame esiste tra realtà e coscienza?
