Lets Get Real invites readers to learn the facts about property investing. It starts by encouraging you to clarify your current financial and personal situation; then: Fast-forward and define what you want life to look like in years to come; and Develop a wealth creation plan to achieve the lifestyle you desire when you no longer want to work. The authors concentrate on the why to rather than the how to, believing that once you have your mindset focused, your goals set and an understanding of the work involved, then the nuts and bolts of property investing are secondary. The book examines why property is still the best way to create wealth, despite tighter lending criteria and lower affordability. It reviews the challenges other generations faced, giving current property investors some perspective. With cartoons, graphics and motivational quotes throughout, this book is an easy read, but its not always easy to read the authors ask you some hard questions along the way. They believe they have to its all part of getting real about property investing to make sure you get real results.

This book provides projects that are suitable for instructors and parents to get children coding in Snap, Scratch or Python. These are coding languages commonly used in schools across the world - the book will be a great resource for teachers, and a great way for children to explore. This book is an introduction to computer programming using the most useful (and free) programs available combined with the new inspiration and excitement of micro computing available right now! It is an introduction to more complex computing at grade 4 level upwards. At home the purchase of a raspberry pi will enable all of these programs to run without any installation as SCRATCH and PYTHON is available on all versions of the micro computer. SNAP! is best suited for larger laptops or desktop computers and is almost identical to SCRATCH but it has an advantage of being a very good alternative for Laptop or Desktops. It's also entirely cloud based, so no installation required. PYTHON requires an IDE to work. The one we use is called THONNY (which is also installed on the Raspberry pi micro computer). Available for Mac/PC and Linux. The author has made these programs 'cross-platform' and has used standard SCRATCH 'blocks' and Python code that can be used on any

(Mac/PC/Linux) computer with Python 3. This should make it easier to teach and easy to remember. Each page is self contained with notes followed by a Python example.

From singer, model and YouTube celebrity Natasha Bure, the daughter of Candace Cameron Bure, comes a real, honest conversational book that doesn't hold back. Everywhere she goes and every video she posts has one basic message: this is real, this is life, and we all go through it. Whether it's acne, boyfriends, faith, stress, or having fun, Natasha's view is to simply be honest, simply be real, no matter what you face. Natasha's real and relatable tone paired with personal notes and stories will help readers see that living a "real" life is the best life. The dust jacket features embossing.

Shreddies in my hair. I looked at Eddie. Eddie's looking at me. Big grin on his face. I knew he had done it. Last week he put pepper in the raisins. The yucky things your borther does, the annoying things your parents say, the funny things you feel. Michael Rosen knows all about YOU! Look inside and see if he's spotted your deepest, darkest secrets. A much-loved classic of family life from the brilliant Michael Rosen & Quentin Blake.

Did you know that by adding a few simple steps to your selling process you could achieve sales you only dreamt of in the past? GoodbyeSellingProblems.com provides a 12 step system that you, as a business owner, or you, as a sales manager, can implement in less than a day and dramatically increase your results. Your sales efforts become much more productive and less stressful. It provides a framework for small businesses to structure their sales process. It strips away all the "fluff" and confusion that you encounter with most expensive sales training courses. The simple 12 step system provides a "nuts and bolts" approach to selling. It allows you to enter every sales situation with a purpose for closing the sale and gets you away from the deadly "sales visit" dilemma that most business owners and sales professionals fall into. In a just a few hours, you can literally gather the information that system introduces you to and make the most powerful sales presentation your company has ever encountered. When this system becomes part of your selling culture, it will provide you with improved sales, greater margins, and eliminate the competition. Author, Buzz Glover, after quietly reviewing and critiquing the sales people that called on him in his own businesses for over 15 years, became disillusioned with the fact that the great majority of salespeople were ill-prepared to sell their products or services. He knew that if he could introduce them to a system that he had developed and refined as a salesperson (and later as a sales manager), they could easily become much more effective at closing more sales faster! The system became a reality when he wrote this book as a companion to his system's website, www.goodbyesellingproblems.com. Through this sales system he is confident that he can change the way small businesses sell and make fundamental cultural changes in their approach to marketing their products and services.

Life is not easy. Parenting is even more difficult. So what does getting 'real' mean? It's being honest about the guilt, inadequacy and judgment felt by parents all over. It's hard to get 'real' about how we feel, but when we do, it's easier to see that we are not alone in our struggles. It's okay to admit we are not perfect; that we are, in fact, full of error. By doing this, our guilt, inadequacy and judgment can be shed. It's Okay: Let's Get Real About This Thing We Call Parenting is a compilation of a 100 stories shared by over 40 contributors. These stories are real. They are honest. And ... some of them are quite funny. This book is intended to make readers see that sometimes life is not all roses. We will at times mess-up. We will at times fail. In the end, though, most things turn out okay! Many brave souls contributed the stories shared throughout the book. These stories reveal our most human moments as parents; they range from vulnerable to joyful and everything in between. These are stories that often go untold and stories that took courage to share. In reading about these parenting moments you will be provided some reassurance that you are definitely NOT alone in your parenting journey. You will also be provided some peace over difficult times you've had in the past or struggles lurking in your future. Be prepared to laugh, cry, commiserate and empathize with your fellow parents! While this book is focused on the journey of parenting, the concepts within can be applied to the basic 'life' journey we all live as well. Before the stories begin, there is a 'Points to Ponder' section that addresses areas in life that can be most difficult: feeling judged, comparing yourself to others, living in regret, wishing for something better, understanding a life with balance, etc. It's Okay: Let's Get Real About This Thing We Call Parenting is not meant to be a 'how to' guide. It does not offer answers for how to fix the world's great challenge of parenting. Rather, it offers affirmation for the perplexing job parents do daily. It mocks the idea that there is a perfect way to live your life, raise your kids or fix every issue under the sun. We all have issues. We all struggle. It's more about the idea that people will take their issues and struggles and share them. Learn from them. Be better because of them. One of the editors of this book referred to the revealed content as, "booze for the self-conscience." While it is not okay to abuse drugs or alcohol, neglect or physically abuse your children, or purposefully do harm to others—it is okay to have a bad day. It is okay to admit to failure and that you can do better. Those things are all okay! By reading this book, you will quit beating yourself up for the minor set-backs that challenge you daily. You will see that you are not alone in your struggles. You, too, will be convinced that 'It's Okay'. Plus, you will get a great chuckle along the way. It's Okay.

Drawing on his personal fascinating story as a prosecutor, a defendant, and an observer of the legal process, Paul Butler offers a sharp and engaging critique of our criminal justice system. He argues against discriminatory drug laws and excessive police power and shows how our policy of mass incarceration erodes communities and perpetuates crime. Controversially, he supports jury nullification—or voting “not guilty” out of principle—as a way for everyday people to take a stand against unfair laws, and he joins

with the “Stop Snitching” movement, arguing that the reliance on informants leads to shoddy police work and distrust within communities. Butler offers instead a “hip hop theory of justice,” parsing the messages about crime and punishment found in urban music and culture. Butler’s argument is powerful, edgy, and incisive.

In the end, the path to self-empowerment is something we each have to determine for ourselves. The journey that follows reflects what worked for me—it’s no more or less than one person’s application of the mindset this book explores. We can each achieve success in our own way and express the best of who we are. I hope you’ll see parts of yourself in this book and find ways to redraw or enhance your road map to personal contentment. Let’s get it!

A Most-Anticipated Book of 2021: BuzzFeed * The Millions * Cosmopolitan * Electric Literature * LGBTQ Reads * Paperback Paris One of Advocate’s “22 LGBTQ+ Books You Absolutely Need to Read This Year” “An intimate saga that brims with necessary conversations about cultural identity.” —O, The Oprah Magazine, “32 LGBTQ Books That Will Change the Literary Landscape in 2021” It is 2015, weeks after the Supreme Court marriage equality ruling, and all Sebastian Mote wants is to settle down. A high school art history teacher, newly single and desperately lonely, he envies his queer students their freedom to live openly the youth he lost to fear and shame. When he runs into his childhood friend Oscar Burnham at a wedding in Washington, D.C., he can’t help but see it as a second chance. Now thirty-five, the men haven’t seen each other in more than a decade. But Oscar has no interest in their shared history, nor in the sense of belonging Sebastian craves. Instead, he’s outraged by what he sees as the death of gay culture: bars overrun with bachelorette parties, friends coupling off and having babies. For Oscar, conformity isn’t peace, it’s surrender. While Oscar and Sebastian struggle to find their place in a rapidly changing world, each is drawn into a cross-generational friendship that treads the line between envy and obsession: Sebastian with one of his students, Oscar with an older icon of the AIDS era. And as they collide again and again, both men must reckon not just with one another but with themselves. Provocative, moving, and rich with sharply drawn characters, Let’s Get Back to the Party introduces an exciting and contemporary new talent.

This new book is a vital resource for any teacher or administrator to help students tackle issues of race, class, gender, religion, and cultural background. Authors Martha Caldwell and Oman Frame, both lifelong educators, offer a series of teaching strategies designed to encourage conversation and personal reflection, enabling students to think creatively, rather than stereotypically, about difference. Using the Transformational Inquiry model, your students will learn to explore their own identities, share stories and thoughts with their peers, learn more through reading and research, and ultimately take personal, collaborative action to affect social change in their communities. You'll learn how to: Facilitate dynamic classroom discussions in a safe and empathetic environment Encourage students to think and talk objectively about complex and sensitive issues such as race, gender, and social class Help students cultivate valuable communication, critical thinking, and writing skills while developing their identities in a healthy way. Develop your teacher identity in a positive way to better support your students' growth and self-discovery The strategies in this book can be adapted for any middle school or high school curriculum, and each chapter includes a variety of lesson plans and handouts that you can use in the classroom immediately. These resources can also be downloaded from the authors' website: www.ichangecollaborative.com.

Today more than ever, the biggest thing that separates you from your competitors is you. According to Thomas A. Freese, whose Question-Based Selling system has been adopted and implemented by thousands of salespeople in companies all over the world, YOU are the biggest differentiator between you and your competitors. Given the current business climate, sellers should no longer count on their product or service to sell itself because their toughest competitors are out there with similar products they claim are better. Instead, it's more likely that in closely contested sales, the decision will come down to whichever salesperson offers the best service, is the most responsive, or displays any number of other highly intangible attributes, such as credibility, expertise, helpfulness, and integrity. The challenge for sellers is to convey these qualities in a way that promises value to customers. Freese explains how to maximize a value proposition and ultimately win more sales through strategies that include: ? managing conversational dynamics ? influencing the customer's buying criteria ? justifying costs ? creating curiosity about your product Wake up someone's brain with every turn of the page in this delightfully engaging resource. Featuring evocative images of children, this picture book for adults is to be shared between a family (or professional) caregiver and a person with memory loss to encourage meaningful emotional connections and conversations through therapeutic brain stimulation. Research demonstrates that sensory integration in the brain reinforces and excites neural connections. Using the principles of sensory integration, occupational therapist Rae-Lynn Ziegler presents photographs that trigger multiple and varied sensory reactions: visual, auditory, tactile, olfactory, gustatory, and vestibular and proprioceptive (motion and movement). Tested with people with middle to late Alzheimer's disease, Ziegler's work demonstrates that spending time with an interactive picture book can help keep people with memory loss connected and engaged.

A love-seeking mechanic, a dramatic petty thief, a disappointed planner, and a broken-hearted teen all find their lives transformed as each shares whirlwind adventures with a girl in an insanely red car.
