But when Vaselinetjie is ten years old, two officials from Welfare step in and she is sent away to a boarding school in Gauteng - the orphanage where Madiba's reject children have to live. It's a strange, hard, dangerous world of scum children, bad-tempered matrons and a harsh, unfair principal; a world of smoking cigarette butts, having one's hair shaved off and making plans to run away. From Power Sharing to Democracy examines the theoretical underpinnings of power sharing as a means of achieving sustainable democratic governance. Contributors examine key areas, including Afghanistan, Cyprus, Kosovo, Macedonia, and South Africa, where power-sharing constitutions and political institutions have been employed or proposed. They provide an in-depth exploration of consociationalism, under which the previously warring ethnic communities are guaranteed a proportionate share of political offices and protection of their vital interests, and federalism, which provides for substantial territorial autonomy in cases where the communities are territorially segregated.

Networked learning is learning in which information and communications technology (ICT) is used to promote connections: between one learner and other learners; between learners and tutors; between a learning community and its learning resources. Networked learning is an area which has great practical and theoretical importance. It is a rapidly growing area of educational practice, particularly in higher education and the corporate sector. This volume brings together some of the best research in the field, and uses it to signpost some directions for future work. The papers in this collection represent a major contribution to our collective sense of recent progress in research on networked learning. In addition, they serve to highlight some of the largest or most important gaps in our understanding of students' perspectives on networked learning, patterns of interaction and online discourse, and the role of contextual factors. The range of topics and methods addressed in these papers attests to the vitality of this important field of work. More

significant yet is the complex understanding of the field that they combine to create. In combination, they help explain some of the key relationships between teachers' and learners' intentions and experiences, the affordances of text-based communications technologies and processes of informed and intelligent educational change.

"Set on the campus of a Nigerian university, Double Yoke tells the story of Nko and Ete Kamba, a young undergraduate couple that must confront the conflicting demands of tradition and modernity. Nko pursues an education despite the resistance and rigid attitudes of those, like her husband, who feel that a woman's identity is defined through marriage. Her desire for an education severely tests her husband's love for her, and they both struggle with choices that are neither clear-cut nor perfect. Nko must further contend with unscrupulous professors who attempt to take advantage of her tenuous role as a woman in a male-dominated environment. In Double Yoke, Emecheta candidly portrays the status of women in emerging African nations and captures the urgency and complexity of the dilemmas they face."--Back cover.
