

Lexis And Creativity In Translation A Corpus Based Approach

Sara Laviosa

Lexis and Creativity in Translation Dorothy Kenny, 2014-04-08 Computers offer new perspectives in the study of language, allowing us to see phenomena that previously remained obscure because of the limitations of our vantage points. It is not uncommon for computers to be likened to the telescope, or microscope, in this respect. In this pioneering computer-assisted study of translation, Dorothy Kenny suggests another image, that of the kaleidoscope: playful changes of perspective using corpus-processing software allow textual patterns to come into focus and then recede again as others take their place. And against the background of repeated patterns in a corpus, creative uses of language gain a particular prominence. In *Lexis and Creativity in Translation*, Kenny monitors the translation of creative source-text word forms and collocations uncovered in a specially constructed German-English parallel corpus of literary texts. Using an abundance of examples, she reveals evidence of both normalization and ingenious creativity in translation. Her discussion of lexical creativity draws on insights from traditional morphology, structural semantics and, most notably, neo-Firthian corpus linguistics, suggesting that rumours of the demise of linguistics in translation studies are greatly exaggerated. *Lexis and Creativity in Translation* is essential reading for anyone interested in corpus linguistics and its impact so far on translation studies. The book also offers theoretical and practical guidance for researchers who wish to conduct their own corpus-based investigations of translation. No previous knowledge of German, corpus linguistics or computing is assumed.

Corpus Use and Translating Allison Beeby, Patricia Rodríguez Inés, Pilar Sánchez-Gijón, 2009 Professional translators are increasingly dependent on electronic resources, and trainee translators need to develop skills that allow them to make the best use of these resources. The aim of this book is to show how CULT (Corpus Use for Learning to Translate) methodologies can be used to prepare learning materials, and how novice translators can become autonomous users of corpora. Readers interested in translation studies, translator training and corpus linguistics will find the book particularly useful. Not only does it include practical, technical advice for using and learning to use corpora, but it also addresses important issues such as the balance between training and education and how CULT methodologies reinforce student autonomy and responsibility. Not only is this a good introduction to CULT, but it also incorporates the latest developments in

this field, showing the advantages of using these methodologies in competence-based learning.

Parallel Corpora for Contrastive and Translation Studies Irene Doval, M. Teresa Sánchez Nieto, 2019-03-20 This volume assesses the state of the art of parallel corpus research as a whole, reporting on advances in both recent developments of parallel corpora - with some particular references to comparable corpora as well- and in ways of exploiting them for a variety of purposes. The first part of the book is devoted to new roles that parallel corpora can and should assume in translation studies and in contrastive linguistics, to the usefulness and usability of parallel corpora, and to advances in parallel corpus alignment, annotation and retrieval. There follows an up-to-date presentation of a number of parallel corpus projects currently being carried out in Europe, some of them multimodal, with certain chapters illustrating case studies developed on the basis of the corpora at hand. In most of these chapters, attention is paid to specific technical issues of corpus building. The third part of the book reflects on specific applications and on the creation of bilingual resources from parallel corpora. This volume will be welcomed by scholars, postgraduate and PhD students in the fields of contrastive linguistics, translation studies, lexicography, language teaching and learning, machine translation, and natural language processing.

Corpora in Translation and Contrastive Research in the Digital Age Julia Lavid-López, Carmen Maíz-Arévalo, Juan Rafael Zamorano-Mansilla, 2021-12-15 Corpus-based contrastive and translation research are areas that keep evolving in the digital age, as the range of new corpus resources and tools expands, opening up to different approaches and application contexts. The current book contains a selection of papers which focus on corpora and translation research in the digital age, outlining some recent advances and explorations. After an introductory chapter which outlines language technologies applied to translation and interpreting with a view to identifying challenges and research opportunities, the first part of the book is devoted to current advances in the creation of new parallel corpora for under-researched areas, the development of tools to manage parallel corpora or as an alternative to parallel corpora, and new methodologies to improve existing translation memory systems. The contributions in the second part of the book address a number of cutting-edge linguistic issues in the area of contrastive discourse studies and translation analysis on the basis of comparable and parallel corpora in several languages such as English, German, Swedish, French, Italian, Spanish, Portuguese and Turkish, thus showcasing the richness of the linguistic diversity carried out in these recent investigations. Given the multiplicity of topics, methodologies and languages studied in the different chapters, the book will be of interest to a wide audience working in the fields of translation studies, contrastive linguistics and the automatic processing of language.

The Handbook of Translation and Cognition John W. Schwieter, Aline Ferreira, 2017-05-01 The Handbook of Translation and Cognition is a pioneering, state-of-the-art investigation of cognitive approaches to translation and interpreting studies (TIS). Offers timely and cutting-edge coverage of the most important theoretical frameworks and

methodological innovations Contains original contributions from a global group of leading researchers from 18 countries Explores topics related to translator and workplace characteristics including machine translation, creativity, ergonomic perspectives, and cognitive effort, and competence, training, and interpreting such as multimodal processing, neurocognitive optimization, process-oriented pedagogies, and conceptual change Maps out future directions for cognition and translation studies, as well as areas in need of more research within this dynamic field

The Routledge Handbook of Corpus Translation Studies Defeng Li,John Corbett,2024-10-28 This Handbook offers a comprehensive grounding in key issues of corpus-informed translation studies, while showcasing the diverse range of topics, applications, and developments of corpus linguistics. In recent decades there has been a proliferation of scholarly activity that applies corpus linguistics in diverse ways to translation studies (TS). The relative ease of availability of corpora and text analysis programs has made corpora an increasingly accessible and useful tool for practising translators and for scholars and students of translation studies. This Handbook first provides an overview of the discipline and presents detailed chapters on specific areas, such as the design and analysis of multilingual corpora; corpus analysis of the language of translated texts; the use of corpora to analyse literary translation; corpora and critical translation studies; and the application of corpora in specific fields, such as bilingual lexicography, machine translation, and cognitive translation studies. Addressing a range of core thematic areas in translation studies, the volume also covers the role corpora play in translator education and in aspects of the study of minority and endangered languages. The authors set the stage for the exploration of the intersection between corpus linguistics and translation studies, anticipating continued growth and refinement in the field. This volume provides an essential orientation for translators and TS scholars, teachers, and students who are interested in learning the applications of corpus linguistics to the practice and study of translation.

Advances in Discourse Analysis of Translation and Interpreting Binhua Wang,Jeremy Munday,2020-10-22 This edited thematic collection features latest developments of discourse analysis in translation and interpreting studies. It investigates the process of how cultural and ideological intervention is conducted in translation and interpreting using a wide array of discourse analysis and systemic functional linguistic approaches and drawing on empirical data from the Chinese context. The book is divided into four main sections: I. uncovering positioning and ideology in interpreting and translation, II. linking linguistic approach with socio-cultural interpretation, III. discourse analysis into news translation and IV. analysis of multimodal and intersemiotic discourse in translation. The different approaches to discourse analysis provide a much-needed contribution to the field of translation and interpreting studies. This combination of discourse analysis and corpus analysis demonstrates the interconnectedness of these fields and offers a rich source of conceptual and methodological tools. This book will appeal to scholars and research students in translation and interpreting studies, cross-linguistic discourse analysis and Chinese studies.

Of Mind and Machine Chunshen Zhu, Chengzhi Jiang, 2024-06-28 *Of Mind and Machine* provides a broad perspective on multi-level dialogic engagements between text and reader as seen from the use of language in presenting information to generate a discursive experience in various sociocultural settings. The book observes contexts such as national literature in translation, diplomatic speech events, visual-verbal inter-semiotic translation, second language learning, interpreter training, and computer-aided teaching of translation and bilingual writing. These present a unifying interest in textual accountability between form, function, and effect that has been examined from a dual perspective of rhetoric and pragmatics. The research embodies a significant prospect of integration of academic originality with technological innovation to advance language education in the present digital era. Theoretically well-founded, the book does not confine itself to a self-contained system of conceptions and methods. Instead, it demonstrates a rich variety of research possibilities in support of theorisation and education in the field of language and translation studies. This edited volume is primarily intended for advanced undergraduates, postgraduates, researchers, and teachers within the fields of language and translation, applied linguistics, and discourse analysis.

Language, Corpora, and Technology in Applied Linguistics Muhammad Afzaal, Swaleha Bano Naqvi, Geng Qiang, 2023-11-27 As culture and society has become more digitalized, especially when computer science and digital technologies have entered a new era in the twenty-first century, translation studies began to utilize a wide range of tools to enhance its reading of texts and contexts, without which translation both as a practice and as a theorization could barely persist. It has become more apparent that two extreme poles between macro and micro visions have formed the diversified terrains of translation studies. On the one hand, technologies like NLP, topic modeling, network analysis and data visualization make distant reading become possible, thus allowing us to have a paradigmatic view of how human's ideas, beliefs, values, knowledge and even emotions have spread in some patterns across cultural, geographical and language divides in world history. On the other hand, corpus methods, such as the use of keywords, collocates and concordance lines changed the way by which texts were closely read from linear to vertical. With microscope like corpus tools, we could go deeper into the texture for perception of nuanced meaning. While considering a fact that translation is seldom mono modal in conveying meaning, we have to reconceptualize context as a multimodal environment where audio, visual and other resources interact to convey and make meaning. With regard to the fast development of digital technology, translation studies take an active role in gaining an enhanced capability in promoting transformation. Complexity has been favored in terms of theoretical framework and methodology. New questions are asked; old ones revisited with novel tools; but more areas wait to be cultivated and more questions to be approached by combining quantitative and qualitative methods. We could ask if digital technologies would bring new innovation to study of translation history, a heavily-walled land for traditional humanists who tend to repeat "so-what" to question the less significance of data-driven studies. The idea of high-

quality machine translation has become so realistic in today's market that translation educators have to face the shock wave it brought to translation learners and practitioners and rethink the relation between human translators and algorithms. Machine-translation-assisted communication could help remove boundaries for better communication; but at the same time, it also creates conflicts and leads to confrontation. Thus understood, it is imperative to give a concerned attention to digital translation studies, that is, to study translation by resorting to and drawing on the digital technologies. This Research Topic is intended to promote current directions and new developments in cross-disciplinary critical discourse research. We welcome papers which, from a critical-analytical perspective, deal with contemporary social, scientific, political, economic, or professional discourses and genres. Papers addressing the highlighted topics are especially welcome. In giving weight to these topics, we wish to call to attention some of the most pressing problems currently facing the world.

Corpora in Translation Tengku Sepora Tengku Mahadi, Helia Vaezian, Mahmoud Akbari, 2010 Corpora are among the hottest issues in translation studies affecting both pure and applied realms of the discipline. As for pure translation studies, corpora have done their part through contributions to the studies on translational language and translation universals. Yet, their recent contribution is within the borders of applied translation studies, i.e. translator training and translation aids. The former is the major focus of the present book. The present book in fact aims at providing readers with comprehensive information about corpora in translation studies in general, and corpora in translator education in particular. It further offers researchers and practitioners a comprehensive and up-to-date survey of studies done on corpora in translator education and provides a rich source of information on pros and cons of using different types of corpora as translation aids in the context of translation classrooms.

Training for Doctoral Research J IAN Mason, 2009-01-30 Following the rapid expansion of translation studies as an emergent (inter-)discipline over recent decades, demand for doctoral research opportunities is now growing fast in many countries. At the same time, doctoral training packages of a generic nature have been elaborated and refined at many universities, drawing on long traditions of doctoral research in established disciplines. A degree of consensus no doubt exists on such matters as the need for rigor, method and the generation of new knowledge. Beyond that, however, there are a host of issues specific to translation and interpreting studies that remain under-researched and under-discussed. Contributors to this special issue encourage reflection on a range of issues in ways that foster further debate and collaboration on the development of doctoral studies within the field. A number of concrete proposals are offered that could be adapted to local situations in different countries and academic settings. While some of the contributions adopt a mainly empirical stance, others adopt a broad perspective on training, citing examples of widely differing projects. Two contributors offer insights from personal experience of doctoral study while another describes the organization of doctoral work within the conceptual framework of a research group. All consider training from the angle of student needs and offer concrete suggestions for

ensuring that doctoral candidates are equipped with the guidance, concepts, methods and tools required for success.

The Routledge Handbook of Corpus Linguistics Anne O'Keeffe, Michael McCarthy, 2010-04-05 The Routledge Handbook of Corpus Linguistics provides a timely overview of a dynamic and rapidly growing area with a widely applied methodology. Through the electronic analysis of large bodies of text, corpus linguistics demonstrates and supports linguistic statements and assumptions. In recent years it has seen an ever-widening application in a variety of fields: computational linguistics, discourse analysis, forensic linguistics, pragmatics and translation studies. Bringing together experts in the key areas of development and change, the handbook is structured around six themes which take the reader through building and designing a corpus to using a corpus to study literature and translation. A comprehensive introduction covers the historical development of the field and its growing influence and application in other areas. Structured around five headings for ease of reference, each contribution includes further reading sections with three to five key texts highlighted and annotated to facilitate further exploration of the topics. The Routledge Handbook of Corpus Linguistics is the ideal resource for advanced undergraduates and postgraduates.

Using Corpora in Contrastive and Translation Studies Richard Xiao, 2020-06-12 The corpus-based approach has developed into a well established paradigm in translation studies and has been recognised as a principal reason for the revival of contrastive linguistics since the 1990s, while corpus-based contrastive and translation studies have in turn significantly expanded the scope of corpus linguistics. This book features a selection of twenty-three papers from the 2008 meeting of Using Corpora in Contrastive and Translation Studies (UCCTS), an international conference series launched to provide an international forum for the exploration of theoretical and practical issues pertaining to the creation and use of corpora in contrastive and translation studies. The papers in this collection represent the latest developments in corpus-based translation studies, corpus-based contrastive studies, parallel corpus development and bilingual lexicography. They are useful resources for researchers as well as postgraduates and their supervisors in translation studies, comparative and contrastive linguistics, corpus linguistics, and computational linguistics.

The Routledge Handbook of Translation Studies Carmen Millán, Francesca Bartrina, 2013-03-05 The Routledge Handbook of Translation Studies provides a comprehensive, state-of-the-art account of the complex field of translation studies. Written by leading specialists from around the world, this volume brings together authoritative original articles on pressing issues

including: the current status of the field and its interdisciplinary nature the problematic definition of the object of study the various theoretical frameworks the research methodologies available. The handbook also includes discussion of the most recent theoretical, descriptive and applied research, as well as glimpses of future directions within the field and an extensive up-to-date bibliography. The Routledge Handbook of Translation Studies is an indispensable resource for postgraduate students of translation studies.

Form, Meaning and Function in Collocation Haoda Feng, 2020-04-03 The issue of differences between translational language and native-speaker language has become a topic of increasing interest in linguistics and Translation Studies (TS). One of the primary tasks in this research area is to employ a corpus approach and analyse collocations with authentic language data by comparing comparable corpora consisting of translated and native-speaker texts. Collocation in linguistics and TS refers to the relationship of co-occurrence between lexical items. The book shows that examining the use of collocations constitutes an integral part in assessing the naturalness of second language (L2) use, and therefore can be a valid measure to make a distinction between translational language and native-speaker language. Nevertheless, the role of collocation has not been given enough attention or discussed systematically in TS and, to date, there are hardly any translation theorists who have clarified the mechanism of collocation in TS, by which translators acquire receptive and productive knowledge of collocations in their L2. In addition, previous research in this area is largely confined to Indo-European languages, resulting in a lack of empirical evidence involving Asian languages. This book therefore attempts to bridge the gap in the literature and constitute an integral part in the research area.

Corpus Stylistics in Heart of Darkness and its Italian Translations Lorenzo Mastropierro, 2017-11-16 This book explores the interaction between corpus stylistics and translation studies. It shows how corpus methods can be used to compare literary texts to their translations, through the analysis of Joseph Conrad's Heart of Darkness and four of its Italian translations. The comparison focuses on stylistic features related to the major themes of Heart of Darkness. By combining quantitative and qualitative techniques, Mastropierro discusses how alterations to the original's stylistic features can affect the interpretation of the themes in translation. The discussion illuminates the manipulative effects that translating can have on the reception of a text, showing how textual alterations can trigger different readings. This book advances the multidisciplinary dialogue between corpus linguistics and translation studies and is a valuable resource for students and researchers interested in the application of corpus approaches to stylistics and translation.

Technology-Enhanced Language Learning for Specialized Domains Elena Martín-Monje, Izaskun Elorza, Blanca García Ríaza, 2016-03-10 Technology-Enhanced Language Learning for Specialized Domains provides an exploration of the latest developments in technology-enhanced learning and the processing of languages for specific purposes. It combines theoretical and applied research from an interdisciplinary angle, covering general issues related to learning languages with

computers, assessment, mobile-assisted language learning, the new language massive open online courses, corpus-based research and computer-assisted aspects of translation. The chapters in this collection include contributions from a number of international experts in the field with a wide range of experience in the use of technologies to enhance the language learning process. The essays have been brought together precisely in recognition of the demand for this kind of specialised tuition, offering state-of-the-art technological and methodological innovation and practical applications. The topics covered revolve around the practical consequences of the current possibilities of mobility for both learners and teachers, as well as the applicability of updated technological advances to language learning and teaching, particularly in specialized domains. This is achieved through the description and discussion of practical examples of those applications in a variety of educational contexts. At the beginning of each thematic section, readers will find an introductory chapter which contextualises the topic and links the different examples discussed. Researching Translation in the Age of Technology and Global Conflict Kyung Hye Kim, Yifan Zhu, 2019-11-20 Mona Baker is one of the leading figures in the development of translation studies as an academic discipline. This book brings together fifteen of her most influential articles, carefully selected and grouped under three main topics that represent her most enduring contributions to the field: corpus-based translation studies, translation as renarration and translators in society. These applications and approaches have been widely adopted by translation scholars around the globe. The first section showcases Baker's pioneering work in introducing corpus linguistics methodologies to the field of translation studies, which established one of the fastest growing subfields in the discipline. The second section focuses on her application of narrative theory and the notion of framing to the study of translation and interpreting, and her contribution to demonstrating the various ways in which translators and interpreters intervene in the negotiation of social and political reality. The third and final section discusses the role of translators and interpreters as social and political activists who use their linguistic skills to empower voices made invisible by the global power of English and the politics of language. Tracing key moments in the development of translation studies as a discipline, and with a general introduction by Theo Hermans and section introductions by other scholars contextualising the work, this is essential reading for translation studies scholars, researchers and advanced students.

Insights Into Specialized Translation Maurizio Gotti, Susan Šarčević, 2006 This volume focuses on specialist translation - one of the areas of translation in greatest demand in our age of globalization. The 16 chapters deal not only with the classical domains of science and technology, law, socio-politics and medicine but also with lesser researched areas such

as archeology, geography, nutrigenomics and others. As a whole, the book achieves a blend of theory and practice. It addresses a variety of issues such as translation strategy based on text type and purpose, intercultural transfer and quality assessment, as well as textual and terminological issues in bilingual and multilingual settings, including international organizations and the European Union. Today translation competence presupposes multidisciplinary skills. Whereas some chapters analyze the linguistic features of special-purpose texts and their function in specialized communication, others show how specialized translation has changed as a result of globalization and how advances in technology have altered terminology research and translation processing.
