This book explores intersectional constructions of race and whiteness in modern and contemporary Italy. It contributes to transnational and interdisciplinary reflections on these issues through an analysis of political debates and social practices, focusing in particular on visual materials from the unification of Italy (1861) to the present day. Giuliani draws attention to rearticulations of the transnationally constructed Italian 'colonial archive' in Italian racialised identity-politics and cultural racisms across processes of nation building, emigration, colonial expansion, and the construction of the first post-fascist Italian society. The author considers the 'figures of race' peopling the Italian colonial archive as composing past and present ideas and representations of (white) Italianness and racialised/gendered Otherness. Students and scholars across a range of disciplines, including Italian studies, political philosophy, sociology, history, visual and cultural studies, race and whiteness studies and gender studies, will find this book of interest.

"Passionate and emotional story of an Italian looking for his father who died on the island of Kefalonia during the Second World War. Intense journey in search of the why of one of the blackest pages in history."--Goodreads

Follows the differing opinions and interpretations of Leonardo da Vinci since the sixteenth century.

Milan was one of the largest and most important cities in Renaissance Italy. Controlled by the Visconti and Sforza dynasties from 1277 until 1500, its rulers were generous patrons of the arts, responsible for commissioning major monuments throughout the city and for supporting artists such as Giovanni di Balduccio, Filarete, Bramante and Leonardo da Vinci. But the city was much more than its dukes. Milan had a distinct civic identity, one that was expressed, above all, through its neighbourhood, religious and charitable associations. This book moves beyond standard interpretations of ducal patronage to explore the often overlooked city itself, showing how the allegiances of the town hall and the parish related to those of the servants and aristocrats who frequented the Visconti and Sforza court. In this original and stimulating interdisciplinary study, Evelyn Welch illustrates the ways in which the myths of Visconti and Sforza supremacy were created. Newly discovered material for major projects such as the cathedral, hospital and castle of Milan permits a greater understanding of the political, economic and architectural forces that shaped these extraordinary buildings. The book also explores the wider social networks of the artists themselves. Leonardo da Vinci, for example, is de-mythologised: far from being an isolated, highly prized court artist, he spent his almost eighteen years in the city working within the wider Milanese community of painters, sculptors, goldsmiths and embroiderers. The broad perspective of the book ensures that any future study of the Renaissance will have to re-evaluate the place of Milan in Italian cultural history. (Musicians Institute Press). Music in the Galant Style is an authoritative and readily understandable study of the core compositional style of the eighteenth century.

Gjerdingen adopts a unique approach, based on a massive but little-known corpus of pedagogical workbooks used by the most influential

teachers of the century, the Italian partimenti. He has brought this vital repository of compositional methods into confrontation with a set of schemata distilled from an enormous body of eighteenth-century music, much of it known only to specialists, formative of the "galant style." An invention of the Industrial Revolution, the accordion provided the less affluent with an inexpensive, loud, portable, and durable "one-man-orchestra" capable of producing melody, harmony, and bass all at once. This rich collection considers the accordion and its myriad forms, from the concertina, button accordion, and piano accordion familiar in European and North American music to the more exotic-sounding South American bandoneón and the sanfoninha. Capturing the instrument's spread and adaptation to many different cultures in North and South America, contributors illuminate how the accordion factored into power struggles over aesthetic values between elites and working-class people who often were members of immigrant and/or marginalized ethnic communities. Specific histories and cultural contexts discussed include the accordion in Brazil, Argentine tango, accordion traditions in Colombia and the Dominican Republic, cross-border accordion culture between Mexico and Texas, Cajun and Creole identity, working-class culture near Lake Superior, the virtuoso Italian-American and Klezmer accordions, Native American dance music, and American avant-garde. Contributors are María Susana Azzi, Egberto Bermúdez, Mark DeWitt, Joshua Horowitz, Sydney Hutchinson, Marion Jacobson, James P. Leary, Megwen Loveless, Richard March, Cathy

Imported from Europe into the Americas, the accordion with its distinctive sound became a part of the aural landscape for millions of people but proved to be divisive: while the accordion formed an integral part of working-class musical expression, bourgeois commentators often derided it as vulgar and tasteless. Artist and scientist, draughtsman and inventor, these were the varied occupations of Leonardo. Carlo Pedretti concentrates on the paintings and drawings and tackles the problem of their complexity by tracing chronologically a number of the themes that run through Leonardo's work.--[book jacket].

From an "imaginatively twisted and fearless" writer (Los Angeles Times), a hilarious memoir of middle age. In a voice that is wry, disarming, and totally candid, Sandra Tsing Loh tells the moving and laugh-out-loud tale of her roller coaster through "the change." This is not your grandmother's menopause story. Loh chronicles utterly relatable, everyday perils: raising preteen daughters, weathering hormonal changes, and the ups and downs of a career and a relationship. She writes also about an affair and the explosion of her marriage, while managing the legal and marital hijinks of her eighty-nine-year-old dad. The upbeat conclusion: it does get better.

THIS EDITION HAS BEEN REPLACED BY A NEWER EDITION From about 1880 to World War I, sweeping changes in technology and culture created new modes of understanding and experiencing time and space. Stephen Kern writes about the onrush of technics that reshaped life concretely--telephone, electric lighting, steamship, skyscraper, bicycle, cinema, plane, x-ray, machine gun--and the cultural innovations that shattered older forms of art and thought--the stream-of-consciousness novel, psychoanalysis, Cubism, simultaneous poetry, relativity, and the introduction of world standard time. Kern interprets this generation's revolutionized sense of past, present, and future, and of form, distance, and direction. This overview includes such figures as Proust Joyce, Mann, Wells, Gertrude Stein, Strindberg, Freud, Husserl, Apollinaire, Conrad, Picasso, and Einstein, as well as diverse sources of popular culture drawn from journals, newspapers, and magazines. It also treats new developments in personal and social relations including scientific management, assembly lines, urbanism, imperialism, and trench warfare. While exploring transformed spatial-temporal dimensions, the book focuses on the way new sensibilities subverted traditional values. Kern identifies a broad leveling of cultural hierarchies such as the Cubist breakdown of the conventional distinction between the prominent subject and the framing background, and he argues that these levelings parallel the challenge to aristocratic society, the rise of democracy, and the death of God. This entire reworking of time and space is shown finally to have influenced the conduct of diplomacy during the crisis of July 1914 and to have structured the Cubist war that followed.
