Adapt traditional library techniques to the task of indexing, cataloging, and metadata creation for Internet resources! The rapid shift toward digital resources in K-6, higher education, adult education, and other learning communities, has greatly increased the demand on the information professionals to manage this new technology. Metadata and Organizing Educational Resources on the Internet, the first book of its kind, helps clarify the process of cataloging and indexing the vast quantities of data available in digital form, so that users can readily access the information they need. This comprehensive volume documents the experiences of metadata creators (both catalogers and indexers), library administrators, and educators who are actively engaged in projects that organize Internet resources for educational purposes. Metadata and Organizing Educational Resources on the Internet shares the problems the authors encountered in the far-reaching project of creating metadata for a new class of resource, as well as the solutions and options they found. Tackling the salient issues of cataloging and indexing, Metadata and Organizing Educational Resources on the Internet: examines the status quo of cataloging Internet resources explores the relationship between traditional cataloging practices and Internet cataloging introduces a number of educationally focused metadata schemes, including ARIADNE, GEM, and IMS examines theoretical and practice aspects of metadata in relation to today's evolving Internet-based educational terrain discusses specific projects, including ALADIN, PEN-DOR, the Schomburg Research Library, and a catalog of Greek sculpture fragments for the Perseus Project offers charts, figures, screen shots, and Web addresses for initiatives using metadata to facilitate access This is an exciting time to be involved with information services. Metadata and Organizing Educational Resources on the Internet presents the ideas and experiences of the pioneering librarians who are mapping the intricacies of the World Wide Web. Catalogers, indexers, content creators, librarians, and educators will profit from the information in this fascinating volume.

The International Conference on Asian Digital Libraries (ICADL) is an annual international forum that provides opportunities for librarians, researchers and experts to exchange their research results, innovative ideas, service experiences and state-of-the-art developments in the field of digital libraries. Building on the success of the first six ICADL conferences, the 7th ICADL conference hosted by the Shanghai Jiao Tong University and the Shanghai Library in Shanghai, China aimed to further strengthen the academic collaboration and strategic alliance in the Asia-Pacific Region in the development of digital libraries. The theme of ICADL 2004 was: Digital library: International Collaboration and Cross-fertilization, with its focus on technology, services, management and localization. The conference began with an opening ceremony and the conference program featured 9 keynote speeches and 5 invited speeches by local and international experts. During the 3-day program, 40 research paper presentations were given in 3 parallel sessions. The conference also included 6 tutorials and an exhibition. The conference received 359 submissions, comprising 248 full papers and 111 short papers. Each paper was carefully reviewed by the Program Committee members. Finally, 44 full papers, 15 short papers and 37 poster papers were selected. On behalf of the Organizing and Program Committees of ICADL 2004, we would like to express our appreciation to all authors and attendees for participating in the conference. We also thank the sponsors, Program Committee members, supporting organizations and helpers for making the conference a success. Without their efforts, the conference would not have been possible.

Clearly illustrated with examples of written work and useful interactive exercises, this guide will encourage independent learning, helping arts and humanities students to develop effective study habits and learn successful strategies for reading and writing about theoretical texts. The development of online digital libraries has enhanced the availability of printed materials. By implementing these systems, this ensures the access of material to universities, students, and bibliophiles. Digitizing the Modern Library and the Transition From Print to Electronic is a pivotal reference source for the latest techniques and initiatives needed to transition libraries into the digital age. Featuring extensive coverage on relevant areas such as electronic resource management, library management software, and semantic web, this publication is an ideal resource for faculty members, research scholars, students, information specialists, and librarians in universities and in academic, public, and special libraries.

Written by leading academics, this book is an invaluable 'how to ...' guide to studying for a Geography degree. Written in a practical and conversational style, it offers important insights into how to succeed in the first year of your degree course, covering everything from how to succeed in assessments to how to decide where to live. Some of the information the book provides is academic and some of it is non-academic, as negotiating both is important in order to be successful in the first year of a Geography degree. Studying Geography at University is ideal for those in the early stages of applying to university. Each chapter offers hints and tips and gives practical real-world insights into becoming a successful geography student that will enrich applications, open days and visit days. It is also possible to dip into the chapter summaries, 'What Do Students Say?' and 'Top Tip' boxes only. Written by current students, from a range of institutions, these provide unique insights into the book's key points. Current students should also keep and refer to the book as an invaluable guide through the first few months of their degree. This guide is a must-read for anyone starting their studies in Human Geography, Physical Geography, Environmental Science or any other related subject at university.

Digital libraries have been established worldwide to make information more readily available, and this innovation has changed the way information seekers interact with the data they are collecting. Faced with decentralized, heterogeneous sources, these users must be familiarized with high-level search activities in order to sift through large amounts of data. Information Seeking Behavior and Challenges in Digital Libraries addresses the problems of usability and search optimization in digital libraries. With topics addressing all aspects of information seeking activity, the research found in this book provides insight into library user experiences and human-computer interaction when searching online databases of all types. This book addresses the challenges faced by professionals in information management, librarians, developers, students of library science, and policy makers.

'An astute compilation of the university experience, made easily accessible to the reader, and lightened by the ability of a good storyteller. Within the book are tools to maximise and manage one's learning opportunities both in terms of objective skills and subjective psychological experiences, e.g., stress and anxiety. This is a book that has the potential to be useful throughout one's studies and to transform the university experience' - Brendan Bunting, Reader in Psychology, University of Ulster For those attending university for the first time, the demands made on them academically and socially can seem daunting. Studying at University aims to equip the student with strategies for making the most out of the experience from the moment they arrive until after they leave. Written with fresh insight for the contemporary student, the book addresses key issues such as: - adjusting to life at university - making presentations - working in small groups - library and computer resources - making the most from lectures and seminars - basic numeracy and statistics Studying at University also presents the student with new ways of learning. The author suggests ways of developing memory techniques as an aid for not just exams, but so that the student can reap the best rewards from the subject matter in hand. Ways of coping with exam and test anxieties are addressed, and a final section looks at preparing for job interviews after university life. Packed with illustrative material and practical exercises, Studying at University aims to enable the student to perform at their very best academically, and will be of value to all undergraduate students across the social sciences and humanities.

Does university seem like another planet? Does everyone else seem to speak another language? What can you do to make the grade? If these are the kind of questions you are asking, then this is the book you need. After the excitement of being accepted, the reality of life at university or college can be daunting, but help is at hand. This practical book guides new students through the terminology used at university and shows you: what a student needs to know how to be accepted by students and lecturers how to get the best out of your institution and yourself how to communicate using appropriate language in higher education institutions how to learn the conventions of your specific subject area how to be confident and competent in your new world All new students find the move to university slightly bewildering, but with this book you can be one step ahead. The author has spent time talking to students across a broad range of different universities and uses her first-hand experience as a basis for the book. Understanding University provides a lifeline for new students in further and higher education offering everything from practical advice on studying, to explanations of frequently used terms. If you don't know the difference between a seminar and a tutorial or want to know what 'matriculation' means, then this is where to start. Need a little assistance? Just open this book. And remember - you are not alone. As university student exchanges provide participants with increasing opportunities to involve themselves in different academic cultures, it has become crucial to gain a better understanding of cultural contact between academic systems and to recognise how exchange students with diverse academic backgrounds interact in a host academic context. This book provides insights into this research area by undertaking a one-academic-year ethnographic examination of six Japanese exchange students' management of intercultural academic interaction at an Australian university, as well as analysing the impact of the structural arrangements of the student exchange program on their participation. In this book, the theory of language management is utilised alongside of the concept of legitimate peripheral participation and a socio-constructionist genre theory to investigate the cognitive and situated nature of the management processes. The theory of language-in-education planning is also applied to examine the policies and practices of student exchanges between Japanese home universities and an Australian host university. Focussing on Japanese exchange students' responses to various academic tasks as well as on their everyday participation in class, the present study mainly analyses the students' negotiation of norms, awareness and evaluations of contact situation phenomena, planning and implementation of management strategies, discontinuation of academic management, and the developmental processes of their

academic participation. This study also investigates various types of tensions in structuring student exchanges among policies, practices, educational needs and goals of Japanese exchange students, their motivational investments, and accessibility of current exchange systems to the students. Based on the findings, this book provides important theoretical implications for sociolinguistic research and SLA studies by discussing the detailed mechanisms of academic management, and by reconsidering the importance of the integration of sociocultural perspectives into the cognitive processes of intercultural academic interaction. The theoretical inquiries which this study conducts will, furthermore, promote our understanding of linguistic minority exchange students' management of participation in various academic contexts and suggest the ways home and host universities support these exchange students' transition between the two different academic cultures.

Academic Culture introduces students to the demands of university study in a clear and accessible way, and helps them understand what is expected of them. Chapters equip students with the skills to recognise opinions, positions and bias in academic texts from a range of genres, think critically, develop their own 'voice', and refer to others' ideas in an appropriate way. Having established a foundation for successful university study, the final part provides guidance on approaching different forms of academic writing, including essays, reports, reflective assignments and exam papers. Featuring helpful 'word lists', examples, 'think about this' reflective prompts and 'skills practice' activities in each chapter, this bestselling book is an essential resource for all students new to university-level study. New to this Edition: - Contains three new chapters on reflective writing, writing lab reports, and writing in exams - Features additional material on paraphrasing and summarizing - Includes a new section on creating and maintaining an e-portfolio - New 'think about this' feature

Rex Knowland's life in 1970s Sydney, Australia, might at first sound appealing: He was a boxer, biker, and footballer who spent his time taking drugs, having sex and lots of fun. But after traveling the hippie trail throughout Asia, he ended up a heroin addict, which led him constantly needing his next fix. At times, he even contemplated robbery to get money to fund his addiction. He finally got clean after entering rehabilitation with the Salvation Army. In this cautionary tale, he outlines what led him down the path to addiction and how he beat the odds by living a successful second life as a high school teacher, rehabilitation centre director and a thirty three year career in the NSW Public Service. Whether you're battling an addiction or trying to help a loved one find a path that leads out of the darkness, you'll be inspired by the candid tale of recovery, redemption, and success in *To Hell with Smack*. Rex provides and insight into what it takes to achieve long term recovery from addiction.

The converged management of academic libraries and computer services emerged as a popular model in universities in the late 1980s. Today over half of the higher education sector in the UK has adopted a converged structure and yet there has been little analysis of this radical approach and what it means for the services involved. This timely book takes stock of some twenty years of experience of convergence. It explores management practice throughout the sector in order to assess how extensive the converged model has become, and what variations in the model exist: the reasons for converging - or de-converging, or deciding not to converge at all; the perceived advantages and disadvantages of the model adopted; and what lessons have been learned. Readership: This book is essential reading for all managers in academic libraries and computer service departments, and for all university staff with responsibility for policy in this area. Technology has revolutionized the ways in which libraries store, share, and access information, as well as librarian roles as knowledge managers. As digital resources and tools continue to advance, so too do the opportunities for libraries to become more efficient and house more information. Effective administration of libraries is a crucial part of delivering library services to patrons and ensuring that information resources are disseminated efficiently. *Digital Libraries and Institutional Repositories: Breakthroughs in Research and Practice* addresses new methods, practices, concepts, and techniques, as well as contemporary challenges and issues for libraries and university repositories that can be accessed electronically. It also addresses the problems of usability and search optimization in digital libraries. Highlighting a range of topics such as content management, resource sharing, and library technologies, this publication is an ideal reference source for librarians, IT technicians, academicians, researchers, and students in fields that include library science, knowledge management, and information retrieval.

This book constitutes the refereed proceedings of the 9th International Conference on Asian Digital Libraries, ICADL 2006, held in Kyoto, Japan in November 2006. The 46 revised full papers, 14 revised short papers, and 6 poster papers include coverage of information extraction, information retrieval, metadata, architectures for digital libraries and archives, ontologies, information seeking, cultural heritage and e-learning.

This book constitutes the refereed proceedings of the 6th International Conference on Asian Digital Libraries, ICADL 2003, held in Kuala Lumpur, Malaysia in December 2003. The 68 revised full papers presented together with 15 poster abstracts and 3 invited papers were carefully reviewed from numerous submissions. The papers are organized in topical sections on information retrieval techniques, multimedia digital libraries, data mining and digital libraries, machine architecture and organization, human resources and training, human-computer interaction, digital library infrastructure, building and using digital libraries, knowledge management, intellectual property rights and copyright, e-learning and mobile learning, data storage and retrieval, digital library services, content development, information retrieval and Asian languages, and metadata.

The contributions to the conference held in Geneva in 2003, focus on the very latest approaches to 'e-Learning'. The power and enormous diversity of this medium, becomes apparent as experts from all over the world compare notes and raise a whole new range of issues. The reader can examine the presentations of the various practitioners, or go straight to the discussions at the end, for insights into what the future holds for teachers and students alike.

Providing a thorough review of the concept of the Institutional Repository (IR) the book examines how they can be set up, maintained and embedded into general institutional working practice. Specific reference is made to capturing certain types of research material such as E-Theses and E-Prints and what the issues are with regard to obtaining the material, ensuring that all legal grounds are covered and then storing the material in perpetuity. General workflow and administrative processes that may come up during the implementation and maintenance of an IR are discussed. The authors notes that there are a number of different models that have been adopted worldwide for IR management, and these are discussed. Finally, a case study of the inception of the Edinburgh Research Archive is provided which takes the user through the long path from conception to completion of an IR, examining the highs and lows of the process and offering advice for other implementers. This allows the book the opportunity to introduce extensive practical experience in unexpected areas such as mediated

deposit. A comprehensive synthesis of the whole of the IR system – never before provided in other books The research results that it contains, are at the leading edge of this subject area Includes a comprehensive case study and examination of practical experience – never before provided in other books

This is the swashbuckling life story of one of Scotland's greatest sons. Ian Hamilton, born the son of a Paisley tailor in 1925, who made himself world-famous on Xmas Eve, 1950, when he helped to remove the Stone of Destiny from Westminster Abbey and return it to its spiritual home of Scotland. This symbolic act was to set Hamilton along a lonely path as a solitary Scottish patriot whose actions have always stemmed from his deep love of his native land. He has never taken the easy option and his remarkable biography recounts episodes which encompass his many abilities and talents. Although renowned as a Queen's Counsel, he has also been a publisher, printer, award-winning playwright, oyster farmer, pilot, museum curator and transatlantic yachtsman (failed). He was also the first man to canoe across Scotland. His legal responsibilities took him to countries as diverse as Canada and Zambia, from both of which he was expelled. First published in 1990 but now with a final chapter written in May 2014 and a foreword by socialist agitator and independence campaigner Tommy Sheridan, Ian's story is extremely pertinent in the run up to the independence referendum. This popular biography is a cry for Scottish identity at a turning point in the nation's history.

Salford's history is long and vibrant, although it wasn't given city status until 1926. It was the heartland of the Industrial Revolution and became famous for its silk and cloths. The building of the Manchester Ship Canal and the opening of the Salford Docks brought employment to the area for almost a century. During the 1960s and 1970s Salford underwent dramatic changes with the emergence of high-rise tower blocks and the gradual decline of the industries centred around the docklands. This period of decline left dramatic marks on Salford's industrial and cultural life. Salford's sporting history is as vibrant as its industrial with strong rugby league teams like the Salford City Reds. Although Salford does not have a professional football team of its own it does have a non-league club, Salford City F.C. Today the city has undergone another revolution with the exciting development of the Lowry Centre and surrounding docklands. Salford University is one of the most vibrant universities in the country. Once derelict mills are being converted into artists studios and modern apartment complexes. Salford Past is a pictorial history chronicling the dramatic changes the city has undergone throughout the decades. This is a unique collection of evocative images, many never previously published, from the archives of the Manchester Evening News. Whether you have lived in the Salford area, or are visiting, this book will present interesting views on this vibrant city.
