Every year, hundreds of thousands of California fourth-graders embark on a fascinating journey of discovery called The California Mission Project. This project introduces kids and their families to the life and work of the Franciscan priest and founder Junipero Serra, whose vision and leadership established what ultimately became a network of 21 missions (built between 1769 and 1823) that shaped the life of early California and a history and culture that thrives to the present day. On September 23rd, 2015, Pope Francis named Junipero Serra a saint--America's first Latino saint--calling him "one of the founding fathers of the United States and a special patron of the Hispanic people of the country." Award-winning writer and historian Gregory Orfalea offers this lively guide for students and their families to the life, missions and legacy of Junipero Serra. Beginning with Serra's birth in Mallorca, Spain, and tracing his exciting, danger-filled, journey of nearly 20,000 miles across sea and land--much of that on a painfully infected foot--Orfalea takes us step by step through the New World he helped to shape. Orfalea shows how a poor farmer's son became an inspired priest and explorer, standing as a leader seeking to protect California's Native Americans from the often brutal Spanish soldiers as he sought to bring them a better life. This guide will help students and their families understand Serra and his world as it guides them in their own discovery of California's historic missions. Advance Praise "Every California 4th grade teacher searches for ways to bring the story of the missions alive. Orfalea, the author of the breakthrough biography from Scribner, brings the story of Serra and the missions alive. Our 4th graders were gripped by the stories of Serra, celebrating his inspiration and courage, while showing his flaws in a sensitive way that respects our vital Native American heritage. Parents will be equally engaged by the guide to the California missions-it's truly a family read!"-Mark Palmerston, Executive Director, Santa Ynez (Public) Charter School "In writing about Junípero Serra, Gregory Orfalea brings substance and perspective to an accessible narrative about one of California's definitive historical figures. Combined with a thorough reference guide to celebrate each of the state's 21 missions, this book addresses Serra's role in shaping California's history with the type of skill and enthusiasm that will make it appealing to a wide variety of readers. Better than any other resource I know, Orfalea's book distills Serra's complicated story to a meaningful text for children without losing any of the nuance that makes it such a gripping tale."-Jason Ankowitz, Principal, Calthorp School, Santa Monica "Accessible to a wide range of readers, Orfalea's biography of America's newest saint acknowledges difficult issues while remaining appropriately family-friendly. Like biographers of old, Orfalea is ultimately most concerned about matters of character. His telling of Father Serra's life does justice both to the hardships that Serra faced, and the courage and deep faith that sustained his efforts."-Dr. Andrew Mullen, Professor of Education, Westmont College and Former Chair, Children's Book Council Committee on Notable Books in Social Studies "A Franciscan with an apostle's heart and a discoverer's spirit, St. Junípero Serra spent nearly 40 years in the mid-1700s spreading the Gospel, defending the native peoples, and laying the foundations for a vibrant civil society and Christian civilization, first in Mexico and later in California. Gregory Orfalea has long been one of our finest historians of the life and times of St. Junípero. His new book offers an excellent introduction that will be a great resource for parents, students, teachers - and will inspire all of us who seek to continue the mission of bringing God's mercy and love to the Americas."-Most Reverend José H. Gomez, Archbishop of Los Angeles

This original, eye-opening and thought provoking book traces the marginalization of California Indians within the California mission mythology and critiques the romanticized-narrative still presented today at many California mission sites as well as the manner by which the history of the missions is widely taught in Californias schools. Through case studies of topics including Native resistance, labor, death and disease, this work demonstrates the active roles Native people played in the development of California history alongside the fictionalized history that their mission experiences have been presented as.

"Nothing defines California and our nation's heritage as significantly or emotionally," says the California Mission Foundation, "as do the twenty-one missions that were founded along the coast from San Diego to Sonoma." Indeed, the missions collectively represent the state's most iconic tourist destinations and are touchstones for interpreting its history. Elementary school students today still make model missions evoking the romanticized versions of the 1930s. Does it occur to them or to the tourists that the missions have a dark history? California Mission Landscapes is an unprecedented and fascinating history of California mission landscapes from colonial outposts to their reinvention as heritage sites through the late nineteenth and twentieth

centuries. Illuminating the deeply political nature of this transformation, Elizabeth Kryder-Reid argues that the designed landscapes have long recast the missions from sites of colonial oppression to aestheticized and nostalgia-drenched monasteries. She investigates how such landscapes have been appropriated in social and political power struggles, particularly in the perpetuation of social inequalities across boundaries of gender, race, class, ethnicity, and religion. California Mission Landscapes demonstrates how the gardens planted in mission courtyards over the past 150 years are not merely anachronistic but have become potent ideological spaces. The transformation of these sites of conquest into physical and metaphoric gardens has reinforced the marginalization of indigenous agency and diminished the contemporary consequences of colonialism. And yet, importantly, this book also points to the potential to create very different visitor experiences than these landscapes currently do. Despite the wealth of scholarship on California history, until now no book has explored the mission landscapes as an avenue into understanding the politics of the past, tracing the continuum between the Spanish colonial period, emerging American nationalism, and the contemporary heritage industry.

Discusses the history of California missions, their dual purpose of converting people to Catholicism and consolidating Spanish territory, and the daily life of friars and natives.

In two centuries, La Purísima Concepción went from a fledgling frontier mission to a renowned California State Historic Park. Once home to many Spanish soldiers, settlers and hundreds of Chumash Indians, La Purísima held the seat of the California Mission government under Father Mariano Payeras. It withstood catastrophic events, including widespread disease in early years and a great Southern California earthquake in 1812. Emerging from ruins for the last time in 1934, after restoration by the Civilian Conservation Corps, structures appear today as they did in the early nineteenth century. The uniquely restored California Mission complex operates as a state park in a pastoral setting. Author and archivist Michael R. Hardwick chronicles the story of La Purísima and the resilient people and culture that made a lasting influence.

Indigenous Landscapes and Spanish Missions offers a holistic view on the consequences of mission enterprises and how native peoples actively incorporated Spanish colonialism into their own landscapes. An innovative reorientation spanning the northern limits of Spanish colonialism, this volume brings together a variety of archaeologists focused on placing indigenous agency in the foreground of mission interpretation.

The Spanish missions of California have long been misrepresented as places of benign and peaceful coexistence between Franciscan friars and California Indians. In fact, the mission friars enslaved the California Indians and treated them with deliberate cruelty. "A Cross of Thorns" describes the dark and violent reality of Mission life. Beginning in 1769, California Indians were enticed into the missions, where they and their descendents were imprisoned for 60 years of forced labor and daily beatings. The chilling depictions of colonial cruelty in "A Cross of Thorns" are based on little known church and Spanish government archives and letters written by the founder of California's mission, Friar Junipero Serra (who advocated the whipping of Mission Indians as a standard policy), and published first-hand accounts of 18th and 19th century travelers. Tracing the history of Spanish colonization in California from its origins in Spain's 18th century economic crisis to the legacy of racism and brutality that continues today, "A Cross of Thorns" is one of the most thought-provoking books ever written on California history.

"The Mission Walker is a marvelous book, a moving meditation on the relationships between courage and faith, endurance and transcendence." Randall Sullivan, Creator, The Miracle Detective, Oprah Winfrey Network (OWN) "Edie Sundby's account of her amazing trek along the entirety of the California Mission Trail is not only captivating and inspiring but also one heck of an outdoors adventure." Les Standiford, Author "This powerful story of determination and faith will stay with you forever." Ken Budd Journalist/Author "... a powerful narrative that takes us through the author's harrowing journeys, inward and outward." JoBeth McDaniel Journalist/Author "There are parts of this book that I couldn't pull myself away from.... that left me with profound messages. Incredible memoir!!! Incredible woman!!!! 5 Stars" Elyse Walters, #3 Top Reviewer, Goodreads This story is not about avoiding death. It's about living life. Immerse yourself in the amazing story of Edie Littlefield Sundby, who, after being told she had only 3 months to live, survived 79 rounds of chemotherapy, radical liver and lung surgeries, and then walked 800 miles along the California Mission Trail, averaging 14 miles a day, and stopping at life-giving missions to revive her body and her soul. When she finished she yearned to walk the mission trail from its start – in Mexico. But no one had traversed that trail in 250 years. As you will learn in the pages of this book, Edie doesn't care about what some deem impossible. It is that spirit that has allowed her to live, despite the odds. With fading strength and only one lung, she walked another 800 miles through the rugged mountains and deserts of Baja Mexico to the California border. In a walk of triumph, of harrowing adventure, and of spiritual enlightenment, she carried her mortality in every step and in the process opened up a profound communion with God and his creation, and the true meaning of life. And all of this with a terminal cancer that was chasing her every step of the way. It still is, and she continues to walk with it every day. For me, walking is a transcendent physical, emotional, and spiritual experience, like dancing. "If I can move, I am not sick." That is my alternate reality. And I believe with all my will in that reality. So when cancer strikes again and again, I walk to stay alive. Life is the greatest adventure there is. Why stop our adventuring because someone says the end might be near? For those who crave a spirit of adventure, who ache like Edie to know what our bodies and spirits are truly capable of, this book is a must-read. A true testament to faith, courage, and the power of hope.

Recovering lost voices and exploring issues intimate and institutional, this sweeping examination of Spanish California illuminates Indian struggles against a confining colonial order and amidst harrowing depopulation. To capture the enormous challenges Indians confronted, Steven W. Hackel integrates textual and quantitative sources and weaves together analyses of disease and depopulation, marriage and sexuality, crime and punishment, and religious, economic, and political change. As colonization reduced their numbers and remade California, Indians congregated in missions, where they forged communities under Franciscan oversight. Yet missions proved disastrously unhealthful and coercive, as Franciscans sought control over Indians' beliefs and instituted unfamiliar systems of labor and punishment. Even so, remnants of Indian groups still survived when Mexican officials ended Franciscan rule in the 1830s. Many regained land and found strength in ancestral cultures that predated the Spaniards' arrival. At this study's heart are the dynamic interactions in and around Mission San Carlos Borromeo between Monterey region Indians (the Children of Coyote) and Spanish missionaries, soldiers, and settlers. Hackel places these local developments in the context of the California mission system and draws comparisons between California and other areas of the Spanish Borderlands and colonial America. Concentrating on the experiences of the Costanoan and Esselen peoples during the colonial period, Children of Coyote concludes with an epilogue that carries the story of their survival to the present day.

On the afternoon of September 14, 1786, two French ships appeared off the coast of Monterey, the first foreign vessels to visit Spain's California colonies. Aboard was a party of eminent scientists, navigators, cartographers, illustrators, and physicians. For the next ten days the commander of this expedition, Jean François de La Pérouse, took detailed notes on the life and character of the area: its abundant wildlife, the labors of soldiers and monks, and the customs of Indians recently drawn into the mission. These observations provide a startling portrait of California two centuries ago.
