What am I going to do with my life? is a question that young people commonly face, while many not-so-young people continue to wonder about finding direction and purpose in their lives. Whether such purpose has to do with what job to take, whether to get married, or how to incorporate religious faith into the texture of their lives, Christians down the centuries have believed that God has plans for them. This unprecedented anthology gathers select passages on work and vocation from the greatest writers in Christian history. William Placher has written insightful introductions to accompany the selections — an introduction to each of

the four main historical sections and a brief introduction to each reading. While the vocational questions faced by Christians have changed through the centuries, this book demonstrates how the distilled wisdom of these saints, preachers, theologians, and teachers remains relevant to Christians today. This rich resource is to be followed by a companion volume, edited by Mark R. Schwehn and Dorothy C. Bass, featuring texts drawn mainly from fiction, memoir, poetry, and other forms of literature. A study guide is available from Programs for the Theological Exploration of Vocation (PTEV) on their website.

Recently the lives of people from age 18 to 29 have changed so dramatically that a new stage of life has developed, emerging adulthood, that is distinct from both the adolescence that precedes it and the young adulthood that comes in its wake. Rather than marrying and becoming parents in their early twenties, most people in industrialized societies now postpone these transitions until at least their late twenties, and instead spend the time in self-focused

exploration as they try out different possibilities in their careers and relationships. In *Emerging Adulthood*, Jeffrey Jensen Arnett identifies and labels, for the first time, this period exploration, instability, possibility, self-focus, and a sustained sense of being in limbo. An increasing number of emerging adults emphasize having meaningful and satisfying work to a degree not seen in prior generations. Marrying later and exploring more casual sexual relationships have created different hopes and fears concerning long-term commitments and the differences between love and sex. Emerging adults also face the challenge of defending their non-traditional lifestyles to parents and others outside their generation who have made much more traditional choices. In contrast to previous portrayals of emerging adults, Arnett's research shows that they are particularly skilled at maintaining contradictory emotions--they are confident while still being wary, and optimistic in the face of large degrees of uncertainty. As the demographics of American youth, the American workplace, and adulthood continue to evolve, *Emerging Adulthood* is indispensable reading for anyone wanting to understand the face of modern America.
