It covers the domains of development including neurological, cognitive, social, physical and personality. The text is organised chronologically by chapter. Within each chapter content is organised topically. This structure allows for a degree of flexibility and lecturers can choose the way they wish to approach the content, whether it is topically or chronologically.

The authors address physical, intellectual, social, and emotional growth in 11 life stages, from the prenatal period through elderhood, focusing on the idea that development results from the interdependence of these areas at every stage, and placing special emphasis on how optimal development may be fostered throughout life. seventh edition expands the tradition of making the student's experience with motor development an interactive one. New insights into motor competence help explain the relationship between skill development and physical fitness. The text helps students understand how maturational age and chronological age are distinct and how functional constraints affect motor skill development and learning. It shows how the four components of physical fitness—cardiorespiratory endurance, strength, flexibility, and body composition—interact to affect a person's movements over the life span, and describes how relevant social, cultural, psychosocial, and cognitive influences can affect a person's movements. This edition comes with 148 illustrations, 60 photos, and 25 tables—all in full color—to help explain concepts and to
