

Lisa Gezon And Conrad Kottak Culture

A World of Many Worlds is a search into the possibilities that may emerge from conversations between indigenous collectives and the study of science's philosophical production. The contributors explore how divergent knowledges and practices make worlds. They work with difference and sameness, recursion, divergence, political ontology, cosmopolitics, and relations, using them as concepts, methods, and analytics to open up possibilities for a pluriverse: a cosmos composed through divergent political practices that do not need to become the same. Contributors. Mario Blaser, Alberto Corsín Jiménez, Déborah Danowski, Marisol de la Cadena, John Law, Marianne Lien, Isabelle Stengers, Marilyn Strathern, Helen Verran, Eduardo Viveiros de Castro

Since the 1990s, the Ankarana region of northern Madagascar has developed a reputation among globe-trotting gemstone traders and tourists as a source of some of the world's most precious natural wonders. Although some might see Ankarana's sapphire and ecotourist trades as being at odds with each other, many local people understand these trades to be fundamentally connected, most obviously in how both serve foreign demand for what Madagascar has to offer the world. Walsh explores the tensions and speculations that have come with the parallel emergence of these two trades with sensitivity and a critical eye, allowing for insights into globalization, inequality, and the appeal of the "natural." anthropology course. Anthropology: Appreciating Human Diversity offers an up-to-date holistic introduction to general anthropology from the four-field perspective. Key themes of appreciating the experiences students bring to the classroom, appreciating human diversity, and appreciating the field of anthropology are showcased throughout the text. Focusing on an increasingly interconnected world, the new Focus on Globalization essays examine topics as diverse as tourism in the ancient and modern worlds, global disease pandemics, world events (including the Olympics and the World Cup), and the expansion of international finance and branding.

This concise, student-friendly, current introduction to general anthropology carefully balances coverage of core topics and contemporary changes in the field. Window on Humanity is a perfect match for general anthropology courses that use readings or ethnographies along with a main text.

A landmark comparative study (U.S. and Brazil) of television's social and cultural effects on human behavior. The Updated Edition brings forward the author's research on this topic since the original volume was published in 1990 with an extensive new Introduction.

A leading name in anthropology, Conrad Philip Kottak continues to define student learning in the cultural anthropology course. Cultural Anthropology offers an up-to-date holistic introduction to anthropology from the four-field perspective. Key themes of appreciating the experiences students bring to the classroom, appreciating human diversity, and appreciating the field of anthropology are showcased throughout the text. The program presents anthropology's core concepts and also demonstrates anthropology's relevance to the 21st-century world we inhabit. Revisions to the 18th edition of Cultural Anthropology were extensively informed by student data, collected anonymously by McGraw-Hill's adaptive learning system. Connect is the

abordar algunas de estas cuestiones.

CULTURE is the latest addition to the M-series. This thoroughly updated 2nd edition magazine style text for the Introduction to Cultural Anthropology course offers scholarly content in an engaging design that will captivate your students. Through eye-catching pedagogical features, students develop a better understanding of the material and will retain a greater amount of course concepts. This book presents cultural anthropology in a way that is both captivating and relevant to today's student at a price that they prefer. More current, more portable, more captivating, plus a rigorous and innovative research foundation adds up to: more learning. When you meet students where they are, you can take them where you want them to be.

"The Chicago-based art program "Culture in Action" addressed such pressing urban issues as minority youth leadership and gang violence, HIV/AIDS caregiving, public housing, multicultural demographics and neighborhood, achievements by women, labor and management relations, and ecology. "Culture in Action" took place from 1992 through 1993 and was organized by Sculpture Chicago, a decade-old visual arts organization that specializes in unique public art and education programs." "Seeking to bridge art and life, eight innovative artist and community partnerships unfolded with results as diverse as a storefront hydroponic garden, a new line of candy, and an ecological field station. These investigations into urban artmaking were activated by participating artists selected by curator Mary Jane Jacob for their interest in critical

File Type PDF Lisa Gezon And Conrad Kottak Culture

social issues and testing the boundaries of public art."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

This text is designed to provide a concise introduction to cultural anthropology, carefully balancing coverage of core topics with contemporary changes in the field. The Environment in Anthropology presents ecology and current environmental studies from an anthropological point of view. From the classics to the most current scholarship, this text connects the theory and practice in environment and anthropology, providing readers with a strong intellectual foundation as well as offering practical tools for solving environmental problems. Haenn, Wilk, and Harnish pose the most urgent questions of environmental protection: How are environmental problems mediated by cultural values? What are the environmental effects of urbanization? When do environmentalists' goals and actions conflict with those of indigenous peoples? How can we assess the impact of "environmentally correct" businesses? They also cover the fundamental topics of population growth, large scale development, biodiversity conservation, sustainable environmental management, indigenous groups, consumption, and globalization. This revised edition addresses new topics such as water, toxic waste, neoliberalism, environmental history, environmental activism, and REDD (Reducing Emissions from Deforestation and Forest Degradation), and it situates anthropology in the multi-disciplinary field of environmental research. It also offers readers a guide for developing their own plan for environmental action. This

File Type PDF Lisa Gezon And Conrad Kottak Culture

volume offers an introduction to the breadth of ecological and environmental anthropology as well as to its historical trends and current developments. Balancing landmark essays with cutting-edge scholarship, bridging theory and practice, and offering suggestions for further reading and new directions for research, *The Environment in Anthropology* continues to provide the ideal introduction to a burgeoning field.

This insightful book introduces the most important trends, people, events, and products of popular culture in Latin America and the Caribbean.

- Explores controversial issues like censorship, gender, cultural imperialism, and globalization
- Allows for cross-cultural comparisons between Latin America, the Caribbean, and the United States
- Enables quick access to areas of interest through well-organized entries and helpful topic introductions
- Features a discussion on the influence of modern technologies—the Internet, social media, and video games—in Latin American cultures
- Provides substantial citations and references on each element of popular culture

Environmental issues have become increasingly prominent in local struggles, national debates, and international policies. In response, scholars are paying more attention to conventional politics and to more broadly defined relations of power and difference in the interactions between human groups and their biophysical environments. Such issues are

at the heart of the relatively new interdisciplinary field of political ecology, forged at the intersection of political economy and cultural ecology. This volume provides a toolkit of vital concepts and a set of research models and analytic frameworks for researchers at all levels. The two opening chapters trace rich traditions of thought and practice that inform current approaches to political ecology. They point to the entangled relationship between humans, politics, economies, and environments at the dawn of the twenty-first century and address challenges that scholars face in navigating the blurring boundaries among relevant fields of enquiry. The twelve case studies that follow demonstrate ways that culture and politics serve to mediate human-environmental relationships in specific ecological and geographical contexts. Taken together, they describe uses of and conflicts over resources including land, water, soil, trees, biodiversity, money, knowledge, and information; they exemplify wide-ranging ecological settings including deserts, coasts, rainforests, high mountains, and modern cities; and they explore sites located around the world, from Canada to Tonga and cyberspace.

Khat, marijuana, peyote—are these dangerous drugs or vilified plants with rich cultural and medical values? In this book, Lisa Gezon brings the drug debate into the 21st century, proposing criteria for evaluating psychotropic substances. Focusing on

khat, whose bushy leaves are an increasingly popular stimulant and the target of vehement anti-drug campaigns, she explores biocultural and socioeconomic contexts on local, national, and global levels. Gezon provides a multidisciplinary examination of the plant's direct physical and psychological effects, as well as indirect social and structural effects on income and labor productivity, identity, gendered relationships, global drug discourses, and food security. This sophisticated, multi-leveled analysis cuts through the traditional battle lines of the drug debate and is a model for understanding and evaluating psychotropic substances around the world.

Gezon argues that local events continuously redefine and challenge global processes of land use and land degradation. Her ethnographic study of Antankarana-identifying rice farmers and cattle herders in northern Madagascar weaves together an analysis of remotely sensed images of land cover over time with ethnographies of situated negotiations between human actors. Her book will be particularly valuable to researchers and students in anthropology, geography, sociology, and environmental studies, and those involved in conservation and resource management.

By the highest standards, *Assault on Paradise* ranks among the best and most complete modern ethnographic accounts ever written. In a rich

narrative style, it chronicles the rapid social and economic change in Arembepe, a once-isolated coastal fishing village in Brazil where the author first conducted anthropological fieldwork more than fifty years ago. With emphasis on the impact of globalization, technology, and mass media, the current edition extends stories of people and events as well as internal and external changes. Readers quickly feel a part of the evolving community of Arembepe and the author's close friends and informants. As one reviewer put it, "The people and personalities come through in a very human and often amusing way. This isn't ethnography with the people taken out." The well-structured, jargon-free coverage makes it ideal for use in introductory anthropology courses.

Keeping It Living brings together some of the world's most prominent specialists on Northwest Coast cultures to examine traditional cultivation practices from Oregon to Southeast Alaska. It explores tobacco gardens among the Haida and Tlingit, managed camas plots among the Coast Salish of Puget Sound and the Strait of Georgia, estuarine root gardens along the central coast of British Columbia, wapato maintenance on the Columbia and Fraser Rivers, and tended berry plots up and down the entire coast. With contributions from a host of experts, Native American scholars and elders, Keeping It Living

documents practices of manipulating plants and their environments in ways that enhanced culturally preferred plants and plant communities. It describes how indigenous peoples of this region used and cared for over 300 species of plants, from the lofty red cedar to diminutive plants of backwater bogs.

IBSS is the essential tool for librarians, university departments, research institutions and any public or private institution whose work requires access to up-to-date and comprehensive knowledge of the social sciences.

Written by one of the prominent scholars in the field, this concise, up-to-date introduction to general anthropology carefully balances coverage of core topics and contemporary changes in the field. Since no single or monolithic theoretical perspective orients this book, instructors with a wide range of views and approaches can use it effectively. The combination of brevity and readability make Window on Humanity a perfect match for general anthropology courses that use readings or ethnographies along with a main text.

"E-Commerce 2015" is intended for use in undergraduate and graduate e-commerce courses in any business discipline.

" "The market-leading text for e-commerce "This comprehensive, market-leading text emphasizes the three major driving forces behind e-commerce--technology change, business development, and social issues--to provide a coherent conceptual framework for understanding the field.

Teaching and Learning ExperienceThis program will provide a better teaching and learning experience--for both instructors and students.Comprehensive Coverage Facilitates

Understanding of the E-Commerce Field: In-depth coverage of technology change, business development, and social

File Type PDF Lisa Gezon And Conrad Kottak Culture

issues gives readers a solid framework for understanding e-commerce. Pedagogical Aids Help Readers See Concepts in Action: Infographics, projects, and real-world case studies help readers see how the topics covered in the book work in practice.

Gender and Sustainability deals with women's struggles to contend with global forces—environmental change, economic development, discrimination and stereotyping about the roles of women, and diminishing access to natural resources—not in the abstract but in everyday life. It addresses the lived complexities of the relationship between gender and sustainability.

On Being Different provides an up-to-date, comprehensive, and interdisciplinary account of diversity and multiculturalism in the United States and Canada. Kottak and Kozaitis clarify essential issues, themes, and topics in the study of diversity, including ethnicity, religion, gender, and sexual orientation. The book also presents an original theory of multiculturalism, showing how human agency and culture work to organize and change society. The authors use rich and varied ethnographic examples, from North America and abroad, to help students apply the material to their own lives, and thus gain a better understanding of diversity and multiculturalism. How are biological diversity, protected areas, indigenous knowledge and religious worldviews related? From an anthropological perspective, this book provides an introduction into the complex subject of conservation policies that cannot be addressed without recognizing the encompassing relationship between discursive, political, economic, social and ecological facets. By facing these interdependencies across global, national and local

File Type PDF Lisa Gezon And Conrad Kottak Culture

dynamics, it draws on an ethnographic case study among Maya-Q'eqchi' communities living in the margins of protected areas in Guatemala. In documenting the cultural aspects of landscape, the study explores the coherence of diverse expressions of indigenous knowledge. It intends to remind of cultural values and beliefs closely tied to subsistence activities and ritual practices that define local perceptions of the natural environment. The basic idea is to illustrate that there are different ways of knowing and reasoning, seeing and endowing the world with meaning, which include visible material and invisible interpretative understandings. These tend to be underestimated issues in international debates and may provide an alternative approach upon which conservation initiatives responsive to the needs of the humans involved should be based on. Ideal for any cultural anthropology course, this brief collection of ethnographic case studies exposes students to 15 different cultures. The groups selected are peoples whose traditional cultures are uniquely their own. Each has distinctive patterns and practices; each has faced the challenge of an encroaching world, with differing results. Moreover, they often provide the prime illustrations of important concepts in introductory anthropology course including Azande witchcraft, Ju/'hoansi egalitarianism, Trobriand kula exchange, and Minangkabau matriliney. As such, this volume can

stand alone.

This program shows how elementary students can use skillstreaming in order to use proper social skills in dealing with difficult situations. Skill cards list the steps needed to successfully perform each of the 60 prosocial skills outlined in skillstreaming the elementary school child.

The essays collected in *World in Motion* all address the same issue: The global paradox that modern prosperity has entailed extreme environmental degradation. Gary M. Kroll and Richard H. Robbins present readings covering all principal viewpoints on this matter, from the neoliberal belief that environmental and social problems can be fixed through a growing economy to the critics of globalization who equate growth with environmental degradation. This book asks an important question: Can we simply accelerate growth under the assumption that increased prosperity and new technologies will allow us to reverse environmental damage? Or do we need to transform our modes of living radically to maintain the health of the world around us?

Khat, marijuana, peyote—are these dangerous drugs or vilified plants with rich cultural and medical values? In this book, Lisa Gezon brings the drug debate into the 21st century, proposing criteria for evaluating psychotropic substances. Focusing on khat, whose bushy leaves are an increasingly

popular stimulant and the target of vehement anti-drug campaigns, she explores biocultural and socioeconomic contexts on local, national, and global levels. Gezon provides a multi-disciplinary examination of the plant's direct physical and psychological effects, as well as indirect social and structural effects on income and labor productivity, identity, gendered relationships, global drug discourses, and food security. This sophisticated, multileveled analysis cuts through the traditional battle lines of the drug debate and is a model for understanding and evaluating psychotropic substances around the world.

This contemporary introduction to the principles and research base of cultural ecology is the ideal textbook for advanced undergraduate and beginning graduate courses that deal with the intersection of humans and the environment in traditional societies. After introducing the basic principles of cultural anthropology, environmental studies, and human biological adaptations to the environment, the book provides a thorough discussion of the history of, and theoretical basis behind, cultural ecology. The bulk of the book outlines the broad economic strategies used by traditional cultures: hunting/gathering, horticulture, pastoralism, and agriculture. Fully explicated with cases, illustrations, and charts on topics as diverse as salmon ceremonies among Northwest Indians, contemporary Maya agriculture,

File Type PDF Lisa Gezon And Conrad Kottak Culture

and the sacred groves in southern China, this book gives a global view of these strategies. An important emphasis in this text is on the nature of contemporary ecological issues, how peoples worldwide adapt to them, and what the Western world can learn from their experiences. A perfect text for courses in anthropology, environmental studies, and sociology.
