The best feature of these note being provided as ebooks is it will ensure timely and regular updates, easy to understand the content and hassle-free studies as you can access the ebook online on Adda247 Store or on your mobile device using the Adda247 mobile app. You can subscribe to Banking Awareness eBook package now and the updates will start from 3rd May 2018, where you'll get ebook updates on a weekly basis. Salient Feature of Banking Awareness eBook by Adda247 Publications: -Covers all important topics of Banking Awareness in 40 Chapters. -Easy to Understand notes prepared by a team of experts. -Regular Updates

American Government: In the United States, the government gets its power to govern from the people. We have a government of the people, by the people, and for the people. Citizens in the United States shape their government and its policies, so they must learn about important public issues and get involved in their communities. Learning about American government helps you understand your rights and responsibilities and allows you to fully participate in the American political process. The Founders of this country decided that the United States should be a representative democracy. They wanted a nation ruled by laws, not by men. In a representative democracy, the people choose officials to make laws and represent their views and concerns in government. This book will help you understand the principles of American democracy, the U.S. system of government, and the important rights and responsibilities of U.S. citizenship.

The Indian state of Kerala has invoked much attention within development and gender debates, specifically in relation to its female capital- an outcome of interrelated historical, cultural and social practices. On the one hand, Kerala has been romanticised, with its citizenry, particularly women, being free of social divisions and uplifted through educational well-being. On the other hand, its realism is stark, particularly in the light of recent social changes. Using a Bourdieusian frame of analysis, *Development and Gender Capital in India* explores the forces of globalisation and how they are embedded within power structures. Through narratives of women's lived experiences in the private and public domains, it highlights the 'anomie of gender' through complexities and contradictions vis-à-vis processes of modernity, development and globalisation. By demonstrating the limits placed upon gender capital by structures of patriarchy and domination, it argues that discussions about the empowered Malayalee women should move from a mere 'politics of rhetoric and representation' to a more embedded 'politics of transformation', meaningfully taking into account women's changing roles and identities. This book will be of interest to scholars and students of Development Studies, Gender Studies, Anthropology and Sociology.

India 2017 Yearbook falls under the yearbook/reference segment and is an absolute must for all students preparing for the UPSC / State Civil Service or other competitive examinations in India. The yearbook is an authoritative compilation by Shri Rajiv Mehrishi, the incumbent Union Home Secretary, on various issues that are regularly queried in various competitive

Presents information on nearly fifty major categories such as architecture, biology, business, history, medicine, sports, and film, a biographical dictionary, a list of the wonders of the world, and a writer's guide to grammar.

At this western corner of the confluence of the Bay of Bengal and the busy river Hooghly, West Bengal in eastern India lies a geography that has hosted many outsiders – traders, merchants, colonial masters, missionaries and wanderers. This book is fundamentally concerned with the relations among the theoretical categories of time, space and capital in India and shows registers of temporality and spatiality generated by historical phases of interaction with industrial capital. Based on extensive ethnographic fieldwork in Howrah, the author examines the form of urbanism that is not linked to the city-form of spatial organization, a "hinterland urbanism". The book brings out the theoretical implications by showing the relations among time, space and capital. Through a series of encounters and interceptions with a number of voices arising, the book sheds light on the issue and identifies the state of an ethnographer who is ensconced in the field – in wonder, conceit and sometimes physical discomfort. This book is, thus, an exploration of such historical layering of space by forces of time and speed afforded by the logics of capital, through limited acts of witnessing of production and access of historical sensation. An invitation to scholars and students of cultural anthropology to consider the question of scale in the making of ethical, political, and aesthetic selves, this book is an intervention in political anthropology that connects aesthetics, desire, and emotion to political imagination and action. The book makes a significant contribution in anthropology of space, urban anthropology and anthropology of capital as well as urban studies.

When the state and business interact effectively they can promote a more efficient allocation of scarce resources, appropriate industrial policy and a more effective and prioritised removal of key obstacles to growth, than when the two sides fail to co-operate or engage in harmful collusion. This book, based on original empirical research undertaken in Africa and India, addresses what constitutes the effectiveness of state-business relations, what explains their formation and evolution over time and whether effective state-business relations matter for economic performance. Analysing the effects of state-business relations on economic performance at both the macro and micro levels, the book concludes that where effective state-business relations are established – either through formal or informal institutional patterns and relationships – the growth

effects are generally positive. Establishing, sustaining and renewing effective state-business relations are political processes. The better organized the business community and the government are for purposes of such relations, the more effective state-business relations will be in negotiating growth enhancing policies. The book is of interest to researchers in the fields of development studies, management, economics and political science.

Vols. for 1950-19 contained treaties and international agreements issued by the Secretary of State as United States treaties and other international agreements. An encyclopaedic voluminous work gives authentic and objectives information about all the 28 states and 7 Union Territories, History, Physical aspects, Population, Politics, Education, Transport and Communication, Languages and Literature, Medical Facilities, Industry, Finance Sector, Natural Wealth, Agriculture, Wild Life, Tourism, Archeological sites, Natural Calamities, Customs, Fairs and Festivals, Arts and Crafts, Rural and Urban Development, Newspapers, Important Events, NGO, Planning outlays in thirty-six volumes, each volume complete about a state. A benchmark. Papers presented at a seminar held at Itanagar during 15-16 February 2008.

This book throws new light on the study of India's development through an exploration of the triangular relationship between federalism, nationalism and the development process. It focuses on one of the seemingly paradoxical cases of impressive development and sharp federal conflicts that have been witnessed in the state of Punjab. The book concentrates on the federal structure of the Indian polity and it examines the evolution of the relationship between the centre and the state of Punjab, taking into account the emergence of Punjabi Sikh nationalism and its conflict with Indian nationalism. Providing a template to analyse regional imbalances and tensions in national economies with federal structures and competing nationalisms, this book will not only be of interest to researchers on South Asian Studies, but also to those working in the fields of politics, political economy, geography and development.

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, *The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution* includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The

database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalindex.

Statutes at Large is the official annual compilation of public and private laws printed by the GPO. Laws are arranged by order of passage.
