How does literature work? And what does it mean? How does it relate to the world: to politics, to history, to the environment? How do we analyse and interpret a literary text, paying attention to its specific poetic and fictitious qualities? This wide-ranging introduction helps students to explore these and many other essential questions in the study of literature, criticism and theory. In a series of introductory chapters, leading international scholars present the fundamental topics of literary studies through conceptual definitions as well as interpretative readings of works familiar from a range of world literary traditions. In an easy-to-navigate format, *Literature: An Introduction to Theory and Analysis* covers such topics as: ·Key definitions – from plot, character and style to genre, trope and author ·Literature's relationship to the surrounding world – ethics, politics, gender and nature ·Modes of literature and criticism – from books to performance, from creative to critical writing With annotated reading guides throughout and a glossary of major critical schools to help students when studying, revising and writing essays, this is an essential introduction and reference guide to the study of literature at all levels

*Literature and Understanding* investigates the cognitive gain from literature by focussing on a reader's close analysis of a literary text. It examines the meaning of 'literature', outlines the most prominent positions in the literary cognitivism debate, explores the practice of close reading from a philosophical perspective, provides a fresh account of what we mean by 'understanding' and in so doing opens up a new area of research in the philosophy of literature. This book provides a different reply to the challenge that we can't learn anything worthwhile from reading literary fiction. It makes the innovative case that reading literary fiction as literature rather than as fiction stimulates five relevant senses of understanding. The book uses examples of irony, metaphor, play with perspective and ambiguity to illustrate this contention. Before arguing that these five senses of understanding bridge the gap between our understanding of a literary text and our understanding of the world beyond that text. The book will be of great interest for researchers, scholars and post-graduate students in the fields of aesthetics, literary theory, literature in education and pedagogy.

It summarises key concerns and findings, while providing inspiration for language investigations and non-examined assessments (NEAs) with research suggestions.

*Understanding Literature*An Introduction to Reading and WritingHoughton Mifflin Harcourt

Lively, original and highly readable, *An Introduction to Literature, Criticism and Theory* is the essential guide to literary studies. Starting at 'The Beginning' and concluding with 'The End', chapters range from the familiar, such as 'Character', 'Narrative' and 'The Author', to the more unusual, such as 'Secrets', 'Pleasure' and 'Ghosts'. Now in its fifth edition, Bennett and Royle's classic textbook successfully illuminates complex ideas by engaging directly with literary works, so that a reading of *Jane Eyre* opens up ways of thinking about racial difference, for example, while Chaucer, Raymond Chandler and Monty Python are all invoked in a discussion of literature and laughter. The fifth edition has been revised throughout and includes four new chapters – 'Feelings', 'Wounds', 'Body' and 'Love' – to incorporate exciting recent developments in literary studies. In addition to further reading sections at the end of each chapter, the book contains a comprehensive bibliography and a glossary of key literary terms. A breath of fresh air in a field that can often seem dry and dauntingly theoretical, this book will open the reader's eyes to the exhilarating possibilities of reading and studying literature.

*Judge for Yourself* guides interested and advanced-level readers through the challenge of judging the quality of hyper-contemporary literature. Whether reading the latest bestseller or the book that everyone is recommending, *Judge for Yourself* guides you through the challenge of the text. Reading the longlist of the 2019 International Dylan Thomas Prize through five chapters, *Judge for Yourself* introduces readers to current critical debates that inform engagement and the reading experience of hyper-contemporary writing. Topics covered include feminism, postcolonialism, critical race theory, queer theory, class, and book reviews. Each chapter includes introductory questions for the reader, and *Judge for Yourself* is accompanied by an exploration of book prize culture and the challenge posed by hyper-contemporary literature. *Judge for Yourself* puts judging firmly in the hands of the reader, and not the academic or professional reviewers.

Originally published in 1984, *Reading the Romance* challenges popular (and often demeaning) myths about why romantic fiction, one of publishing's most lucrative categories, captivates millions of women readers. Among those who have disparaged romance reading are feminists, literary critics, and theorists of mass culture. They claim that romances enforce the woman reader's dependence on men and acceptance of the repressive ideology purveyed by popular culture. Radway questions such claims, arguing that critical attention "must shift from the text itself, taken in isolation, to the complex social event of reading." She examines that event, from the complicated business of publishing and distribution to the individual reader's engagement with the text. Radway's provocative approach combines reader-response criticism with anthropology and feminist psychology. Asking readers themselves to explore their reading motives, habits, and rewards, she conducted interviews in a midwestern town with forty-two romance readers whom she met through Dorothy Evans, a chain bookstore employee who has earned a reputation as an expert on romantic fiction. Evans defends her customers' choice of entertainment; reading romances, she tells Radway, is no more harmful than watching sports on television. "We read books so we won't cry" is the poignant explanation one woman offers for her reading habit. Indeed,

Radway found that while the women she studied devote themselves to nurturing their families, these wives and mothers receive insufficient devotion or nurturance in return. In romances the women find not only escape from the demanding and often tiresome routines of their lives but also a hero who supplies the tenderness and admiring attention that they have learned not to expect. The heroines admired by Radway's group defy the expected stereotypes; they are strong, independent, and intelligent. That such characters often find themselves to be victims of male aggression and almost always resign themselves to accepting conventional roles in life has less to do, Radway argues, with the women readers' fantasies and choices than with their need to deal with a fear of masculine dominance. These romance readers resent not only the limited choices in their own lives but the patronizing attitude that men especially express toward their reading tastes. In fact, women read romances both to protest and to escape temporarily the narrowly defined role prescribed for them by a patriarchal culture. Paradoxically, the books that they read make conventional roles for women seem desirable. It is this complex relationship between culture, text, and woman reader that Radway urges feminists to address. Romance readers, she argues, should be encouraged to deliver their protests in the arena of actual social relations rather than to act them out in the solitude of the imagination. In a new introduction, Janice Radway places the book within the context of current scholarship and offers both an explanation and critique of the study's limitations.

Understanding Literature is an innovative anthology and technology package representing the next generation of literary pedagogy for introduction to literature and literature for composition courses. Built on a balanced foundation of canonical and nontraditional reading selections, this text includes discussions of the formal literary elements--and then goes a step further to integrate relevant and accessible coverage of contemporary criticism within each genre. This unique, integrated coverage of contemporary critical approaches (such as feminist theory, psychoanalytic theory, and postcolonial theory) offers students a richer, more engaging introduction to reading critically and writing about literature. Other anthologies offer minimal theoretical coverage in a separate chapter or appendix, typically sidestepping the larger issues the theories raise. The integrated technology package, complete with CD-ROM and accompanying web site, takes advantage of multimedia resources to enhance the study of literature with visual aids, audio and video files, additional primary and secondary texts, and other materials that help place literature within the broader contexts of history and culture. Engaging, creative table of contents balances familiar authors and literary works with more adventurous and diverse selections, exposing students to a broad range of literature and providing instructors with great flexibility in designing their courses. Critical Perspectives offer concise, insightful discussions of how literary and cultural theories are used to explore meaning in literature. Throughout the anthology casebooks, excerpts from classic and contemporary critical essays, and in-text discussions offer students accessible yet critical perspectives into how literary theory can facilitate a deeper understanding of literary texts. The fiction and drama sections feature brief in-text discussions and excerpts from literary critics. Critical Perspectives can also be used as a springboard for class discussion and writing. In-depth treatment of Featured Writers in each section allows more focused study of a single writer. This feature includes multiple reading selections showing the range of the writer's work, more extensive biographical information, and additional materials on the CD-ROM and web site. Writers highlighted include James Baldwin, Virginia Woolf, Salman Rushdie, John Keats, Gwendolyn Brooks, Anne Sexton, and William Shakespeare. Two unique interdisciplinary chapters (The Beat Movement and Performative Poetics) focus on the spoken and performed aspects of literature. Coverage includes several works from key writers in both movements as well as discussions of how these movements use a mixture of media--language, film, jazz, photography, and art--to showcase their work and provide social and political commentary. Unique poetry casebooks allow students to explore certain themes or topics in depth, such as Poetry and Social Activism Between the Wars, Poetry, Trauma, and Testimony: Holocaust Verses, Postmodern Poetics, Chicano/a Poetry, and Native American Poetry. Emphasis on cultural perspectives reflects the increased desire to view the study of literature through the lens of culture. Reading selections, section introductions, questions for discussion, writing assignments, and other apparatus encourage students to view literature from different cultural perspectives. Thorough coverage of reading and writing about literature shows students how to read each genre and craft effective essays. Annotated student papers serve as models of good student writing, and a separate section teaches students how to conduct research and incorporate other sources into their writing. An abundance of visual text--such as photos, art, and drawings--help students place literary works in broader contexts.

Written for an Introduction to Literature course, Close Reading allows students to examine the language and structure of a text, as well as the ideas or feelings it expresses, and to investigate the intricate links between form and content. It helps students to see such issues as sound and rhythm, imagery and figurative language, voice, the way characters are portrayed, the importance of setting, plot structure - all the elements that make literature 'literary' - changes the way in which they approach their study of literature. Covers poetry, fiction, and drama. Bringing together strands of public discourse about valuing personal achievement at the expense of social values and the impacts of global capitalism, mass media, and digital culture on the lives of children, this book challenges the potential of science and business to solve the world's problems without a complementary emphasis on social values. The selection of literary works discussed illustrates the power of literature and human arts to instill such values and foster change. The book offers a valuable foundation for the field of literacy education by providing knowledge about the importance of language and literature that educators can use in their own teaching and advocacy work.

What is this thing called literature? Why should we study it? And how? Relating literature to topics such as dreams, politics, life, death, the ordinary and the uncanny, this beautifully written book establishes a sense of why and how literature is an exciting and rewarding subject to study. Bennett and Royle delicately weave an essential love of literature into an account of what literary texts do, how they work and what sort of questions and ideas they provoke. The book's three parts reflect the fundamental components of studying literature: reading, thinking and

writing. The authors use helpful, familiar examples throughout, offering rich reflections on the question 'What is literature?' and on what they term 'creative reading'. Bennett and Royle's lucid and friendly style encourages a deep engagement with literary texts. This book is not only an essential guide to the study of literature, but an eloquent defence of the discipline.

Through art, drama and analysis, this program shows the Old & New Testament origins of many contemporary literary forms, styles & devices.

Why Reading Literature in School Still Matters: Imagination, Interpretation, Insight explains how a reader's involvement with literary texts can create conditions for developing deep insight into human experience, and how teachers can develop these interpretive possibilities in school contexts. Developed from the author's many years of research, this book offers both a theoretical framework that draws from an interdisciplinary array of sources and many compelling and insightful examples of literary engagement of child, adolescent, and adult readers, as well as practical advice for teachers and other readers about how to create interesting and expansive sites for interpretation that are personally rewarding and productive. Why Reading Literature in School Still Matters: Imagination, Interpretation, Insight : \*provides an overview of theories of human learning that influence beliefs about language, culture, and identity; \*shows how these theories of learning influence beliefs about and practices of reading and interpretation; \*introduces new ways to conceptualize reading that emphasize the relationship between individual and collective identities and language/literacy practices; \*explains why access to information does not guarantee that understanding and/or insight will occur--by emphasizing the importance of "re-reading" and "close reading" this text shows that development of deep insight depends on interpretation skills that must be taught; and \*presents a reconceptualized view of reading pedagogy. This is an essential text for education courses at both the undergraduate and graduate levels and a must read for teachers and for anyone interested in more deeply understanding how literary works of art can create conditions for learning about oneself, one's situation, and one's possibilities.

At the intersection of law, literature and history, this book interrogates how a dominant contemporary idea of law emerged out of specific ideas of reading in the nineteenth century. Reading shapes our identities. How we read shapes who we are. Reading also shapes our conceptions of what the law is, because the law is also a practice of reading. Focusing on the works of key Victorian writers closely associated with legal practice, this book addresses the way in which the identity of the reader of law has been modelled on the identity of the political elite. At the same time, it shows how other readers of law have been marginalized. The book thus shows how a construction of the law has emerged from the ordering of a power that discriminates between different readers and readings. More specifically, and in response to the emerging media of photography – and, with it, potentially subversive ideas of exposure and visibility – the book shows that there have been dominant, hidden and unrecognised guides to legal reading and to legal thought. And in making these visible, the book also aims to make them contestable. This secret history of law will appeal to legal historians, legal theorists, those working at the intersection of law and literature and others with interests in law and the visual.
