Living in the Environment G. Tyler Miller, Scott Spoolman, 2014-02-28 Inspiring people to care about the planet. In the new edition of LIVING IN THE ENVIRONMENT, authors Tyler Miller and Scott Spoolman have partnered with the National Geographic Society to develop a text designed to equip students with the inspiration and knowledge they need to make a difference solving today's environmental issues. Exclusive content highlights important work of National Geographic Explorers, and features over 200 new photos, maps, and illustrations that bring course concepts to life. Using sustainability as the integrating theme, LIVING IN THE ENVIRONMENT 18e, provides clear introductions to the multiple environmental problems that we face and balanced discussions to evaluate potential solutions. In addition to the integration of new and engaging National Geographic content, every chapter has been thoroughly updated and 18 new Core Case Studies offer current examples of present environmental problems and scenarios for potential solutions. The concept-centered approach used in the text transforms complex environmental topics and issues into key concepts that students will understand and remember. Overall, by framing the concepts with goals for more sustainable lifestyles and human communities, students see how promising the future can be and their important role in shaping it. offers additional exclusive National Geographic content, including high-quality videos on important environmental problems and efforts being made to address them. Team up with Miller/Spoolman's, LIVING IN THE ENVIRONMENT and the National Geographic Society to offer your students the most inspiring introduction to environmental science available! Living in the Environment, Loose-Leaf Version G. Tyler Miller, Scott Spoolman, 2017-01-01

Living in the Environment George Tyler Miller, David Franklin Hackett, Carl Eric Wolfe, 2016-03-29 Living in the Environment is intended for university students taking an introductory course on environmental science. This text takes an interdisciplinary approach, combining coverage from various sciences such as geology, biology and chemistry. The book covers the subject matter through seven integrative themes: natural capital, energy and energy efficiency, solutions to environmental problems, sustainability, pollution prevention and waste reduction, population and exponential growth, and working together to bring about environmental change. This edition will continue to offer Canadian examples, issue, cases and photographs within the context of the global environment.--

Living in the Environment G. Tyler Jr Miller, Tyler G. Miller (Jr), 2004-09 Miller's LIVING IN THE ENVIRONMENT, 14th Edition is the most comprehensive and up-to-date environmental science text on the market. It has the most balanced approach to environmental science instruction, with bias-free comparative diagrams throughout and a focus on prevention of and solutions to environmental problems. Tyler Miller is the most successful author in academic writing on environmental science because of his attention to currency, trend setting presentation of content, ability to predict student and instructor needs for new and different supplements, and his ability to retain the hallmarks on which instructors have come to depend. The content in the 14th edition of LIVING IN THE ENVIRONMENT is everything you have come to expect and more. In this edition, the author has added the How Would You Vote? feature, which is an application of environmental science-related topics in the news. Students apply their environmental science knowledge from the book to a Web activity, which helps them investigate environmental science issues in a structured manner. They then cast their votes on the Web. Results are then tallied. Also found at the Miller website is the much used Updates on Line. Updated twice a year with articles from InfoTrac College Edition service, CNN. Today Video Clips, and Web links, instructors can seamlessly incorporate the most current news articles and research findings to support text presentations. This is a time saver for instructors and part-time teachers who can quickly determine what ancillary materials they want to utilize in just minutes. As with the last edition, this text is packaged with a free Student CD-ROM entitled Interactive Concepts in Environmental Science. Organized by chapter, the CD gives students links to relevant resources, narrated animations, interactive figures, and prompts to review material and test themselves.

Living in the Environment: Principles, Connections, and Solutions G. Tyler Miller, 2007 Sustainability, a watchword of the twenty-first century for those concerned about the environment, is the central theme of this introductory environmental science textbook. Five major subthemes - natural capital, natural capital degradation, solutions, trade-offs, and the fact that individuals matter - guide the way to sustainability. This book looks at these subthemes and builds on the knowledge you learn by providing core case studies.

Living in the Environment George Tyler Miller, 2002 This book redefines the introductory courses on environmental science by emphasizing the major shifts in environmental education and environmental policy that have taken place over the past 25 years and that will accelerate in this century.
