A central feature of this experience has been avoidance of market mechanisms, and excessive reliance on detailed regulation to achieve policy goals. With decisions about future energy policy imminent, *The Great Energy Debate* provides a timely analysis of the importance of energy costs to the whole Western Australian economy. It lays down benchmarks against which policy proposals can be measured, and raises questions such as: How much competition (and regulation) should there be in the electricity industry to promote the future development of the State? What are the linkages between large mineral, and mineral-processing projects and the rest of the State's economy? How can Western Australia have a competitive and cost-
