Following on from his *Adventures in Financial Data Science*, Graham Giller, one of Wall Streets original data scientists, collects together a set of pieces on optimal trading strategy design. These address the key issue not answered in the first volume of the series on *Financial Data Science*, how to go from an alpha to a trade. The division of topics is shaped by what Graham calls "Peter Muller's Rule": the analysis of systems to predict prices and systems to trade from predictions should be separated. This makes trading strategy agnostic as to the origins of the information contained within the alpha and clarifies the analytical methodology developed.

King Martiza of Salamos has fallen asleep when he suddenly becomes aware that something is moving in his room. To his astonishment he finds that it is Princess Veria who has come for his Coronation which is to take place the very next day. She, as her father has died, is now ruling the State of Kavolana which is a smaller

Balkan country bordering on his. In a whisper she tells him that she has discovered a plot by her Prime Minister and his Cabinet to drug her so that she is found by them in his bed and then forced to marry her to save her reputation. The King realises that he has a bad reputation for pursuing beautiful women. But he has in fact no intention of getting married. He does, however, know that his Government has always wanted Kavolana to be joined to Salamos to make the two countries more significant together. It is more important now than at any other time because of the policy of the Russians who are infiltrating the Balkans and taking over every small Kingdom and Principality that they can. The King helps the Princess to escape from his bedroom in a very unconventional manner. Then he finds after his Coronation that he becomes involved in the difficulties of her country. They become friends as each of them realises that the other has no intention of marrying under any circumstances. The King is fully aware of the danger that their two countries are in. The Russians then think up a plot to marry Princess Veria to a Russian Prince and take over Kavolana that way. The King then turns to Queen Victoria for help as Great Britain is the only country that Russia has no wish to offend or fight. The King and the Princess save their countries, but they cannot save themselves from their own feelings. Finally, both the King and the Princess find happiness, which is all told in this unusual romance by BARBARA CARTLAND.

It's beginning to look a lot like Christmas... It's not easy being the wittiest, sexiest, most devilishly handsome member of his elite team of Demon Enforcers, but Finn of the Syx has worked it his entire existence. The existence he can remember, anyway. While his fellow demons can recall their lives as Fallen angels--and the sins that got them condemned--Finn's memory is a blank

slate. Which means his Sin was so horrible, not even the mind of a demon can handle it. Outstanding. Now Finn is given his last chance for redemption, on Christmas Eve, no less: twenty-four hours to find an encrypted list of mortals marked for death. Unfortunately, the only person who can help him is Dana Griffin--the gritty, passionate, fiercely independent security expert who's far more than she thinks she is, and definitely more than Finn deserves. Not to mention she's being hunted by the worst of his kind. Finn knows Dana is the key to his future and his past, but she'll also be a dead woman if he can't remember how to save them both before the clock strikes midnight on Christmas Eve. No pressure, though. The life you've lost is all that can save you when you're a Demon Forsaken.

TO RESTORE HER REPUTATION, SHE MUST FIRST DESTROY IT... When Dianthe Lovejoy is accused of murdering a courtesan who bears an uncanny resemblance to her, she must go into hiding. And the only man who can protect her is her enemy--notorious rake and gambler Lord Geoffrey Morgan.
