Marina Taylor has a one-way ticket to Rome and big dreams to write a book...but an undeniable connection with an irresistible stranger—and her penchant for

disaster—just may derail her plans. From Florence to Capri to the Amalfi Coast, follow Marina's hilarious sex-capades as she stumbles her way through Italian virgins, French photographers, Sicilian twins, and even some first-rate train sex in the second-class cabin. Will she master the art of seduction in Italy—or will she once again prove more calamity than coquette? And what about Will, the ruggedly down-to-earth ex she left pining for her back home? Equal parts laugh-out-loud travel comedy and erotic adventure, Marina will inspire you to throw your itinerary out the window and throw caution to the wind. The question isn't whether or not to choose adventure, but which adventure will choose you. Art, love, sex, wine—the Italian playboy and the boy next door—who says you can't have it all?

Super serious Asahi Suzumura and laidback, easygoing Mitsuki Sayama might seem like an odd couple, but they made a deal; they'll vacation around the world and when they get back to Japan, they'll get married. As they travel from country to country, the different people, cultures and cuisine they encounter begin to bring them closer together. After all they're not just learning about the world, but about themselves too.

It's been nearly four decades since Carl Sagan first addressed the general public from a scientist's perspective, confronting the possibility of extraterrestrial life. We've learned a lot in those years, and planetary scientist David Grinspoon is well prepared to explore this field with a new generation of readers. In *Lonely Planets*, Grinspoon investigates the big questions: How widespread are life and intelligence in the cosmos? Is life on Earth an accident or in some sense the "purpose" of this universe? And how can we, working from the Earth-centric definition of "life," even begin to think about the varieties of life-forms on other planets? In accessible, lively prose, and using the topic of extraterrestrial life as a mirror with which to view human beliefs, evolution, history, and aspirations, Grinspoon takes readers on a three-part journey. History is an overview of our expanding awareness of other planets, from the observations of seventeenth-century natural philosophers to modern-day

space exploration. It traces the history of our ideas on alien life to the earliest days of astronomy, and shows how these beliefs have changed with humanity's evolving self-image. Science tells the story of cosmic evolution and the evolution of life on Earth. Here, Grinspoon disputes the recent "Rare Earth hypothesis," which argues that Earth is unique for sprouting advanced life-forms, maintaining instead that life is likely to be well adapted to a wide variety of planets. He questions conventional assumptions of what is required for a planet to come to life, scrutinizing current ideas and evidence for life on Mars, Venus, and the moons of Jupiter, and challenging readers to think about other life-forms that may exist on other worlds. Belief discusses the limits of our abilities to conceptualize or communicate with intelligent aliens living on planets circling distant stars. Grinspoon speculates on what intelligent life might become, eventually, on Earth and elsewhere, and the implications, both scientific and philosophical, of these far-future evolutionary possibilities. Written with authority and edge, and rich in personal, often amusing anecdotes, Lonely Planets explores the shifting boundary between planetary science and natural philosophy and reveals how the search for extraterrestrial life unites our spiritual and scientific quests for connection with the cosmos.

Lonely Planet's guide to self-proclaimed nations takes a curious look at some of the most curious places on the planet. This is a fully illustrated, humorous mock-guidebook to the nations that people create in their own backyards--most of which can be visited. The Republic of Molossia, for example, can be found at 226 Mary Lane, Dayton, Nevada, and was formed in 1977 under the auspices of the UN's International Covenant on Civil and Political Rights, which recognizes that all people have the right to self-determination. It is headed by His Excellency, Keven Baugh (b. 1962) and has a population of four. While Micronations is tongue-in-cheek, it is also informative and good reading, profiling a global selection of micronations, complete with facts and figures, cultural information, things to see and do, getting there and away, and full colour photographs and maps. Interviews provide insight into the quirky characters who've set themselves up as presidents, emperors and serene highnesses.

Ukraine is something of an enigma for the visitor. The largest country in Europe, it remains one of the least visited, yet it has retained the rustic beauty of old-world eastern Europe, and its place names are heavy with historical significance: Kiev, Crimea, Sevastopol, Odessa, Chernobyl. This fully updated third edition of Bradt's Ukraine guide keeps visitors up to speed with this rapidly evolving country. Covering everything from the best places for borsch to the best walks along the Black Sea – alongside an in-depth exploration of Ukraine's history, culture and natural beauty – this is the most comprehensive and practical guide available to a destination as yet undiscovered by the tourist crowds.
