President of Technomart, to obtain consistent returns in the stock market. Most investors fail to exceed the returns represented by the Standard and Poor's Stock Index, but Parnes often does using his investment philosophy. This book outlines his method of stock assessment, providing an understandable formula. If the formula tells a reader to buy a stock, then, as explained, there is a significant chance that stock will go up. If the formula tells a reader to short a stock, then the book shows how there is a significant chance that the stock will go down. Parnes advocates the use of short selling as a long-term strategy in combination with long positions, so advisors and individual investors alike can profit in both rising and falling markets. While most investing books focus on how to make money over the long term in a rising markets, Parnes's focus on short selling as a way of capturing volatility sets this book apart from the crowd. He offers insights into the difference between option trading and shorting which make his system useful in both type of markets.

A time to reflect on my seventy years of life. Maybe some folks will be interested in my life and the folks I have met, or maybe not. This is a non-traditional memoir, filled with alphabetical vignettes not chronological ones. I have made a foray into fiction with an asterisk: in those cases where I have marked the vignette as fictional, it might be 100 percent not true, but in many cases I knew of, was part of, or heard from others about the story itself. At any rate, the entire book is my recollection of things past, and as in all recollections, the more distant the memory the clearer the details.

We always hear stories about how the stock market could crash, about the alarming number of bankruptcies and home foreclosures, inflation, and the skyrocketing national debt that could all cause our extremely fragile economic system to simply collapse. Have you ever asked yourself what you will do if you wake up one ordinary day only to find out that the paper money in your wallet no longer holds any value to it?

There are many people and reputable economists today who believe that such a day is soon coming. Regardless of whether you believe the economy will collapse soon or not, one thing is certain: if it does collapse, it will easily create the biggest havoc throughout our country that we have ever seen. People will riot in the streets of big cities and small towns alike, and the world as you know it will completely change. No longer will you drive off to work each morning to earn money, no longer will you be able to buy what you need in the local grocery or convenience store, and no longer will you be able to enjoy food at restaurants. What's worse, is that an economic collapse will most certainly NOT be a short term disaster scenario. Rather, it will last several months if not years. What this means for you is what while there are many different potential disasters that could come your way, an economic collapse will easily be one of the most critical ones to prepare for. Once paper money becomes worthless, the items that will suddenly skyrocket in value are the ordinary items that we use every day. These are the items that you need to store not only for yourself, but for bartering and trading purposes as well, and they are the items we are going to cover in this book. Most survivalists and preppers will recommend to you that you stockpile supplies for you and your family to live off to outlast a disaster. I'm not at all disagreeing with that, but I would say that you should make a separate smaller stockpile of ordinary items that you could use for bartering and trading in a post-economic collapse world as well. The logic here is simple: when paper money becomes worthless, the new currency will become simple items that we need to use every day (food, water, toilet paper, soap, medicines, etc.). The whole purpose of bartering is to trade something that you have but that isn't as valuable to you for something that is valuable to you but that you don't have. In a long term SHTF situation, bartering and trading is

going to become a part of your everyday life. Since there will no longer be any stores where you can go to purchase whatever you want or need, you will be forced to negotiate with other people instead. If you are running low on a particular item that you need for your survival, you better have something valuable that you can give in return. This is why it's important to have trading commodities that are universally recognized for their value, and this book will go over fifty two of the most valuable commodities that you can barter in a post grid down world and the reasons for each.

800-CEO-READ BESTSELLER Featured in Fortune, Harvard Business Review, and Entrepreneur, *Go Long* is "mandatory reading for the CEOs and boards of all public companies," according to David M. Inspired by the CEO Academy, the annual off-the-record gathering of chief executives organized by the authors, reveals how some of the world's most prominent business leaders resisted short-term pressures to successfully manage their organizations for the long term, and in turn, aim to create more jobs, more satisfied customers, and more shareholder wealth. When the author's mother died he discovered over 200 letters in a shoe box that his father had written to her during their separation during World War II. Captain Lashley was stationed first at a hospital in England as a supply officer and then as the commander of a prisoner of war camp in France. During those months his letters tell of the events of his life. Some are boring and seem to be of little consequence, others are filled with emotional turmoil. Rene Lashley, his wife, has his fourth child while he is away, moves in with her mother and sister and raises her other three children. Kirk, the second son, is puzzled by what is happening, but continues doing those things a normal child does. The book is an effort to show the common, everyday concerns of all the family members in what is an unprecedented time in the life of the family and the world. The story is told through the voices of the soldier, the mom, and the child.
