Book description goes here.

Jean Kinney, Lecturer in Community and Family Medicine at Dartmouth Medical School, was the Associate Director of the Alcohol Counselor Training Program at Dartmouth conducted between 1972 and 1978. That program was the impetus for this text. Upon completion of the Alcohol Counselor Training Program, she became involved with Project Cork, a program established to develop and implement a model curriculum for medical student education and to create materials for health care professionals. She continues to be involved in professional development initiatives in the substance abuse field. In 1999, she was the first recipients of the Harold Hughes Award given annually by the National Institute of Medicine's National Institute on Alcohol Abuse and Alcoholism. It is given in recognition for efforts to assist in the translation of scientific research into clinical practice. Loosening the Grip was one of her efforts cited in this award. Accessible and comprehensive, Loosening the Grip remains an authoritative source for information about alcohol use and the problems associated with it, while also addressing the relationship between alcohol use and other drug use. This text presents the physical and psychological effects of alcohol alongside the impact of alcohol use on family and society. Special attention is given to addressing the range of responses to alcohol problems, prevention, harm reduction, brief treatment, engagement in treatment and aftercare, and addressing high risk drinking. Along with providing a historical foundation for the discussion of substance use, the book explains the facts about this complex issue in clear, engaging language. Loosening the Grip is widely recognized as a useful resource for future and current health care workers - substance abuse clinicians, school counselors, mental health workers, community nurses, and others.

A new edition of an occult classic, which includes a new introduction by Mary K. Greer, author of *Women of the Golden Dawn*, and a new afterword with excerpts from rarely seen documents by Fortune herself describing how the book came about. After finding herself the subject of a powerful psychic attack in the 1930s, famed British occultist Dion Fortune wrote this detailed instruction manual on protecting oneself from paranormal attack. This classic psychic self-defense guide explains how to understand the signs of a psychic attack, vampirism, hauntings, and methods of defense. Everything you need to know about the methods, motives, and physical aspects of a psychic attack and how to overcome it is here, along with a look at the role psychic elements play in mental illness and how to recognize them. This is one of the best guides to detection and defense against psychic attack from one of the leading occult writers of the twentieth century.

The nationally syndicated columnist and Reason magazine editor presents a damning portrait of how politicized government agencies, antidrug activists, and a naïve national media have exaggerated the public's fears of the harmful effects of recreational drugs. Jacob Sullum goes beyond the debate on legalization or the proper way to win the "war on drugs," to the heart of a social and individual defense of using drugs. *Saying Yes* argues that the all-or-nothing thinking that has long dominated discussions of illegal drug use should give way to a wiser, subtler approach exemplified by the tradition of moderate drinking. *Saying Yes* further contends that the conventional understanding of addiction, portraying it as a kind of chemical slavery in which the user's values and wishes do not matter, is also fundamentally misleading.

Intended for machinery, mechanism, and device designers; engineers, technicians; and inventors and students, this fourth edition includes a glossary of machine design and kinematics terms; material on robotics; and information on nanotechnology and mechanisms applications.

WHAT AN INSTRUCTOR SAYS ABOUT LOOSENING THE GRIP: "Loosening the Grip is, and has been the standard setter in the addiction profession since first publication in 1978. My first experience with the text occurred as a student in 1999, and I literally devoured the text, which was filled with material about alcohol, its effects on the body and mind, and how to best treat the condition of alcohol use disorder. I now am a licensed addiction counselor and addiction educator, and as such utilize this text exclusively in my alcohol course within our accredited addiction counseling and prevention program. This is not only an essential encyclopedia on all things concerning alcohol addiction and recovery, but includes materials about other substances of abuse, along with materials on co-occurring mental health disorders. Students state that they love this book as much as I did in 1999, and this creates a much higher level of retention in our major and minor. I plan to continue using this very engaging, accurate and useful book for many years to come." --John Korkow, LAC, PhD, SAP
