Mexico's Drug War and Criminal Networks examines the effects of technology on three criminal organizations: the Sinaloa cartel, the Zetas, and the Caballeros Templarios. Using social network analysis, and analyzing the use of web platforms Facebook, Twitter, and YouTube, Nilda M. Garcia provides fresh insights on the organizational network, the central nodes, and the channels through which information flows in these three criminal organizations. In doing so, she demonstrates that some drug cartels in Mexico have adopted the usage of social media into their strategies, often pursuing different tactics in the search for new ways to dominate. She finds that the strategic adaptation of social media platforms has different effects on criminal organization's survivability. When used effectively, coupled with the adoption of decentralized structures, these platforms do increase a criminal organization's survival capacity. Nonetheless, if used haphazardly, it can have the opposite effect. Drawing on the fields of criminology, social network analysis, international relations, and organizational theory and featuring a wealth of information about the drug cartels themselves, Mexico's Drug War and Criminal

"In this vibrant new history, Phil Tiemeyer details the history of men working as flight attendants.

Beginning with the founding of the profession in the late 1920s and continuing into the post-September 11 era, *Plane Queer* examines the history of men who joined workplaces customarily identified as female-oriented. It examines the various hardships these men faced at work, paying particular attention to the conflation of gender-based, sexuality-based,

and AIDS-based discrimination. Tiemeyer also examines how this heavily gay-identified group of workers created an important place for gay men to come out, garner acceptance from their fellow workers, fight homophobia and AIDS phobia, and advocate for LGBT civil rights. All the while, male flight attendants facilitated key breakthroughs in gender-based civil rights law, including an important expansion of the ways that Title VII of the 1964 Civil Rights Act would protect workers from sex discrimination. Throughout their history, men working as flight attendants helped evolve an industry often identified with American adventuring, technological innovation, and economic power into a queer space."--Publisher's website.

Sex. Who really knows sex? I mean, we've all had sex, great sex even but when you get down to the details, how many of us actually see sex for the raw, primal act that it is? I thought I knew sex. I've had sex. Heck, I've felt lust. Once, I've even felt love. I thought I knew exactly what sex was. Until I met Cade. He's the meaning of sex. He's a biker. He's dangerous. He's powerful. He's dominant. He wants me. My world is about to change, for the better? I don't know. But here's my story, I hope you're ready for it because it's not the beautiful, heart wrenching story most people have to tell. It's passionate, forbidden, morally incorrect and downright, fucking beautiful.

The idea for this anthology came about after more than 100 of San Mateo County's high school students spent December of 2020 attending poetry workshops and crafting inaugural poems. Partly inspired by the Academy of American Poets' 2021 Inaugural Poem Contest, we challenged San Mateo County's youth to write about their views, their experiences and their hopes for America. Our purpose is not only to amplify the voices of our young people, but also acknowledge that they are co-authors of our national and community narrative, and of the spaces which they inhabit.

book, Watson shares his finest work, demonstrating that while each of these homes is as unique as its owner, they all adhere to principles that transform a mere series of spaces into a genuine, coherent home: warmth; light; peace; comfort; balance; proportion; livability; and last but not least, appropriateness. Whether in an Italianate villa in Los Cabos or a family idyll on a Swedish island, a Gramercy Park apartment that blends shimmer and restraint, or a Newport Beach cottage warmed by walls finished in egg-yolk yellow, Watson explains how he translated each family's lifestyle and aspirations, the house's history, and the surrounding environment into a highly original form of elegance—and how anyone can discover his or her own. Beautifully photographed with lavish images of Watson's work, this inspiring book is a must-have for interior design lovers.

They called it Satan's Circus—a square mile of Midtown Manhattan where vice ruled, sin flourished, and depravity danced in every doorway. At the turn of the twentieth century, it was a place where everyone from the chorus girls to the beat cops was on the take and where bad boys became wicked men; a place where an upstanding young policeman such as Charley Becker could become the crookedest cop who ever stood behind a shield. Murder was so common in the vice district that few people were surprised when the loudmouthed owner of a shabby casino was gunned down on the steps of its best hotel. But when, two weeks later, an ambitious district attorney charged Becker with ordering the murder, even the denizens of Satan's Circus were surprised. The handsome lieutenant was a decorated hero, the renowned leader of New York's vice-busting Special Squad. Was he a bad cop leading a double life, or a pawn felled by the sinister rogues who ran Manhattan's underworld? With

appearances by the legendary and the notorious—including Big Tim Sullivan, the election-rigging vice lord of Tammany Hall; future president Theodore Roosevelt; beloved gangster Jack Zelig; and the newly famous author Stephen Crane—Satan's Circus brings to life an almost-forgotten Gotham. Chronicling Charley Becker's rise and fall, the book tells of the raucous, gaudy, and utterly corrupt city that made him, and recounts not one but two sensational murder trials that landed him in the electric chair.

A paradigm-shifting diet plan that allows you to eat anything you want, as much as you want—and still strip away 20, 40, 60 pounds, or more. After conducting extensive research at the Salk Institute and the National Institute on Aging, poring over copious amounts of new research in intermittent fasting, and engaging 2,000 people for a test panel, bestselling authors David Zinczenko and Peter Moore determined that people can lose remarkable amounts of weight eating the foods they like best—as long as they eat within a set 8-hour time period. Fasting is, of course, an ancient spiritual and health practice, but it's also a way to sidestep many of the ills of the modern world—including diabetes, heart disease, and cognitive impairment. Zinczenko and Moore demonstrate how simply observing this timed-eating strategy, even just three days a week, will reset your metabolism so that you can enter fat-burning mode first thing in the morning—and stay there all day long. And by focusing on eight critical, nutrient-rich Powerfoods, you can build in a second layer of protection against Alzheimer's, heart disease, and even the common cold. In the book, you will find motivating strategies, delicious recipes, and an 8-minute workout routine to maximize calorie burn. The 8-Hour Diet promises to strip away unwanted pounds and give you the focus and willpower you need to reach your goals for weight loss and life.

friendly. Jacob Brown wasn't even born yet the first time they attacked Earth. He was only fourteen the second time it happened. When Earth finally came together and fielded its first spaceborne military, Jacob didn't hesitate to volunteer. Serving aboard a mighty starship, he'd be able to defend his planet-and his family-when, inevitably, they came again. Just as he's about to graduate training, however, Jacob is approached by an officer from Naval Special Operation Command and given a choice: volunteer for a risky mission to a dangerous, lawless world, or give up his dream of serving in the military and go home. He has no idea why he's being singled out in such an unusual manner, but now it's either agree to their demands or give up his dream of being on a starship. Soon, getting his career back on the right track will be the least of his concerns when it seems like everyone-and everything-he meets is trying to kill him. When he stumbles upon a secret most people on Earth are blissfully unaware of he realizes it's not just the aliens he needs to be worried about. AMC's episodic drama *Mad Men* has become a cultural phenomenon, detailing America's preoccupation with commercialism and image in the Camelot of 1960s Kennedy-era America, while self-consciously exploring current preoccupations. The 12 critical essays in this collection offer a broad, interdisciplinary approach to this highly relevant television show, examining *Mad Men* as a cultural barometer for contemporary concerns with consumerism, capitalism and sexism. Topics include New Historicist parallels between the 1960s and the present day, psychoanalytical approaches to the show, the self as commodity, and the "Age of Camelot" as an "Age of Anxiety," among others. Marine First Lieutenant Jacob Brown is bored. For months he's been sitting around on an alien planet, waiting for command to recall his scout team so they could rest and be re-outfitted. The team went through hell during their previous mission, losing both their commanding officer and their ship. For now, Jacob was acting CO of Scout Team Obsidian and their ship was a broken down old surplus combat shuttle they'd stolen from narco-smugglers on a planet called Niceen-3. When command finally does reach out, however, it isn't to order Obsidian home for some much needed R&R. Instead, they are being reactivated and sent out into the contested space of the recently conquered Eshquarian Empire to track down a single Terran cruiser called the Eagle's Talon. The Talon's captain has gone rogue and is operating within a fleet of ships bent on open rebellion against the quadrant's only remaining superpower. If that ship is discovered within the rebel fleet, Earth will bear the brunt of the ConFed's reprisal. Jacob's team is in a race against time to locate the missing ship and her rogue captain so that a Navy strike force can swoop in and reclaim her... or destroy her.

Life dealt him a dead man's hand. Lucky had always led a life of service. Always put his life on the line for someone else, managing to survive by pure luck and skill. After bringing an end to a multi-state drug ring, he was finally able to live the life he had wanted as a Last Rider... A good man would walk away and not touch the curvy woman who had been tugging on his heartstrings. Lucky wasn't a good man. Therefore, the bad-ass biker in him had a choice: once again become the man he had pretended to be and stake his claim, or take the devil's highway. Some girls had all the luck. Willa wasn't one of them. All she wanted to do was give a home to the children she had made orphans. Instead, she found herself needing help from the man who had left the pulpit behind to embrace a life of sin. Painfully shy and withdrawn she wanted a quiet life, a simple man, and well-behaved children. The last thing she had ever expected was for Lucky to want her size twenty body and show her a passion that would lead her straight to hell. \*WARNING\* This work of fiction is intended for mature audiences only. New discoveries have led to more unanswered questions, created deeper mysteries, and brought us to the brink of forbidden territory when it comes to explaining our origin and existence. These discoveries reveal the following facts: - Fact 1. Our origin--Modern humans appeared suddenly on earth approximately 200,000 years ago, with the advanced brain, nervous system, and capabilities that set them apart from all other known forms of life already developed, rather than having developed slowly and gradually over a long periods of time.- Fact 2. Missing physical evidence--The relationships shown on the conventional tree of human evolution are speculative connections only. While they are believed to exist, a 150-year search has failed to produce the physical evidence that confirms the relationships shown on the evolutionary family tree.- Fact 3. New DNA evidence--The comparison of DNA between ancient Neanderthals, previously thought to be our ancestors, and early humans tells us that we did not descend from the Neanderthals.- Fact 4. A rare DNA fusion--Advanced genome analysis reveals that the DNA that sets us apart from other primates, including in our advanced brain and nervous

system, is the result of an ancient and precise fusion of genes occurring in a way that suggests something beyond evolution made our humanness possible.- Fact 5. Our extraordinary abilities--We are born with the capacity to self-heal, to self-regulate longevity, to activate an enhanced immune response, and to experience deep intuition, sympathy, empathy, and, ultimately, compassion--and to do each of these on demand.In this book, New York Times best-selling author and 2017 Templeton Award nominee Gregg Braden crosses the traditional boundaries of science and spirituality to answer the timeless question at the core of our existence--Who are we?--and to reveal science-based techniques that awaken our uniquely human experiences of deep intuition, precognition, advanced states of self-healing, and much more! Beyond any reasonable doubt, Human by Design reveals that we're not what we've been told, and much more than we've ever imagined.
