As the indicator of transformation and the starting point for understanding all factors in the natal chart, Pluto is one of the most important planets to focus on in chart analysis. This inspiring book teaches you the key essentials of chart interpretation by focusing on Pluto and the locations of your north and south nodes, so you can figure out the steps you need to take in order to grow-and ultimately discover your soul's karmic mission.

Grief doesn't discriminate. It will touch all of us at some point; an uninvited guest that can't be shown the door, that takes over our lives and changes us forever. In this gut-wrenchingly beautiful book, Darrelyn Gunzburg shows us how knowing the shape of grief and its consequences over time give edges and boundaries to this dark pathway, revealing that through the prickly branches and the mist, life awaits us at the edge of the forest, dressed in cloths of gold and sustained with love and warmth. Helping ourselves first means we gain the wisdom that grief gives us to help others on their unique journey to encounter a changed future with focus, determination, and understanding when grief comes to call. To allow someone in grief to give voice to their experiences is not just being kind. It is saving their life.

It paints your emotional landscape day by day and reveals the tides that wash over your life as the Moon drives her daily course. Once a primary tool of every professional astrologer, this invaluable technique has often been neglected because of its demanding subtlety and complexity. In this book, long-time astrological innovator John Townley has cut to the core of how and why to use the Lunar Return, giving the student or professional astrologer the keys to the heart and the pulse of each and every month. Horary astrology is a fascinating and exacting technique, and here is the perfect book to hone your skills. Author Petros Eleftheriadis presents over fifty valid charts taken from his client files which demonstrate, in clear steps, how to reach an answer. He stresses the importance of starting with the correct question; for instance, he doesn't accept 'Should I?' questions, saying 'Astrology charts cannot possibly show something that will NEVER materialize, something that will never become reality, so they cannot show how your life would be, had you made another decision.' So rather than asking whether you will win the lottery if you buy a ticket, the correct action would be to buy the ticket then ask if you will win. Ideal for students and professionals with some knowledge of horary astrology.

A beautiful book which for the first time explores the relationship between the cycles of Venus and Mars and their impact on our lives. Using many case histories the author shows how, although synastry is important, possibly of greater importance is the aspect between the two planets within their cycles because that can dictate the timing of key moments in a relationship. She shows how the degree of the original conjunction between the two planets ('the degree of passion'), based on the time of birth can indicate the kind of the people we are attracted to and the course a romance can follow. A really absorbing book which will prompt hours of research

Panchanga is an ancient vedic technique which has disappeared from current practice. It is used to discover the strength of the different sources of 'light' in the natal chart which show one's response to the challenges of life. This book shows how relevant this technique is to life.

Medical astrology is a fascinating subject, yet undoubtedly a rather challenging one. In this work however, the author attempts to ease the path towards greater understanding of traditional astrological principles regarding health, as well as introducing some new experiential ideas. These have been developed through her long practice in this field. What can sometimes be helpful in studying a chart is to understand the psychological underlay to medical conditions inherent in the cosmic pattern. The many charts included in this work from the author's own casebook as well as the charts of some public figures both current and historical, suggest guidelines for interpretation. This book is recommended for anyone who is interested in exploring medical astrology in greater depth, and perhaps including some aspects of it in their own astrological work.

Beautiful folk tales that show you the different personalities behind each star sign.

Despite incredible and previously undreamed-of advances in modern medicine, for many women the issue of infertility remains a heart-breaking reality. Using a combination of traditional and modern astrological techniques, the author has delved deeply into the charts of hundreds of infertile women, and in many cases has unravelled what might be at the root of the problem. Sometimes it's a matter of location or timing, or it could be psychological issues in the relationship that are causing the block; whatever the reason, the author works closely with the couple - and often the medical profession - to produce results that are frequently positive where there has been no hope before. Although this is an advanced textbook for astrologers, the human element of the case histories is nothing short of inspiring, and from that perspective can be enjoyed by readers with no knowledge of astrology.

Bringing together some of the most recognized and influential researchers and scientists in various space-related disciplines, *Lunar Settlements* addresses the many issues that surround the permanent human return to the Moon. Numerous international contributors offer their insights into how certain technological, physiological, and psychological challenges must be met to make permanent lunar settlements possible. The book first looks to the past, covering the Apollo and Saturn legacies. In addition, former astronaut and U.S. Senator Harrison H. Schmitt discusses how to maintain deep space exploration and settlement. The book then discusses economic aspects, such as funding for lunar commerce, managing human resources, and commercial transportation logistics. After examining how cultural elements will fit into habitat design, the text explores the physiological, psychological, and ethical impact of living on a lunar settlement. It also describes the planning/technical requirements of lunar habitation, the design of both manned and modular lunar bases, and the protection of lunar habitats against meteoroids. Focusing on lunar soil mechanics, the book concludes with discussions on lunar concrete, terraforming, and using greenhouses for agricultural purposes. Drawing from the lunar experiences of the six Apollo landing missions to the many American and Soviet robotic missions to current space activities and research, this volume summarizes the problems, prospects, and practicality of enduring lunar settlements. It reflects the key disciplines, including engineering, physics, architecture, psychology, biology, and anthropology, that will play significant roles in establishing these settlements.

Do you know the Bowl from the Basket shape in a natal chart? Did you realise just how much information you can gain from examining the actual pattern of the planets in the chart? No matter how knowledgeable we are about astrology, natal chart analysis can still present a challenge - however, understanding chart shapes could make all the difference. In this fascinating study, Wanda Sellar pinpoints an effective route into the astrological labyrinth using a concept which was pioneered by Marc Edmund Jones and then followed by Robert Jansky in the last century. Each chart shape has its own central theme: a Locomotive shape has its starting point with the leading planet which may be in any house or sign, a See-Saw shape begins with the core opposition, a Wedge with the confining trine. Not all charts fit neatly into one of the idealised patterns, and those that take a little coaxing are still a revelation in interpretation. Sometimes it is the planet that stands outside the idealised shape that reveals the core of the personality. This treasure trove includes a multitude of worked case histories, including Arnold Schwarzenegger, Mata Hari, George Blake, Bobby Fischer, Harrison Ford and Agatha Christie. This fascinating and accessible book is suitable for all levels.

The first in-depth analysis of how an individual's natal horoscope reveals the unique challenges and opportunities of midlife. Between the ages of thirty-seven and forty-one, something mysterious takes place within the psyche. Jung called this phase our "unlived life," assuming rightly that midlife did not inaugurate a time of rapid decay, loss of libido, and inevitable death—but rather ushered in a period in which one might review one's life and build upon a strong foundation toward the next phase of adulthood. Acclaimed astrologer Erin Sullivan takes us through the vast changes that astrology reveals as we reach middle age. It is a moment in life that is characterized by the planet Uranus, one filled with opportunities to both rethink the past and move forward toward the future, "witnessing" our lives in the way Uranus connotes. There exist no maps of the terrain—except the natal horoscope.
