'Only when one has lost all curiosity about the future has one reached the age to write an autobiography.' Waugh begins his story with heredity, writing of the energetic, literary and sometimes eccentric men and women who, unknown to themselves, contributed to his genius. Save for a few pale shadows, his childhood was warm, bright and serene. The Hampstead and Lancing schooldays which followed were sometimes agreeable, but often not. His life at Oxford - which he evokes in *Brideshead Revisited* - was essentially a catalogue of friendship. His cool recollection of those hedonistic days is a portrait of the generation of Harold Acton, Cyril Connolly and Anthony Powell. That exclusive world he recalls with elegant wit and precision. He closes with his experiences as a master at a preparatory school in North Wales which inspired *Decline and Fall*.

When Samantha starts at her new school, she faces new bullies and cheaters. With a goal of gaining access into the Advanced Ballet class, Samantha soon discovers her dreams may be only that: Dreams. Before the instructor will even see her, she must somehow gain his attention, no small feat when she's blocked at every turn. Luckily, Samantha starts her new school life with friends and family there to help her along the way. But will they be enough? The bullies seem too interested in her and her friends, and accidents lead to dangerous situations. If that's not exciting enough, Samantha's heart seems unable to resist fluttering every time she's near Samuel. Will dance practice and a school project bring them closer together, or will it cause Samuel to push her away?

Since the 13th century, a few special public clocks have included the movement of the sun, moon, earth and other planets, and from those early days Jacks were devised as human figures which actually "struck" the hours. Soon thereafter, automata appeared as mechanical figures that performed many and various acts, such as the four knights on horseback who joust

on the hour at the Wells Cathedral in England. Over 300 clocks, for buildings or tabletops, which do far more than tell time, are presented here with concise historical explanations, detailed drawings, and clear color photography. 22 chapters examine the amazing mystery, novelty, and fantasy clocks that display magical acts, appear to require no power to drive them, or have no apparent connection between the movement and the hands. Famous makers in England, Germany, France, and Switzerland created these special clocks which became treasures of royalty throughout Europe and Asia, particularly in Chinese courts. Clocks with mysterious, novel, and fantastic features continue to be made up to the present for retailers such as Asprey and Cartier. For over 700 years these amazing clocks have delighted and challenged all who witness their makers' ingenuity.
