Since its birth in 1781, Los Angeles has come to define both the material and spiritual force of American civilization. The American dream is realized, experienced, and lost in the City of Angels. *Unmasking L.A.: Third Worlds and the City*, an interdisciplinary collection of essays, dialogues, and photographs, seeks to reveal the third world geographies, cultures, and populations of Los Angeles. It examines the social, political, cultural, and literary climate of the city, bringing together diverse responses to the complexities facing Los Angeles from respected intellectuals, writers, and artists such as Mike Davis, Deepak Chopra, and Gayatri Chakravorty Spivak. By uncovering the forces that marginalize Los Angeles's ever-shifting populations into internal third worlds, the collection unmasks the raw contradictions, the grim paradoxes, and the understated ironies of the global city. Perhaps the most popular from all of Shakespeare's comedies, humorously celebrates the vagaries of love. The approaching wedding festivities of Theseus, Duke of Athens, and his bride-to-be, Hippolyta, Queen of the Amazons, are delightfully crisscrossed with in-again, off-again romances of two young pairs of Athenian lovers; a fateful rivalry between the King and Queen of the Fairies; and the theatrical aspirations of a bumbling troupe of Athenian laborers. It all ends happily in wedding-night revelry complete with a play-within-a-play presented by the laborers to the ecstatic amusement of all.

"The latest advance in cognitive poetics" (back cover of dust jacket), based on analysis of English-language literature within a wide-ranging theoretical framework. Migration has become a structural part of the globalized society in which we live and, as such, it is essential to determine the causes and effects it produces in the involved social groups. Sociolinguistics has a very important role to play in this respect, insofar as its object of study focuses precisely on the analysis of the interrelationships between the linguistic and the social dimensions. This volume presents a series of proposals that involve theoretical approaches, models, and applications related to the process of sociolinguistic integration in contact situations arising from migration. The volume includes studies of general interest which present models and theoretical foundations for the analysis of this process of integration, as well as others which focus on other more specific aspects, such as how migration influences the construction of individual identity, emotional and affective factors in the preservation of the heritage language, and the processes of interlingual convergence that take place in situations of migratory contact. This volume also contains the didactic dimension applied to the immigrant population, with proposals for teaching with proven effectiveness. the way cities develop with the mounting evidence of resource depletion and the negative environmental impacts of predominantly urban-based modes of production and consumption. This book aims to re-politicise the relationship between urban development, sustainability and justice, and to explore the tensions emerging under real circumstances, as well as their potential for transformative change. For some, cities are the root of all that is unsustainable, while for others cities provide unique opportunities for sustainability-oriented innovations that address equity and ecological challenges. This book is rooted in the latter category, but recognises that if cities continue to evolve along current trajectories they will be where the large bulk of the most unsustainable and inequitable human activities are concentrated. By drawing on a range of case studies from both the global South and global North, this book is unique in its aim to develop an integrated social-ecological perspective on the challenge of sustainable urban development. Through the interdisciplinary and original research of a new generation of urban researchers across the global South and North, this book addresses old debates in new ways and raises new questions about sustainable urban development. .

This volume assesses one of the most important developments in contemporary Latin American women's movements: the engagement with rights-based discourses. Organised women have played a central role in the continued struggle for democracy in the region and with it gender justice. The foregrounding of human rights, and within them the recognition of women's rights, has offered women a strategic advantage in pursuing their goals of an inclusive citizenship. The country-based chapters analyse specific bodies of rights: rights and representation, domestic violence, labour rights, reproductive rights, legal advocacy, socio-economic rights, rights and ethnicity, and rights, the state and autonomy.

Spanish Graphic Narratives examines the most recent thematic and critical developments in Spanish sequential art, with essays focusing on comics published in Spain since 2007. Considering Spain's rich literary history, contentious Civil War (1936–39), oppressive Francisco

Franco regime (1939–75), and progressive contemporary politics, both the recent graphic novel production in Spain and the thematic focal points of the essays here are greatly varied. Topics of particular interest include studies on the subject of historical and personal memory; representations of gender, race, and identity; and texts dealing with Spanish customs, traditions, and the current political situation in Spain. These overarching topics share many points of contact one with another, and this interrelationship (as well as the many points of divergence) is illustrative of the uniqueness, diversity, and paradoxes of literary and cultural production in modern-day Spain, thus illuminating our understanding of Spanish national consciousness in the present day.
