his textbook is designed to teach a first course in Information Technology (IT) to all undergraduate students. In view of the all-pervasive nature of IT in today's world a decision has been taken by many universities to introduce IT as a compulsory core course to all Bachelor's degree students regardless of their specialisation. This book is intended for such a course. The approach taken in this book is to emphasize the fundamental "Science" of Information Technology rather than a cook book of skills. Skills can be learnt easily by practice with a computer and by using instructions given in simple web lessons that have been cited in the References. The book defines Information Technology as the technology that is used to acquire, store, organize, process and disseminate processed data, namely, information. The unique aspect of the book is to examine processing all types of data: numbers, text, images, audio and video data. As IT is a rapidly changing field, we have taken the approach to emphasize reasonably stable, fundamental concepts on which the technology is built. A unique feature of the book is the discussion of topics such as image, audio and video compression technologies from first principles. We have also described the latest technologies such as 'e-wallets' and 'cloud computing'. The book is suitable for all Bachelor's degree students in Science, Arts, Computer Applications, and Commerce. It is also useful for general reading to learn about IT and its latest trends. Those who are curious to know, the principles used to design jpg, mp3 and mpeg4 compression, the image formats—bmp, tiff, gif, png, and jpg, search engines, payment systems such as BHIM and Paytm, and cloud computing, to mention a few of the technologies discussed, will find this book useful. **KEY FEATURES** • Provides comprehensive coverage of all basic concepts of IT from first principles • Explains acquisition, compression, storage, organization, processing and dis-semination of multimedia data • Simple explanation of mp3, jpg, and mpeg4 compression • Explains how computer networks and the Internet work and their applications • Covers business data processing, World Wide Web, e-commerce, and IT laws • Discusses social impacts of IT and career opportunities in

IT and IT enabled services • Designed for self-study with every chapter starting with learning objectives and concluding with a comprehensive summary and a large number of exercises.

MAHARASTRA HSC QB Malcolm Forbes said “Education's purpose is to replace an empty mind with an open one” and this is something which is always followed by Maharashtra State Board of Secondary & Higher Education (MSBSHSE). The aim of the Board is not just to let learners obtain basic knowledge but to make them life-long learners. The purpose of this book is to nurture individuality and thus enhance one's innate potentials which help in increasing the self-study mode for students. This book strengthens knowledge and attitude related to subject. This book is designed in such a way that students can set their own goals and can improve their problem solving and thinking skills. This book is strictly as per the latest Maharashtra Board Curriculum for HSC Exams. It contains variety of questions from latest textbooks. It contains all types of questions like VSA Questions (Very Short Answer), SA Questions (Short Answer), MCQs (Multiple Choice Questions) and LA Questions (Long Answer). A synopsis is given for every chapter which contains important points from that chapter. Each chapter has high quality figures wherever required for better, fast and clear understanding. OSWAAL HSC Question Bank is different and better in terms of High Quality Questions which are developed by 'OSWAAL Expert Panel'. The Question Bank is strictly based on the latest MSBSHSE Textbooks and is arranged 'TOPIC-WISE' where each Topic from every Chapter is explained in detail. Through OSWAAL Books students are taught how to think, not what to think. We at OSWAAL Books try to use quality content, standard language, creativity and high quality figures, which makes learning easy and fun. This is one of the reasons that the scope of this book extends from students to teachers. Teachers can use this book as a perfect teaching guide and students can use this book for good learning and practice. The X-Ray Technician Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. Snehal Shah believes in making architecture that is 'of its time', as a Gujarati proverb states, vakhat tevu vaju. History confirms that buildings appropriate to their time, place and climate, endure. In learning to build, his architecture adopted a variety of expressions -- with the constant being the will to manipulate light and ventilation to the best advantage. He studies vernacular techniques as well as learns from wider Indian exemplars and also Western architectural history. References from all these find their way into his buildings, along with his debt to the geometry of Louis Kahn and Mario Botta. In this book, Shah exhibits the work of 25 years in practice. He describes his concerns and development as an architect in parallel with the emergence of India onto the world stage as a mighty, populace, modern nation rich in contradictions. Snehal Shah studied at CEPT University, Ahmedabad, graduating in 1980. Earning his masters degree from the Architectural Association Graduate School in London, he

returned to India in 1987 and began practice in Ahmedabad.

Today's educators stand at the crossroads of globalization and technology. The world is rapidly shrinking. The workplace is being transformed before our very eyes. Technology is forever changing the way we perceive reality and the way we do business.

Educators are required to equip students for a workplace that has yet to emerge. The skill sets of today's job market are often obsolete before students can enter the workplace. Now is the time for educators to rise to the challenges of our modern world. By embracing the vision of yesterday's practitioners and joining hands with tomorrow's practitioners, educators can transform our world and equip their students for the upward mobility and career flexibility required in tomorrow's workplace.
