The Indian Constitution is one of the world's longest and most important political texts. Its birth, over six decades ago, signalled the arrival of the first major post-colonial constitution and the world's largest and arguably most daring democratic experiment. Apart from greater domestic focus on the Constitution and the institutional role of the Supreme Court within India's democratic framework, recent years have also witnessed enormous comparative interest in India's constitutional experiment. The Oxford Handbook of the Indian Constitution is a wide-ranging, analytical reflection on the major themes and debates that surround India's Constitution. The Handbook provides a comprehensive account of the developments and doctrinal features of India's Constitution, as well as articulating frameworks and methodological approaches through which studies of Indian constitutionalism, and constitutionalism more generally, might proceed. Its contributions range from rigorous, legal studies of provisions within the text to reflections upon historical trends and social practices. As such the Handbook is an essential reference point not merely for Indian and comparative constitutional scholars, but for students of Indian democracy more generally.

Memoir of one of Indira Gandhi's closest confidants One day, soon after M.L. Fotedar had joined Indira Gandhi as political secretary in July 1980, she told him to sit at 1 Akbar Road. This would enable him to meet the people who came to her with various requests. She suggested a small room to serve as his workspace. But it was one she was emotionally attached to -- it was used by her son Sanjay, who had recently died in an air crash. For the rest of Indira Gandhi's final term in office, this room would be the nerve centre of Fotedar's work. Ordinary people and senior party leaders would come there for him to filter their requests and complaints. From assessing future leaders -- be it V.P. Singh, Pranab Mukherjee or Ahmed Patel -- with remarkable foresight, to straightening up those who were being difficult, he did it all. The Chinar Leaves paints a portrait of a six-decade-long political career that began in Kashmir and gives insights into the murky world of national politics. Here are the stories of many careers that were made and unmade in the Congress. Among these are the saga of Narasimha Rao's no-holds-barred effort to stay in power, Amitabh Bachchan's falling out of favour with the Gandhi family, the machinations of succession after Indira Gandhi's death, Giani Zail Singh's tiff with Rajiv, and many more. Fotedar, for long the voice of political wisdom in the party, also passes his verdict on the current crop of Congress leadership and searches Indira Gandhi's will, to which he was a signatory, for the true successor to her legacy. As a record of Indian politics at a time of momentous events, this is a frank and sometimes shocking look at recent history from the man who exercised immense influence from behind the scenes and whose impact continues to this day.

The preparation of the National Register of Citizens (NRC) in Assam was an unprecedented exercise that sought to establish Indian citizenship of the state's 33 million residents. The process intersected with the already existing parallel mechanisms of citizenship determination in the state. The final list, published on 31 August 2019, left out around 1.9 million applicants who risk being rendered stateless after their appeals are heard by the state's Foreigners' Tribunals. The NRC's narrative is expansive and complex - a blend of history, politics, law, human rights, and administrative red tape. No Land's People documents the unfolding humanitarian crisis in Assam's citizenship tangle, juxtaposes it with the complications of the NRC process while exploring technical, social and legal aspects of the exercise.
