A new edition of the only story collection compiled by legendary writer, actress, ex-biker, and columnist Cookie Mueller, featuring additional writings. First published in 1991, Walking Through Clear Water in a Pool Painted Black was the only story collection that the legendary writer, actress, ex-biker, and columnist Cookie Mueller compiled in her lifetime. Featuring a new introduction by Olivia Laing and an afterword by the book's first editor, Chris Kraus, this new edition collects all of Mueller's fiction, together with her Details magazine columns (1982-1989) and other writings. The additional stories were discovered by Amy Scholder, who edited the anthology Ask Dr. Mueller for High Risk/Serpent's Tail books in 1996. As Scholder writes in her introduction, the new stories were "written around the same time she wrote the stories in Walking Through Clear Water, but for some reason Cookie decided not to include them. They are darker than most of her other stories; they are the quotidian Cookie, and that is why I especially love them." Mueller's life and work were celebrated in Chloe Griffith's 2014 oral biography Edgewise, bringing her work to a new generation of readers.

"This collection contains two plays by Gao Xingjian, winner of the Nobel Prize for Literature 2000. Escape was written in 1989 in the wake of the June 4 Student Movement in Tiananmen Square in Beijing. With the publication ofo the play, Gao was expelled from the Chinese Communist Party, dismissed from his state appointment and ahd his house in Beijing confiscated. Perhaps because of this controversy, Escape has become the most performed of all of Gao's plays: it has been staged in Sweden, Germany, Belgium, France, Poland, Japan, Ivory Coast, Tunisia, and Canada. Wherever it was staged, it was given a locally relevant intepretation and was well received, which lends credence to Gao's claim of the universality of the play he describes as the tragedy of modern man. The Man Who Questions Death is the latest of Gao's plays. It is also one of the most exciting and powerful." -- Book jacket.

Adhesion is among the oldest technologies known to mankind, but the technology of adhesives began to boom with the developments in chemistry in the early 1900s. The last few years have seen tremendous progress in the performance of adhesives, allowing two pieces to be connected inseparably. Modern adhesives perform so well that more sophisticated joining methods, e.g. welding, can often be replaced by adhesion, meaning that adhesives have found new areas of application. This book allows readers to quickly gain an overview of the adhesives available and to select the best adhesive for each purpose.
