Explores why different languages have systematically different ways of saying the same thing. It focuses on adjectival predication and shows that systematic differences in the meaning of words expressing adjectival notions have systematic effects on the form of the sentences they appear in

This book, using Malayalam as a case study, provides an in-depth exploration of how inflectional suffixes should be separated from the verb and the implications this has for the syntax and semantics. Past work has proposed that Malayalam lacks a Tense Phrase and tense morphology, i.e. is 'tenseless'. However, this book shows that Malayalam behaves differently from other tenseless languages and that it does have tense morphology. It also provides evidence that there is a Tense Phrase in the syntax. In addition, it examines what have been called the two 'imperfectives' and argues that one is a type of progressive, while the other is a pluractional marker and shows that Malayalam lacks perfect morphology and a Perfect Phrase in, minimally, Universal perfects. With respect to finiteness, among other things, it argues that Conjunctive Participles are best analyzed as a type of absolutive adjunct and that -athu 'gerunds' involve nominalization above the Tense Phrase-level. This book will be a valuable resource for anyone interested in cross-linguistic variation in Tense-Aspect-Modality and/or the morphosyntax or morphosemantics of Dravidian languages.

Examines multiple interrogatives under sluicing and presenting various arguments for the deletion analysis of sluicing. In this title, the author reports the results of several experimental studies on how children acquire the language-specific properties of multiple interrogatives in English, Russian, and Malayalam.

This volume draws together fourteen previously published papers which explore the nature of mental grammar through a formal, generative approach. The book begins by outlining the development of formal grammar in the last fifty years, with a particular focus on the work of Noam Chomsky, and moves into an examination of a diverse set of phenomena in various languages that shed light on theory and model construction. Many of the papers focus on comparisons between English and Norwegian, highlighting the importance of comparative approaches to the study of language. With a comprehensive collection of papers that demonstrate the richness of formal approaches, this volume is key reading for students and scholars interested in the study of grammar.

This volume comprises twenty eight papers selected from the widely known work of K.A. Jayaseelan and R. Amritavalli on Dravidian. Collectively, these papers cover the entire area of Dravidian syntax: they range from broad questions such as sentence structure and word order to more particular questions such as the morphological basis of anaphora, the genesis of lexical categories, the morpho-syntax of quantifiers, and the syntax and semantics of questions. Important universalist claims are embedded in these essays; for this reason, this volume will be of interest also to a student of the general theory of syntax. No future discussion of Dravidian (or South Asian) languages is possible without taking into account the insightful analyses set forth in these pages.

This is the first comprehensive presentation of Functional Discourse Grammar. The authors set out its nature and origins and show how it relates to contemporary linguistic theory. They demonstrate and test its explanatory power and descriptive utility against linguistic facts from over 150 languages across a full range of linguistic families.

The left periphery of clausal structures has been a prominent topic of research in generative linguistics during the last decades. Closer examination of its properties unfolds a rich array of perspectives like the status of barriers for extraction and government, the articulation of the topic focus structure, the fixation of wh-scope, the marking of clausal types, the interaction of syntactic structure with inflectional morphology as well as the determination of sentence mood and illocutionary force to mention just a few. The purpose of this book is to collect different and relevant studies in this field and to give a general overview of the various theoretical approaches concerned with morphological, syntactic and semantic properties together with the diachronic development of the left periphery.

The grammar of focus has been studied in generative grammar from its inception. It has been the subject of intense, detailed cross-linguistic investigation for over 20 years, particularly within the Principles and Parameters framework. It is appropriate at this point, therefore, to take stock. Appraisal at this particular point is all the more legitimate because it comes at a time of general evaluation of the results of the profound activity that has characterized the Principles and Parameters framework. This general assessment has produced a radical new direction within that framework. The volume starts off with an introductory chapter that aims to provide an outline for the assessment, to be followed by an overview of the evolution of the study of focus in generative grammar, and a recapitulation of the principal issues associated with focus. These issues are taken up in the remaining chapters of the book, where various grammatical means of marking focus (as well as grammaticalization of focus marking) are analyzed in a wide variety of languages.

The educational process has undergone a sea of change in the last few years and has become more demanding than ever before. For more than two decades, Xam idea has helped thousands of students prepare for exams by providing hand-picked questions and solutions strictly in accordance with the CBSE syllabus.

In this reflection on the pandav lila (a ritual reenactment of scenes from the Mahabharata), Sax opens a window on a fascinating (and threatened) aspect of rural Indian life and example of Hindusim as a living religion.
