Mali Conflict of 2012-2013: A Critical Assessment Tchioffo Kodjo, 2015-03-16 Between 2012 and 2013, Mali has gone through the most challenging period of its history as a nation-state. From a praised democracy, the country almost collapsed after the onset of a complex set of rebellions that threatened to divide or completely erase it from the map. This book provides a three-dimensional analysis of the conflict drivers as well a deep assessment of the conflict resolution mechanisms that were set up to restore Mali control over its territory. From the outbreak of MNLA insurgent attacks in early 2012, the crafting of AZAWAD, the fluidity of MNLA alliance with ANSAR DINE, MUJAO and AQIM, the coup d'état of Sanogo and downfall of Amani Toumani Touré, the responses of ECOWAS, the 'core countries' (Algeria, Mauritania), the African Union, the role of France to the re-hatting of AFISMA and launch of MINUSMA, all crusty details and facets of the crisis are meticulously scrutinized. This book is a must-have for academics, diplomats and strategists interested the new conflict dynamics in Mali and West Africa in a global era.

Rage and Carnage in the Name of God Abiodun Alao, 2022-07-11 In *Rage and Carnage in the Name of God*, Abiodun Alao examines the emergence of a culture of religious violence in postindependence Nigeria, where Christianity, Islam, and traditional religions have all been associated with violence. He investigates the root causes and historical evolution of Nigeria's religious violence, locating it in the forced coming together of disparate ethnic groups under colonial rule, which planted the seeds of discord that religion, elites, and domestic politics exploit. Alao discusses the histories of Christianity, Islam, and traditional religions in the territory that became Nigeria, the effects of colonization on the role of religion, the development of Islamic radicalization and its relation to Christian violence, the activities of Boko Haram, and how religious

violence intermixes with politics and governance. In so doing, he uses religious violence as a way to more fully understand intergroup relations in contemporary Nigeria.

Religion in War and Peace in Africa Margee Ensign, Jean-Pierre Karegeye, 2020-06-09 Religion in War and Peace in Africa shows how Religious extremism transcends the realm of belief, analysing current armed conflicts in Africa with perpetrators claiming to act in accord with their religion and moral values. Many African countries today are beset by armed conflicts carried out by different radical groups. In most such cases, religion has been used to incite extremism and to justify violence and exclusion. Perpetrators who seek to violently impose their order believe, or claim, that they are acting in accord with their religious and values. Scholars, peacemakers, Religious leaders, and Military officers explore peace initiatives and security managements. These rich, informative and path-breaking contributions in this book span the spectrum from the prevention of violence through peace initiatives and the analyses of the many complex historical, political, economic, demographic and ideological causes of violence to the role of traditional religions, and military intervention. Showing how religious leaders, scholars, peacekeepers, policy-makers, and military officers and others need to join their efforts in better understanding the intersections between religion and conflict, and to engage in shared missions focused on preventive actions and peace initiatives, Religion in War and Peace in Africa will be of great interest to scholars of military studies, African studies, peacekeeping, religion and conflict. The chapters were originally published as a special issue of Peace Review.

Regions and Powers Barry Buzan, Ole Wæver, 2003-12-04 This book develops the idea that since decolonisation, regional patterns of security have become more prominent in international politics. The authors combine an operational theory of regional security with an empirical application across the whole of the international system. Individual chapters cover Africa, the Balkans, CIS Europe, East Asia, EU Europe, the Middle East, North America, South America, and South Asia. The main focus is on the post-Cold War period, but the history of each regional security complex is traced back to its beginnings. By relating the regional dynamics of security to current debates about the global power structure, the authors unfold a distinctive interpretation of post-Cold War international security, avoiding both the extreme oversimplifications of the unipolar view, and the extreme deterritorialisations of many globalist visions of a new world disorder. Their framework brings out the radical diversity of security dynamics in different parts of the world.

Security in Africa Claire Metelits, 2016-10-12 Security in Africa: A Critical Approach to Western Indicators of Threat questions the dominant Western narrative of security threats in Africa. Based on an analysis traditional security studies and Western security policy, it argues that commonly used indicators are based on mainstream security studies and provide only circumscribed analyses of threats to international security. By assessing the origins of this traditional approach to security and problematizing failed states, political instability, Muslim populations, and poverty among others, it makes the case for a

critical approach to framing security challenges in Africa.

Building Resilience in Sub-Saharan Africa's Fragile States Mr.Enrique Gelbard,Corinne Deléchat,Ms.Ejona Fuli,Mr.Mumtaz Hussain,Mr.Ulrich Jacoby,Mrs.Dafina Glaser,Mr.Marco Pani,Mr.Gustavo Ramirez,Rui Xu,2015-06-25 This paper analyzes the persistence of fragility in some sub-Saharan African states and the multiple dimensions of state weakness that are simultaneously at play. This study also provides an overview of the analytics of fragility, conflict, and international engagement with fragile states before turning to an assessment of the current state of affairs and the areas in which there has been progress in building resilience. The paper also looks at the role of fiscal policies and institutions and analyzes growth accelerations and decelerations. Seven country case studies help identify more concretely some key factors at play, and the diversity of paths followed, with an emphasis on the sequencing of reforms. The paper concludes with a summary of the main findings and policy implications.

African Conflicts and Informal Power Mats Utas,2012-09-13 In the aftermath of an armed conflict in Africa, the international community both produces and demands from local partners a variety of blueprints for reconstructing state and society. The aim is to re-formalize the state after what is viewed as a period of fragmentation. In reality, African economies and polities are very much informal in character, with informal actors, including so-called Big Men, often using their positions in the formal structure as a means to reach their own goals. Through a variety of in-depth case studies, including the DRC, Sierra Leone and Liberia, this comprehensive volume shows how important informal political and economic networks are in many of the continent's conflict areas. Moreover, it demonstrates that without a proper understanding of the impact of these networks, attempts to formalize African states, particularly those emerging from wars, will be in vain.

Natural Resources and Violent Conflict Ian Bannon,Paul Collier,2003-01-01 Research carried out by the World Bank on the root causes of conflict and civil war finds that a developing country's economic dependence on natural resources or other primary commodities is strongly associated with the risk level for violent conflict. This book brings together a collection of reports and case studies that explore what the international community in particular can do to reduce this risk.; The text explains the links between natural resources and conflict and examines the impact of resource dependence on economic performance, governance, secessionist movements and rebel financing. It then explores avenues for international action - from financial and resource reporting procedures and policy recommendations to commodity tracking systems and enforcement instruments, including sanctions, certification requirements, aid conditionality, legislative and judicial instruments.

Making Sense of Turbulent Contexts Michelle Garred,2015-05 Local voices matter. World Vision offers this book, *Making Sense of Turbulent Contexts*, to address a problematic gap within the field of conflict analysis: local knowledge. Analysing large-scale conflict in an inclusive, participatory way will increase the effectiveness of aid in turbulent settings. Making

Sense of Turbulent Contexts identifies the current participation gap and presents the alternative concepts on which the participatory Making Sense of Turbulent Contexts (MSTC) framework is grounded. Included are concrete, step-by-step tools and seven case studies demonstrating specific MSTC results. The book concludes with a clear vision for the future of participatory macro-level conflict analysis.

Shock Waves Stephane Hallegatte, Mook Bangalore, Laura Bonzanigo, Marianne Fay, Tamaro Kane, Ulf Narloch, Julie Rozenberg, David Treguer, Adrien Vogt-Schilb, 2015-11-23 Ending poverty and stabilizing climate change will be two unprecedented global achievements and two major steps toward sustainable development. But the two objectives cannot be considered in isolation: they need to be jointly tackled through an integrated strategy. This report brings together those two objectives and explores how they can more easily be achieved if considered together. It examines the potential impact of climate change and climate policies on poverty reduction. It also provides guidance on how to create a “win-win” situation so that climate change policies contribute to poverty reduction and poverty-reduction policies contribute to climate change mitigation and resilience building. The key finding of the report is that climate change represents a significant obstacle to the sustained eradication of poverty, but future impacts on poverty are determined by policy choices: rapid, inclusive, and climate-informed development can prevent most short-term impacts whereas immediate pro-poor, emissions-reduction policies can drastically limit long-term ones.

Britain, France and the Decolonization of Africa Andrew W.M. Smith, Chris Jeppesen, 2017-03-01 Looking at decolonization in the conditional tense, this volume teases out the complex and uncertain ends of British and French empire in Africa during the period of ‘late colonial shift’ after 1945. Rather than view decolonization as an inevitable process, the contributors together explore the crucial historical moments in which change was negotiated, compromises were made, and debates were staged. Three core themes guide the analysis: development, contingency and entanglement. The chapters consider the ways in which decolonization was governed and moderated by concerns about development and profit. A complementary focus on contingency allows deeper consideration of how colonial powers planned for ‘colonial futures’, and how divergent voices greeted the end of empire. Thinking about entanglements likewise stresses both the connections that existed between the British and French empires in Africa, and those that endured beyond the formal transfer of power. Praise for *Britain, France and the Decolonization of Africa* ‘...this ambitious volume represents a significant step forward for the field. As is often the case with rich and stimulating work, the volume gestures towards more themes than I have space to properly address in this review. These include shifting terrains of temporality, spatial Scales, and state sovereignty, which together raise important questions about the relationship between decolonization and globalization. By bringing all of these

crucial issues into the same frame, Britain, France and the Decolonization of Africa is sure to inspire new thought-provoking research.' - H-France vol. 17, issue 205

Historical Perspectives on the State of Health and Health Systems in Africa, Volume II Mario J. Azevedo, 2017-01-24 This book focuses on Africa's challenges, achievements, and failures over the past several centuries using an interdisciplinary approach that combines theory and fact and evidence-based practices and interventions in public health, and argues that most of the health problems in Africa are not a result of scarce or lack of resources, but of the misconceived and misplaced priorities that have left the continent behind every other on the globe in terms of health, education, and equitable distribution of opportunities and access to (quality) health as agreed by the United Nations member states at Alma-Ata in 1978.

The Security Activities of External Actors in Africa Olawale Ismail, Elisabeth Sköns, 2013-09 This book is the first to map comprehensively the security-related policies, strategies and activities of major external actors in Africa, assessing the involvement of China, France, Russia, the United Kingdom, the United States, the EU, and the UN

West African Studies An Atlas of the Sahara-Sahel Geography, Economics and Security OECD, Sahel and West Africa Club, 2014-12-19 This book explains the structure and geographical and organisational mobility of criminal and migratory movements in the Sahara and the Sahel with a view to helping establish better development strategies for the region.

Africa's Development in Historical Perspective Emmanuel Akyeampong, Robert H. Bates, Nathan Nunn, James Robinson, 2014-08-11 Why has Africa remained persistently poor over its recorded history? Has Africa always been poor? What has been the nature of Africa's poverty and how do we explain its origins? This volume takes a necessary interdisciplinary approach to these questions by bringing together perspectives from archaeology, linguistics, history, anthropology, political science, and economics. Several contributors note that Africa's development was at par with many areas of Europe in the first millennium of the Common Era. Why Africa fell behind is a key theme in this volume, with insights that should inform Africa's developmental strategies.

Peacebuilding, Power, and Politics in Africa Devon Curtis, Gwinyayi A. Dzinesa, 2012-09-21 Peacebuilding, Power, and Politics in Africa is a critical reflection on peacebuilding efforts in Africa. The authors expose the tensions and contradictions in different clusters of peacebuilding activities, including peace negotiations; statebuilding; security sector governance; and disarmament, demobilization, and reintegration. Essays also address the institutional framework for peacebuilding in Africa and the ideological underpinnings of key institutions, including the African Union, NEPAD, the African Development Bank, the Pan-African Ministers Conference for Public and Civil Service, the UN Peacebuilding Commission, the World Bank, and the International Criminal Court. The volume includes on-the-ground case study chapters on Sudan, the Great Lakes Region

of Africa, Sierra Leone and Liberia, the Niger Delta, Southern Africa, and Somalia, analyzing how peacebuilding operates in particular African contexts. The authors adopt a variety of approaches, but they share a conviction that peacebuilding in Africa is not a script that is authored solely in Western capitals and in the corridors of the United Nations. Rather, the writers in this volume focus on the interaction between local and global ideas and practices in the reconstitution of authority and livelihoods after conflict. The book systematically showcases the tensions that occur within and between the many actors involved in the peacebuilding industry, as well as their intended beneficiaries. It looks at the multiple ways in which peacebuilding ideas and initiatives are reinforced, questioned, reappropriated, and redesigned by different African actors. A joint project between the Centre for Conflict Resolution in Cape Town, South Africa, and the Centre of African Studies at the University of Cambridge.

The Causes of Instability in Nigeria and Implications for the United States Clarence J. Bouchat, 2013 The political economy problems of Nigeria, the root cause for ethnic, religious, political and economic strife, can be in part addressed indirectly through focused contributions by the U.S. military, especially if regionally aligned units are more thoroughly employed.
