'Financial Accounting for Decision Makers' presents the key concepts of accounting without going into too much unnecessary technical detail. The book is aimed as 'users' of accounting information, not 'preparers' of accounts.

Accounting for Managers explains how accounting information is used by non-financial managers. The book emphasises the interpretation, rather than the construction, of accounting information and encourages a critical, rather than unthinking acceptance, of the underlying assumptions behind accounting. It links theory with practical examples and case studies drawn from real life business situations in service, retail and manufacturing industries.

?This book contains a collection of research papers on accounting information systems including their strategic role in decision processes, within and between companies. An accounting system is a complex system composed of a mix of strictly interrelated elements such as data, information, human resources, IT tool, accounting models and procedures. Accounting information systems are often considered the instrument by default for accounting automation. This book aims to sketch a clear picture of the current state of AIS research, including design, acceptance and reliance, value-added decision making, interorganizational links, and process improvements. The contributions in this volume emphasize that AIS has grown into a powerful strategic tool. The book provides evidence for this observation by examining a wide range of current issues ranging from theory development in AIS to practical applications of accounting information systems. In particular it focuses on themes of growing interest in the realm of XBRL and Financial Reporting, Management Information Systems, IT/IS Audit and IT/IS Compliance. The book will be of interest to financial and managerial accountants and IT/IS practitioners, including information systems managers and consultants.

Written with the decision maker in mind, this new text from Professor Will Seal, author of the highly successful Management Accounting, takes a practical, real-world approach to the subject. Suitable for one or two semester courses, the text is aimed at both specialist and non-specialist students at an introductory level. The book provides concise and manageable coverage of key topics and theory, and is supported by contemporary examples from both the manufacturing and services industries, ensuring it is relevant and engaging to both today's students and tomorrow's decision makers.

Managerial Accounting teaches business students how to use accounting to make better decisions and improve performance. Engaging case studies and the popular 'Manager's Point of View' boxes illustrate how concepts are applied in real world business situations. The latter add an extra dimension to your learning, as they are written by experienced practitioners of both management and accounting. With a minimum of technical language and a dedication to practical application, this popular text gives a refreshingly clear guide to management accounting.

If you read the 'business pages' of a newspaper or if you listen to the financial news on the television or radio, you will often hear terms such as 'liability', 'balance sheet' or 'earnings'. These terms turn up in non-financial contexts as well: 'he was more of a liability than an asset'. If you invest in shares, have a building society account, or sit on a committee of the property company which owns your apartment block, you will receive financial statements every year. If you are a manager in a company, a hospital or a school, you will see accounting information often. This Very Short Introduction provides a guide to understanding and using accounting information. Christopher Nobes explains the main areas of accounting work, from bookkeeping and financial reporting to auditing and management accounting. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. "The authors carefully considered how to thoughtfully and meaningfully integrate data analytics into the financial accounting course, and are pleased to provide the following data analytics resources. Data Analytics and Decision-Making The text provides numerous discussions on how decision-makers are increasingly relying on data analytics to make decisions using accounting information. Accounting software systems collect vast amounts of data about a company's economic events as well as its suppliers and customers. Business decision-makers take advantage of this wealth of data by using data analytics to gain insights and therefore make more informed business decisions. Data analytics involves analyzing data, often employing both software and statistics, to draw inferences. As both data access and analytical software improve, the use of data analytics to support decisions is becoming increasingly common at virtually all types of companies"--

Higher education is dynamic, constantly adapting to meet the requirements of students and industry. Transforming Higher Education Through Digitalization: Insights, Tools, and Techniques provides insights from experienced academicians on the digitalization of education and its appropriateness for enhancing the quality of teaching in institutions of higher education. The book also provides insights on technologies used in digital education, the competencies and skills required by teachers and students, managing quality of education through online modes, MOOCs (Massive, Open, Online Courses), and methods to support teachers and instructors in online education. The book also enables teachers and instructors to help students develop the knowledge and skills they need in a digital age and enable them to build collaborative learning that will bring them success. Written for educators, students, and policy makers of higher education, this book demonstrates how to transform traditional education to digital education and to continue their activities without the requirement of students and teachers meeting each other on campus.
