Basic Management Accounting for the Hospitality Industry deals with a range of topics: commencing with a basic introduction to management accounting; and ending with capital investment decisions. The objective of the book is to provide an introduction to the basic management accounting concepts and applications based on Einstein's maxim that 'everything should be made as simple as possible, but no simpler'. This choice of simplification is due to the fact that the level of English used in the text takes into consideration that a good proportion of students in hotel or tourism-related education use English as a second language. The approach used in the book makes it very comprehensible. It takes the reader clearly and logically through the concepts and applications of hospitality management accounting. Students involved with hospitality and tourism degrees will find this text enables them to independently master the subject.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Readers will learn to make effective choices based on the numbers that affect daily operations, develop on-target budgets and control cash flow, reach profit goals with the help of financial reports and other tools, and apply the latest uniform systems of accounts for hotels and restaurants.

The Blue Book is an ultimate guide for financial and management accounting in the hotel industry, and it is like no other. Some academic books for the hospitality industry do exist; however, as the term "hospitality industry" refers to lodging, food & beverage, event planning, transportation, and recreation, the industry is already complex on its own. It explains why such books do not conveniently cater to a hotel's needs. Moreover, these books dedicate many pages to corporate financing, which has little or nothing to do with the property level. Although there are some ground rules within the hospitality industry, the hotel has its unique accounting procedures and techniques, and this is when this book plays a main role. With over twenty years of valuable experience with the best international hotel operators in six countries, the author shares the essential and practical knowledge and guidelines to build a strong Finance Division in hotels.

Therefore, this book perfectly caters to all financial professionals, from the start of their careers to becoming finance leaders. The contents of this book are certainly comprehensive and thorough - highly relevant and easy to understand. This makes it suitable for financial professionals, stakeholders including division heads, general managers, auditors, owners, and owner's representatives. All will greatly benefit from it. The Blue Book includes the following twelve parts that provide the most essential needed information to understand the hotel finance functions and to build a strong finance division: Part One: Basic Accounting Part Two: Revenue Management Part Three: Cost Management Part Four: Labor Management Part Five: Other Expenses Guidelines Part Six: Financial Analysis Part Seven: Budgeting and Forecasting Part Eight: Cash Management Part Nine: Hotel Investments Part Ten: Hotel Management Software Part Eleven: Financial Functions and SOPs Part Twelve: Parent-Child Chart of Accounts This book uses the Uniform System of Accounts and GAAP as its main reference, ensuring that the information provided to the readers is the most updated and relevant version of the modern hotel industry.

The hospitality sector is facing increasing competition and complexity over recent decades in its development towards a global industry. The strategic response to this is still that hospitality companies try to grow outside their traditional territories and domestic markets, while the expansion patterns and M&A activities of international hotel and restaurant chains reflect this phenomenon. Yet, interestingly, the strategies, concepts, and methods of internationalization as well as the managerial and organizational challenges and impacts of globalizing the hospitality business are under-researched in this industry. While the mainstream research on international management offers an abundance of information and knowledge on topics, players, trends, concepts, frameworks, or methodologies, its ability to produce viable insights for the hospitality industry is limited, as the mainstream research is taking place outside of the service sector. Specific research directions and related cases like the international dimensions of

strategy, organization, marketing, sales, staffing, control, culture, and others to the hospitality industry are rarely identifiable so far. The core rationale of this book is therefore to present newest insights from research and industry in the field of international hospitality, drawing together recent scientific knowledge and state-of-the-art expertise to suggest directions for future work. It is designed to raise awareness on the international factors influencing the strategy and performance of hospitality organizations, while analyzing and discussing the present and future challenges for hospitality firms going or being international. This book will provide a comprehensive overview and deeper understanding of trends and issues to researchers, practitioners, and students by showing how to master current and future challenges when entering and competing in the global hospitality industry.
