It is often said that 80% of what happens to us in life is based upon how we think. Initially, I wrote this as a letter to read to our children when they graduated from high school. I thought of this book as I was driving down the road, taking our children from practice to practice and game to game. After we got past "how was your day?" There were many times with periods of awkward silence. Neither one of us knew what to talk about. This was a very difficult time for me. I am used to speaking in front of large crowds, but at this point I did not know what to say to my 10 year-old son. What was wrong with me? I felt foolish. So I stepped back, and analyzed my life and the lives of the successful people around me. I decided to teach my children about the things that it took me 40+ years of listening to my family, friends, mentors, taking seminars, reading books, listening to the tapes/CDs, etc. to learn to achieve success and happiness. There are hundreds of self help books, CDs, DVDs and seminars for adults. Why not teach this to kids and young adults? So I started talking to

our children about positive life experiences and ways to lead a positive, happy, successful, productive life. This is what this book is about, helping us to understand the game of life. I wanted our children to have a reference when struggling with the game of life and this book was the result of those efforts. This is a reference book that we can use again and again throughout our life. Together we can change the world by recognizing one positive experience at a time.

For more than ten years, Dr Deborah Graham and Jon Stabler have devoted themselves to the scientific study of why, even among the pros, some players win frequently and others never do. In the first psychology self-help book tailored to golfers at every level, they draw on their research to spell out the eight specific personality traits that make the difference: Abstract thinking; emotional stability; tough-mindedness; self-assurance; self-sufficiency; and optimum arousal. Now, this detailed, practical, and encouraging guide will make it possible for anyone to play like a champ.

Talk to any and all golfers, be they Tour professionals or once-a-month country clubbers, and you'll hear that they want to improve their game in some way. But up until now, most expert books on golf instruction have focused only on the approach advocated by a particular teaching pro or famous player; the authors usually talk about "the golf swing" or "the putting stroke" as if there is only one way to do it -- their way. With *How to Learn Golf*, the first comprehensive guide to contemporary golf instruction, Harry Hurt III will help you become a better golfer by identifying what type of player you really are, and which of the several leading methods are right for you and your golfing goals. Based on Hurt's sessions with all of America's top ten instructors, this book helps you

choose between the two main types of golf instruction available -- error correction, which offers a quick fix for a specific swing flaw, and swing development, where the focus is on building the swing from top to bottom. Hurt provides illuminating detail on the most effective approaches to improving each aspect of your golf game: putting, the full swing, the short game, and the all-important mental game. Hurt also includes a biographical listing of the best golf instructors nationwide and where their expertise lies, so you can determine who may be best suited to your needs. And if you've never sought an instructor before or you've had problems communicating with yours, there are two handy worksheets: eighteen questions you should ask your teaching pro and eighteen questions your pro should ask you. From beginners and high handicappers to scratch players and Tiger Woods wannabes, golfers of all skill levels looking to take the next step to improving their games need only look to *How to Learn Golf*.

A step-by-step system for mastering trading psychology. Think about your most costly and recurring trading mistakes. Chances are that they're related to common errors, such as chasing price, cutting winners short, forcing mediocre trades, and overtrading. You've likely tried to fix these errors by improving your technical skills, and yet they persist. If you are like most traders, you probably overlook or misunderstand mental and emotional obstacles. Or worse, you might think you know how to manage them, but you don't, and end up losing control at the worst possible time. You're leaving too much money on the table, which will either prevent you from being profitable or realizing your potential. While many trading psychology books offer sound advice, they don't show you how to do the necessary work. That's why you haven't solved the problems hurting your performance.
