Trieste Publishing has a massive catalogue of classic book titles. Our aim is to provide readers with the highest quality reproductions of fiction and non-fiction literature that has stood the test of time. The many thousands of books in our collection have been sourced from libraries and private collections around the world. The titles that Trieste Publishing has chosen to be part of the collection have been scanned to simulate the original. Our readers see the books the same way that their first readers did decades or a hundred or more years ago. Books from that period are often spoiled by imperfections that did not exist in the original. Imperfections could be in the form of blurred text, photographs, or missing pages. It is highly unlikely that this would occur with one of our books. Our extensive quality control ensures that the readers of Trieste Publishing's books will be delighted with their purchase. Our staff has thoroughly reviewed every page of all the books in the collection, repairing, or if necessary, rejecting titles that are not of the highest quality. This process ensures that the reader of one of Trieste Publishing's titles receives a volume that faithfully reproduces the original, and to the maximum degree possible, gives them the experience of owning the original work. We pride ourselves on not only creating a pathway to an extensive reservoir of books of the finest quality, but also providing value to every one of our readers. Generally, Trieste books are purchased singly - on demand, however they may also be purchased in bulk. Readers interested in bulk purchases are invited to contact us directly to enquire about our tailored bulk rates. CD contains musical excerpts referenced in the text.

The long-awaited memoir from John Fogerty, the legendary singer-songwriter and creative force behind Creedence Clearwater Revival. Creedence Clearwater Revival is one of the most important and beloved bands in the history of rock, and John Fogerty wrote, sang, and produced their instantly recognizable classics: "Proud Mary," "Bad Moon Rising," "Born on the Bayou," and more. Now he reveals how he brought CCR to number one in the world, eclipsing even the Beatles in 1969. By the next year, though, Creedence was falling apart; their amazing, enduring success exploded and faded in just a few short years. *Fortunate Son* takes readers from Fogerty's Northern California roots, through Creedence's success and the retreat from music and public life, to his hard-won revival as a solo artist who finally found love.

In *Heartland Excursions*, a legendary ethnomusicologist takes the reader along for a delightful, wide-ranging tour of his workplace. Bruno Nettl provides an insightful, sometimes tongue-in-cheek, always pithy ethnography of midwestern university schools of music from a different perspective in each of four chapters, alternating among three distinct voices: the longtime professor, the "native informant," and the outside observer, an "ethnomusicologist from Mars." If you've ever

been to a concert or been connected to a university with a school of music, you'll discover yourself--or someone you know--in these pages. "In the music building you can't tell the quick from the dead without a program."--Chapter 1, "In the Service of the Masters" "The great ability of a violin student whom I observed was established when his dean was persuaded to accompany him."--Chapter 2, "Society of Musicians" "Some teachers of music history would accuse students who listen to Elvis Presley not only of taking time away from hearing Brahms, but also of polluting themselves."--Chapter 3, "A Place for All Musics?" At commencement, the graduates "were perhaps not aware that they had just participated in an event in which the principal values of the Western musical world . . . had been taken out of storage bins for annual exercise."--Chapter 4, "Forays into the Repertory"

The Physics of Stars, Second Edition, is a concise introduction to the properties of stellar interiors and consequently the structure and evolution of stars. Strongly emphasising the basic physics, simple and uncomplicated theoretical models are used to illustrate clearly the connections between fundamental physics and stellar properties. This text does not intend to be encyclopaedic, rather it tends to focus on the most interesting and important aspects of stellar structure, evolution and nucleosynthesis. In the Second Edition, a new chapter on Helioseismology has been added, along with a list of physical constants and extra student problems. There is also new material on the Hertzsprung-Russell diagram, as well as a general updating of the entire text. It includes numerous problems at the end of each chapter aimed at both testing and extending student's knowledge.

The electric spearhead of The Beatles meteoric rise; one half of the most creative and powerful songwriting partnerships ever; figurehead of peace and an icon of generations: John Lennon's adventure through life is an immortalised legend. Most of this material has never been available in print; some has remained entirely hidden until now. Jeff Burger's meticulously researched book offers a truly unique and captivating glimpse into the mind and philosophy of one of the world's most complex and inspiring talents.

Framed by a century and a half of racialized Chinese American musical experiences, Claiming Diaspora explores the thriving contemporary musical culture of Asian/Chinese America. Ranging from traditional operas to modern instrumental music, from ethnic media networks to popular music, from Asian American jazz to the work of recent avant-garde composers, author Su Zheng reveals the rich and diverse musical activities among Chinese Americans and tells of the struggles of Chinese Americans to gain a foothold in the American cultural terrain. She not only tells their stories, but also examines the dynamics of the diasporic connections of this musical culture, revealing how Chinese American musical

activities both reflect and contribute to local, national, and transnational cultural politics, and challenging us to take a fresh look at the increasingly plural and complex nature of American cultural identity.

With its heavy stock, embossed cover, and button-tie closure, this book resembles an authentic portfolio.

One of the greatest challenges during the enlargement process of the European Union towards the east is how the issue of the Roma or Gypsies is tackled. This ethnic minority group represents a much higher share by numbers, too, in some regions going above 20% of the population. This enormous social and political problem cannot be solved without proper historical studies like this book, the most comprehensive history of Gypsies in Romania. It is based on academic research, synthesizing the entire historical Romanian and foreign literature concerning this topic, and using lot of information from the archives. The main focus is laid on the events of the greatest consequence. Special attention is devoted to aspects linked to the long history of the Gypsies, such as slavery, the process of integration and assimilation into the majority population, as well as the marginalization of Gypsies, which has historic roots. The process of emancipation of

Gypsies in the mid-19th century receives due treatment. The deportation of Gypsies to Transnistria during the Antonescu regime, between 1942-1944, is reconstructed in a special chapter. The closing chapters elaborate on the policy toward Gypsies in the decades after the Second World War that explain for the latest developments and for the situation of this population in today's Romania.

This collection brings together some of the most influential sociologists of law to confront the challenges of current transnational constitutionalism. It shows the constitution appearing in a new light: no longer as an essential factor of unity and stabilisation but as a potential defence of pluralism and innovation. The first part of the book is devoted to the analysis of the concept of constitution, highlighting the elements that can contribute from a socio-legal perspective, to clarifying the principle meanings attributed to the constitution. The study goes on to analyse some concrete aspects of the functioning of constitutions in contemporary society. In applying Luhmann's General Systems Theory to a comparative analysis of the concept of constitution, the work contributes to a better understanding of this traditional concept in both its institutionalised and functional aspects. Defining the constitution's contents and functions both at the conceptual level and by taking empirical issues of particular comparative interest into account, this study will be of importance to scholars and students of sociology of law, sociology of politics and comparative public law.

Nicolae Ceaucescu was Romania's leader between 1965 and December 1989, assisted by his wife Elena. As a result of the personality cult characteristic of any dictatorship, within this period hundreds of portraits of Elena and Nicolae were realized by artists all over the country. CEAU is an art book that presents a selection of these portraits preserved in the storage vaults of the National Museum of Contemporary Art in Bucharest. These artworks had either been commissioned by a variety of political bodies within the Socialist Republic of Romania or had been offered to the Ministry of Culture as a gift by the artists themselves before the fall of the Ceaucescu regime. A transcript of the trial of Nicolae and Elena Ceaucescu on the 25th December 1989 rounds off the publication.

This book earns its name! Over the course of 172 pages, I have taken all the great material in the first ed, and added to it a series of recipes and procedures which are very low profile and stunningly effective. This treasure trove of information features the Hardware Store Nitro recipe, fuel/air explosives, butt kicking ammonium nitrate formulations, nitromethane mixtures and a vastly improved detonator section. The fun doesn't stop there either. Read all about the construction of remote control cruise missiles and RC torpedoes. Claymore mines and air cannons add spice to the stew. Then top it off with my commentary on the easiest way to obtain all the materials one would need. I've read all the books on the topic of explosives, from tiny paperbacks to 600 page volumes written by PhDs. I have no hesitation saying I've topped them all!

This book is volume 1 of a 4 volume series, the first 3 of which have been published by Xlibris and the 4th almost complete for imminent delivery. In its entirety this work is the most comprehensive and accurate account of Australian Classical Music making ever undertaken. The 4 volumes cover the period from 1901-2012 and include more than 800 composers, famous and obscure, with more than 30,000 compositions including details of their premieres (where, when and by whom). Individual performers, ensembles, orchestras, opera and ballet companies, music educators, instrument makers, entrepreneurs, academics, philanthropists, musicologists and critics are included as part of the story. The foundation and demise of music institutions, venues and festivals is recorded chronologically. Altogether an extensive picture of Australian Classical Music production and performance can be gleaned in any given year. This book is distinct insofar as it can be read conventionally (from cover to cover): or one may choose a composer/performer and follow his/her career year by year; or one may open the book at random and delight in the unusual and esoteric information therein. This book, and its companion volumes are valuable and indispensable works for the serious music student, professional musician, performing amateur, cultural aficionado and inquisitive lay person and should be in the library of every reputable music conservatorium worldwide.

This edited volume examines maneles (sing. manea), an urban Romanian song-dance ethnopop genre that combines local traditional and popular music with Balkan and Middle Eastern elements. The genre is performed primarily by male Romani musicians at weddings and clubs and appeals especially to Romanian and Romani youth. It became immensely popular after the collapse of communism, representing for many the newly liberated social conditions of the post-1989 world. But maneles have also engendered much controversy among the educated and professional elite, who view the genre as vulgar and even "alien" to the Romanian national character. The essays collected here examine the "manea phenomenon" as a vibrant form of cultural expression that engages in several levels of social meaning, all informed by historical conditions, politics, aesthetics, tradition, ethnicity, gender, class, and geography.

'This book is stunning, phenomenal, wow.' Cecelia Ahern, author of P.S. I Love You WINNER OF THE FINLANDIA PRIZE Seven women meet in a white, undefined space seconds after their deaths Time, as we understand it, has ceased to exist, and all bodily sensations have disappeared. None of the women can remember what happened to them, where they are, or how they got there. They don't know each other. In turn they try to remember, to piece together the fragments of their lives, their identities, their lost

loves, and to pinpoint the moment they left their former lives behind. Deftly playing with genres from essay to poetry, Oneiron is an astonishing work that explores the question of what follows death and delves deep into the lives and experiences of seven unforgettable women.

Phillips Computing for Scientists R. J. Barlow and A. R. Barnett Electromagnetism, Second Edition is suitable for a first course in electromagnetism, whilst also covering many topics frequently encountered in later courses. The material has been carefully arranged and allows for flexibility in its use for courses of different length and structure. A knowledge of calculus and an elementary knowledge of vectors is assumed, but the mathematical properties of the differential vector operators are described in insufficient detail for an introductory course, and their physical significance in the context of electromagnetism is emphasised. In this Second Edition the authors give a fuller treatment of circuit analysis and include a discussion of the dispersion of electromagnetic waves. Electromagnetism, Second Edition features: The application of the laws of electromagnetism to practical problems such as the behaviour of antennas, transmission lines and transformers. Sets of problems at the end of each chapter to help student understanding, with hints and solutions to the problems given at the end of the book. Optional "starred" sections containing more specialised and advanced material for the more ambitious reader. An Appendix with a thorough discussion of electromagnetic standards and units. Recommended by many institutions. Electromagnetism. Second Edition has also been adopted by the Open University as the coursebook for its third level course on electromagnetism.

Wagner was one of the few major composers who studied philosophy seriously. Bryan Magee places the composer's artistic development in the context of the philosophy of his age, and gives us the first detailed and comprehensive study of the close links between Wagner and the philosophers - from the pre-Marxist socialists to Feuerbach and Schopenhauer. Magee explores the relationship between words and music, between the conscious and the unconscious mind, between art and philosophy. It tackles soberly and judiciously the Wagner whose paranoia, egocentricity and anti-semitism are repugnant, as well as the Wagner of artistic genius. The resulting text illuminates Wagner and the music-dramas in altogether new ways.

The edited volume *Audiovisual Media and Identity Issues in Southeastern Europe* is an attempt to meet the challenges of text-based scholarship, to break medial one-dimensionality dictated by textuality and to shift the focus to the aural and visual dimensions of identity in a part of Europe heavily marked by the dynamics of political, cultural and social change, particularly during the last decades. The objective of this endeavour is to examine identity in Southeastern Europe by means of its communication media, specifically that of the photographic image and the sound recording. How are identities communicated? How are they performed and made physically perceptible? Brought to a point, the primary issue is one of how people perceive themselves and their environment on the basis of communication media, seen through a lens of different disciplines (social anthropology, ethnomusicology, media studies, sociology and history) and methodologies from the point of view of scholars from Southeastern Europe and their Western European colleagues. The

book pursues a distinct comparative and historical perspective, examining the media representations from socialist and pre-socialist periods in relation to the role media play in the postsocialist discourse. Another focus is laid on local media representations and their impact on local self-images. This distinct historical and local approach allows new insights into how identities are constructed, performed and negotiated in the light of media, resulting in different forms of interpreting, re-appropriating and re-evaluating the past and traditions. This opens up questions on the role of media in relation to cultural policies and their potential to preserve or to transform local cultural heritage. The book is also an important contribution to the field of postsocialist studies in anthropology. It sheds a distinct cultural view on postsocialist transformation processes. Through a wide range of examples and first-hand results of basic field research from Greece, Bulgaria, Romania, Serbia, Albania and Slovenia this volume provides an opportunity for a comparative reconsideration of similar phenomena across national borders. It may serve also as a methodological reference work for scholars who are interested in the different ways of how to develop and practice "media reflexivity" in their own field research.

Now that the political and economic plight of European Roma and the popularity of their music are objects of international attention, Romani Routes provides a timely and insightful view into Romani communities both in their home countries and in the diaspora. Over the past two decades, a steady stream of recordings, videos, feature films, festivals, and concerts has presented the music of Balkan Gypsies, or Roma, to Western audiences, who have greeted them with exceptional enthusiasm. Yet, as author Carol Silverman notes, Roma are revered as musicians and reviled as people. In this book, Silverman introduces readers to the people and cultures who produce this music, offering a sensitive and incisive analysis of how Romani musicians address the challenges of discrimination. Focusing on southeastern Europe then moving to the diaspora, her book examines the music within Romani communities, the lives and careers of outstanding musicians, and the marketing of music in the electronic media and "world music" concert circuit. Silverman touches on

the way that the Roma exemplify many qualities--adaptability, cultural hybridity, transnationalism--that are taken to characterize late modern experience. And rather than just celebrating these qualities, she presents the musicians as complicated, pragmatic individuals who work creatively within the many constraints that inform their lives.

"You can be lonely anywhere, but there is a particular flavor to the loneliness that comes from living in a city, surrounded by thousands of strangers. The Lonely City is a roving cultural history of urban loneliness, centered on the ultimate city: Manhattan, that teeming island of gneiss, concrete, and glass. What does it mean to be lonely? How do we live, if we're not intimately involved with another human being? How do we connect with other people, particularly if our sexuality or physical body is considered deviant or damaged? Does technology draw us closer together or trap us behind screens? Olivia Laing explores these questions by travelling deep into the work and lives of some of the century's most original artists, among them Andy Warhol, David Wojnarowicz, Edward Hopper, Henry Darger and Klaus Nomi. Part memoir, part biography, part dazzling work of cultural criticism, The Lonely City is not just a map, but a celebration of the state of loneliness. It's a voyage out to a strange and sometimes lovely island, adrift from the larger continent of human experience, but visited by many - millions, say - of souls"--

Since the early twentieth century, 'balkanization' has signified the often militant fracturing of territories, states, or groups along ethnic, religious, and linguistic divides. Yet the remarkable similarities found among contemporary Balkan popular music reveal the region as the site of a thriving creative dialogue and interchange. The eclectic interweaving of stylistic features evidenced by Albanian commercial folk music, Anatolian pop, Bosnian sevdah-rock, Bulgarian pop-folk, Greek ethniki mousike, Romanian muzica orientala, Serbian turbo folk, and Turkish arabesk, to name a few, points to an emergent regional popular culture circuit extending from southeastern Europe through Greece and Turkey. While this circuit is predicated upon older cultural confluences from a shared Ottoman heritage, it also has taken shape in active counterpoint with a variety of regional political discourses.

Containing eleven ethnographic case studies, Balkan Popular Culture and the Ottoman Ecumene: Music, Image, and Regional Political Discourse examines the interplay between the musicians and popular music styles of the Balkan states during the late 1990s. These case studies, each written by an established regional expert, encompass a geographical scope that includes Albania, Bosnia and Herzegovina, Bulgaria, the Republic of Macedonia, Croatia, Slovenia, Romania, Greece, Turkey, Serbia, and Montenegro. The book is accompanied by a VCD that contains a photo gallery, sound files, and music video excerpts.
