From a two-time Olympic coach and creator of the Pose Method who has trained the running elite, an essential guide for all runners seeking to go faster and farther without injury Christopher McDougall's Born to Run—and the wildly popular natural running trend it sparked—changed the way we think about running, but it has also prompted many questions: Have we been running the wrong way? And, have we been running in the wrong kind of shoe? What is the safest type of foot strike? How many types are there? And what is a foot strike anyway? No existing guide has clearly addressed these concerns—until now. The Running Revolution provides both beginning and experienced runners with everything they need to know in order to safely and efficiently transition to and master a safer and more biomechanically efficient way of running that is guaranteed to improve performance and minimize wear and tear on the body. More than a one-size-fits-all guide, The Running Revolution provides readers with clear instructions, complete with helpful illustrations, that they can easily integrate into their unique running histories in order to run safely, intelligently, and efficiently for many years to come.

When you've tried practically every diet and have struggled for years to reach and maintain a healthy weight, what do you do next? If you're Heather and Terry Dubrow, MD, you create your own diet based on cutting-edge and Nobel-prize winning science that promises not just unprecedented metabolic control, but also an internal cellular rejuvenation with powerful antiaging effects. Then, after creating a diet that can transform your life from the inside out, you want to help as many people as possible look and feel their best, so you write a book about it!

In The Dubrow Diet, Orange County's favorite reality TV couple share the diet and exercise plan they created to end their own decades-long yo-yo dieting and flip on what they call the "ageless switch." The central concept is called interval eating, a practice based on research showing that when you eat is perhaps the most important factor in weight loss and weight control. With interval eating, the Dubrows will introduce you to a simple eating schedule that can help you: ? reprogram your cells to go after stored fat for fuel. ? lower insulin and normalize blood sugar. ? fight off chronic inflammation linked to almost every major disease. ? activate a process known as autophagy, your cells' self-cleaning process and an antiaging game changer. ? increase your energy. ? finally reach your goal weight. ? rejuvenate your skin and overall appearance. So, what are you waiting for? You have more power than you realize over the hormones that regulate your weight and the molecular factors that determine how you age. It's time to take advantage of this power with a diet that is not only doable but also sustainable and even fun! The Dubrows wouldn't have it any other way.

On a rainy afternoon in London's old Chelsea, a charming multi-billionaire Russian oligarch, Gorsky, walks into an ailing bookshop and writes the first of several quarter-of-a-million pound checks. With that money, Gorsky has tasked Nikola, the store's bored and brilliant clerk, with sourcing books for a massive personal library, which will be housed in the magnificent, palatial home Gorsky happens to be building immediately next to Nikola's own modest dwelling. Gorsky needs a tasteful collection of Russian literature to woo a long-lost love—no matter that she happens to be married to an Englishman. His passion for her surpasses even his immeasurable wealth, and Nikola will be drawn into a world of opulence, greed, capitalism, sex, and beauty as he helps Gorsky pursue this doomed love. Charmingly written and inspired by *The Great Gatsby*, *Gorsky* is a vicarious thrill—an ode to cosmopolitan taste and a brilliant reimagining of a powerful classic.

Why do some individuals and teams succeed more quickly than others and sustain that success over the long term? 2. Of those who pull it off, why are some miserable and others consistently happy on their journey? 3. What motivates people to reach for higher levels of success in the first place, and what practices help them improve the most After extensive original research and a decade as the world's leading high performance coach, Burchard found the answers. It turns out that just six deliberate habits give you the edge. Anyone can practice these habits and, when they do, extraordinary things happen in their lives, relationships, and careers. Which habits can help you achieve long-term success and vibrant well-being no matter your age, career, strengths, or personality? To become a high performer, you must seek clarity, generate energy, raise necessity, increase productivity, develop influence, and demonstrate courage.

The art and science of how to do all this is what this book is about. Whether you want to get more done, lead others better, develop skill faster, or dramatically increase your sense of joy and confidence, the habits in this book will help you achieve it faster. Each of the six habits is illustrated by powerful vignettes, cutting-edge science, thought-provoking exercises, and real-world daily practices you can implement right now. If you've ever wanted a science-backed, heart-centered plan to living a better quality of life, it's in your hands. Best of all, you can measure your progress. A link to a free professional assessment is included in the book.

Discover the original international diet sensation—used by Adele, heavyweight champion David Haye, and Pippa Middleton—that will help you lose seven pounds in seven days while experiencing lasting energy and eating all the foods you love. Over the past few years, fasting has become a popular diet option. Studies show that fasting—whether through moderate calorie restriction every day or the more severe but less frequent intermittent fasting—can help people lose about thirteen to fourteen pounds in six months and reduce their risk of developing disease. When we fast, our body's energy stores activate what is known as sirtuins, or the “skinny gene,” and many positive changes ensue. Fat storage is switched off, and our body stops its normal growth processes and goes into “survival” mode. Fat burning is stimulated and the genes involved in the repair and rejuvenation of our cells are turned on—which all results to weight loss and improved resistance to disease. But if not done correctly, fasting can lead to hunger, irritability, fatigue, and loss of muscle. Enter Sirtfoods: a newly discovered group of foods that is revolutionizing healthy eating. Ranging from chocolate and red wine to garlic and walnuts, sirtfoods are particularly rich in special nutrients that help us activate the same skinny genes in our bodies that fasting triggers. Nutritionists Aidan Goggins and Glen Matten have created The Sirtfood Diet to help you effectively lose weight and improve your resistance to disease, while still giving you incredible energy and glowing health.

Alla Osipenko is the gripping story of one of history's greatest ballerinas, a courageous rebel who paid the price for speaking truth to the Soviet State. The daughter of a distinguished Russian aristocratic and artistic family, Osipenko was born in 1932 but was raised in a cocoon of pre-Revolutionary decorum and protocol. In Leningrad she studied with Agrippina Vaganova, the most revered and influential of all Russian ballet instructors. In 1950, she joined the Mariinsky (then-Kirov) Ballet, where her lines, shapes, and movements both exemplified the

venerable traditions of Russian ballet and propelled those traditions forward into uncharted and experimental realms. She was the first of her generation of Kirov stars to enchant the West when she danced in Paris in 1956. Five years later, she was a key figure in the sensational success of the Kirov in its European debut. But dancing for the establishment had its downsides, and Osipenko's sharp tongue and marked independence, as well as her almost-reckless flouting of Soviet rules for personal and political conduct, soon found her all but quarantined in Russia. An internationally acclaimed ballerina at the height of her career, she found that she would now have to prevail in the face of every attempt by the Soviet state and the Kirov administration to humble her, even as her friends and schoolmates (including Natalia Makarova and Mikhail Baryshnikov) defected to the West. In *Alla Osipenko*, acclaimed dance writer Joel Lobenthal tells Osipenko's story for the first time in English, drawing on 40 interviews with the prima ballerina, and tracing her life from Classical darling to avant-garde rebel. Throughout the book, Osipenko talks frankly and freely in a way that few Russians of her generation have allowed themselves to. She discusses her traumatic relationship to the Soviet state, her close but often-fraught relationship with her family, her four husbands, her lovers, her colleagues, and her son's arrest in Leningrad and his subsequent death. Her voice rises above the incidents as unhesitating and graceful as her legendary adagios. Candid, irreverent, and, above all, independent -- Osipenko and her story open a window into a fascinating and little-discussed world.

From the host of Anthony Bourdain: Parts Unknown and bestselling author of Kitchen Confidential, this wonderful book sees Bourdain travelling the world discovering exotic foods. Dodging minefields in Cambodia, diving into the icy waters outside a Russian bath, Chef Bourdain travels the world over in search of the ultimate meal. The only thing Anthony Bourdain loves as much as cooking is traveling, and A Cook's Tour is the shotgun marriage of his two greatest passions. Inspired by the question, 'What would be the perfect meal?', Anthony sets out on a quest for his culinary holy grail. Our adventurous chef starts out in Japan, where he eats traditional Fugu, a poisonous blowfish which can be prepared only by specially licensed chefs. He then travels to Cambodia, up the mine-studded road to Pailin into autonomous Khmer Rouge territory and to Phnom Penh's Gun Club, where local fare is served up alongside a menu of

available firearms. In Saigon, he's treated to a sustaining meal of live Cobra heart before moving on to savor a snack with the Viet Cong in the Mecong Delta. Further west, Kitchen Confidential fans will recognize the Gironde of Tony's youth, the first stop on his European itinerary. And from France, it's on to Portugal, where an entire village has been fattening a pig for months in anticipation of his arrival. And we're only halfway around the globe. . . A Cook's Tour recounts, in Bourdain's inimitable style, the adventures and misadventures of America's favorite chef.

Ciò che mi ha sempre appassionato è il comportamento umano e gli atteggiamenti psicologici nei confronti del cibo e delle situazioni emotive. La mia strada lavorativa e personale mi ha poi portato a conoscere approfonditamente gli alimenti, come agiscono tra loro e come le persone gestiscono il cibo in situazioni stressanti. Il master in nutrizione e la mia esperienza mi hanno dato le conoscenze per creare un sistema educativo alimentare (ISCER) che permette di mangiare a sazietà stimolando il metabolismo e perdendo peso. Ne consegue un corpo più forte, più energico e vitale, una sensazione di benessere e felicità con l'innalzamento della serotonina. Insegno a conoscere gli zuccheri, veri devastatori della salute e quali malattie e dipendenze essi portino.
