An absolute must-read for anyone who loves books In Closing Time, Joe Queenan shared how he became a voracious reader to escape a joyless childhood. Now, like many bibliophiles, he fears for the books that once saved him. In One for the Books, Queenan examines the entire culture of reading and what books really mean in people's lives today. What does it suggest if a person has no books displayed in his living room? Can an obsession with reading prove detrimental to one's well being? How useful are covers in selling books? Queenan's many fans—as well as anyone who loves books and reading—will want to join him on his unforgettably funny and moving journey.

Following a lecture of November 27, 1919 requested by the Basel Department of Education, sixty members of the audience invited Rudolf Steiner to return and deliver a complete lecture course on his approach to education. These lectures are the result.

This is the fourth of a DIY city guide series on the market, now with the most popular city in the USA: New York City. These guides are colouring and creative activity books, travel notebooks, and city guides all in one. Each book contains beautiful illustrations of the city for you to colour in or finish, inspirational to-do lists, and fun facts about the city. But it also leaves plenty of space for your own stories, drawings, pictures, tickets, notes, and tips. With this journal you create your own city guide full of memories and tips about your trip to the city to cherish as a keepsake of your trip and to inspire friends to go there, too.

This book analyze the role and the best practices of the Project Management Officer (PMO), a strategic function for those organizations, which are focused on the technological transformation and the digitalization of their own business. The author decided to activate a comparison between the competencies and the experiences typical of the professionals and the managers' concrete activities, in order to connect two different views. This project, aimed to connect practice and theory and create a knowhow useful for companies' activity, has identify six primary themes. First of all, it propose a predictive model for current organizations, meant as idiosyncratic combination of projects and processes. They then analyze the concept and the role of PMO, as central figure in determining the efficient control for the transformational process, as required by the business digitalization. Another chapter is related to a critical analysis of the company's functions that a PMO could do (they are mostly seven). The different activities' combinations create different PMO's models, which have to be plan in correspondence of the different business's needs. Another important analysis concerns the coding processes related to the project's knowhow (reporting, Project Review Meeting, issue logs, i.e.). Peculiar attention is given to the risk management, topic that is always more central in a dynamic environment, oriented to the resources' optimization. This contest is completed in the last chapter, in which are reported some considerations from interviews made at CIOs of leading companies, about IT and project management issues.

La collezione Estorick è stata aperta come museo nel 1998, a Londra. Lo scopo, a cui Mr Estorick dedicò tutta la sua attività di committente, è quello di promuovere nel Regno Unito l'arte italiana contemporanea, meno nota rispetto all'arte barocca e del Rinascimento. La collezione, ora passata nelle mani del figlio Michael, comprende opere di: Giacomo Balla, Umberto Boccioni, Massimo Campigli, Carlo Carrà, Giorgio de Chirico, Gerardo Dottori, Corrado Govoni, Emilio Greco, Renato Guttuso, Giacomo Manzù, Marino Marini, Amedeo Modigliani, Giorgio Morandi, Zoran Music, Ottone Rosai, Medardo Rosso, Luigi Russolo, Giuditta Scalini, Gino Severini, Mario Sironi, Ardengo Soffici e molti altri artisti.

Secret deals, powerful men and murder - One Way or Another is a chillingly prophetic work. The Knight and Death features a nameless (and apparently terminally ill) detective investigating the murder of a lawyer believed to have been killed by a mysterious revolutionary group. The detective thinks otherwise and sets out to prove that powerful business interests were involved, with the revolutionary group invented to cover up the real reasons behind the murder.

Hot and Smoky Shrimp Tacos, Roasted Wild Mushroom Tacos with Queso Fresco, Fire-Roasted Corn and Poblano Chile Tacos-these are a few of the most taste-tempting tacos you'll ever put in your mouth. And what to top them with-of course, it must be the perfect salsa!

From Almanac of Fall (1984) to The Turin Horse (2011), renowned Hungarian filmmaker Béla Tarr has followed the

collapse of the communist promise. The "time after" is not the uniform and morose time of those who no longer believe in anything. It is the time when we are less interested in histories and their successes or failures than we are in the delicate fabric of time from which they are carved. It is the time of pure material events against which belief will be measured for as long as life will sustain it.

This book aims to provide solid bases for the study of physics for the university and it is divided into four parts, each dedicated to a fundamental branch of physics: quantum mechanics, theoretical physics, particle physics and condensed matter physics. In the first part we start with the concept of wave function, until the Heisenberg uncertainty principle. In the second part, after recalling the basic concepts of relativity, we treat the elementary particles and the hadrons, arriving to the notions of scattering and cross section. The third part is dedicated to the theoretical physics, where we analyze the field theory and the concepts of Lagrangian and Hamiltonian, introducing the quantum electrodynamics (QED), passing through the Klein-Gordon, Dirac and Maxwell fields. In the last part of the book we expose the basics of the condensed matter physics, including diffusion and Brownian motion, Drude and Sommerfeld models, the calculation of specific heat and the principal mechanical properties of solids, with references to lattice defects and semiconductors.

This collection of essays by philosophers who are also fans does a deep probe of the Sopranos, analyzing the adventures and personalities of Tony, Carmella, Livia, and the rest of television's most irresistible mafia family for their metaphysical, epistemological, value theory, eastern philosophical, and contemporary postmodern possibilities. No prior philosophical qualifications or mob connections are required to enjoy these musings, which are presented with the same vibrancy and wit that have made the show such a hit.

He is Sam Fisher: Third Echelon special operative. And when a cargo freighter loaded down with radioactive material is headed towards the coast of the United States, he has minutes to disable the ship - or die trying.

The enemy from within . . . Iranian-born British Commando Major Ray Kerman was a rising star in the SAS -- until he abruptly switched loyalties while on a mission in the Middle East. Fanatically determined to employ his brilliant talents and training in the destruction of those he once swore to protect, he is now General Ravi Rashood, leader of the world's most vicious terrorist organization -- and he has found his ultimate weapon: Barracuda 945. A sleek and silent Russian hunter-killer nuclear submarine that can fire land-attack guided missiles from below the ocean's surface, it is invisible to all pursuers and virtually impossible to track. Yet Admiral Arnold Morgan, the President's National Security Adviser, must somehow marshal America's forces and hunt down this 8,000-ton nightmare of modern warfare before it unleashes its fire and death . . . or the first target to fall will be California.

After the incredible success of *Animal*, K'wan is back with the second, bloody installment in the new *Animal* saga. Secrets are revealed, sides are chosen and bodies are dropped...it's on! The man ordered to take *Animal* from the world turns out to be the man who brought him into it. *Animal* finds himself torn between his hatred for the father who had abandoned him and the man who had taken everything from him. An uneasy truce is formed between father and son to take down a common enemy and finally grant *Animal* his freedom from the blood debt he's carried for so many years. But when the ghosts of *Animal*'s past catch up with him he learns that nothing is what it seems, and everything is subject to corruption, even his love for Gucci.

A challenge to the hegemony of perspective: investigations into other forms of representation used by different cultures over the last two thousand years. For more than half a century, Erwin Panofsky's *Perspective as Symbolic Form* has dominated studies of visual representation. Despite the hegemony of central projection, or perspective, other equally important methods of representation have much to tell us. Parallel projection can be found on classical Greek vases, in Pompeian frescoes, in Byzantine mosaics; it returned in works of the historical avant-garde, and remains the dominant form of representation in China. In *Oblique Drawing*, Massimo Scolari investigates "anti-perspective" visual representation over two thousand years, finding in the course of his investigation that visual and conceptual representations are manifestations of the ideological and philosophical orientations of different cultures. Images prove to be not just a form of art but a form of thought, a projection of a way of life. Scolari's generously illustrated studies show that illusionistic perspective is not the only, or even the best, representation of objects in history; parallel projection, for example, preserves in scale the actual measurements of objects it represents, avoiding the distortions of one-point perspective. Scolari analyzes the use of nonperspectival representations in pre-Renaissance images of machines and military hardware, architectural models and drawings, and illustrations of geometrical solids. He challenges Panofsky's theory of Pompeian perspective and explains the difficulties encountered by the Chinese when they viewed Jesuit missionaries' perspectival religious images. Scolari vividly demonstrates the diversity of representational forms devised through the centuries, and shows how each one reveals something that is lacking in the others.

This is the book that has been electrifying Rome and the rest of Europe for three years! This fascinating inquiry into the theories and the truths of the most disconcerting mystery of the 20th Century was a huge best-seller in Europe. On June 26, 2000, Vatican officials (including Cardinal Bertone) released what they claim was the Third Secret of Fatima. They further said that it was a prediction of the attempted assassination of Pope John Paul II in 1981. Antonio Socci, an acclaimed Italian journalist and television personality, originally sided with the Vatican's interpretation of the Third Secret. Upon closer investigation of this matter, the evidence led him to the conclusion that there is another document of the Third Secret containing the actual words of Our Lady. So far, the Vatican is still hiding this text while claiming that all is released. Antonio Socci, for the first time, in this book produces the testimony of a still-living witness from the inner circle of Pope John XXIII, to prove his point. This book has caused a public sensation and debate. Far from being a

¿dead issue¿ the urgent message of Our Lady to the shepherd children of Fatima is now being more critically discussed and examined than ever before.

How the Chinese look at themselves, the world, and the challenges of the future. Where is China, What is China: Where are the traditional pigtailed of the old mandarins, the Mao's bicycles and his suits? Where are the large families with the many concubines? The stuff that made China for centuries in all the stories Chinese and foreigners told of this huge country is gone. China now is skyscrapers, limousines, fast trains, science fiction airports, bright neon lights that explode in the night more than fireworks. Chinese are changing and have changed beyond recognition. In fact, they have changed so much that they do not see themselves in their present shape, just like an animal going through a metamorphosis. We are in the middle of this huge transformation and we don't know if and when the new shape will stabilize and what impact it will have on the conscience of the Chinese and of the people of the world looking at China. This book is an exploration into this huge revolution that is affecting the whole planet in the biggest way possibly since the fall of the Roman Empire.

Citizen Kane, widely considered the greatest film ever made, continues to fascinate critics and historians as well as filmgoers. While credit for its genius has traditionally been attributed solely to its director, Orson Welles, Carringer's pioneering study documents the shared creative achievements of Welles and his principal collaborators. The Making of Citizen Kane, copiously illustrated with rare photographs and production documents, also provides an in-depth view of the operations of the Hollywood studio system. This new edition includes a revised preface and overview of criticism, an updated chronology of the film's reception history, a reconsideration of the locus of responsibility of Welles's ill-fated *The Magnificent Ambersons*, and new photographs.

In English and Italian, with special t.p. in Italian: Perche l'Italia e entrata nell grande guerra ...

A MAJOR MOTION PICTURE STARRING BELLA THORNE! A heartbreaking tale of love, loss and one nearly perfect summer -- perfect for fans of *The Fault In Our Stars* and *Love, Simon*. Seventeen-year-old Katie Price has a rare disease that makes exposure to even the smallest amount of sunlight deadly. Confined to her house during the day, her company is limited to her widowed father and her best (okay, only) friend. It isn't until after nightfall that Katie's world opens up, when she takes her guitar to the local train station and plays for the people coming and going. Charlie Reed is a former all-star athlete at a crossroads in his life - and the boy Katie has secretly admired from afar for years. When he happens upon her playing guitar one night, fate intervenes and the two embark on a star-crossed romance. As they challenge each other to chase their dreams and fall for each other under the summer night sky, Katie and Charlie form a bond strong enough to change them -- and everyone around them -- forever.

Throughout history, some royal rulers were wise and just; others, well, they were just plain loony. From the inbred and mentally deficient to the delusional and the criminally insane, those royal eccentrics come to life here. Some are well-known, like "Ivan the Terrible" of Russia, who enjoyed torturing both animals and people for sport. Others were less famous, but no less twisted, including Hungary's Erzsebet Bathory, who believed she could improve her complexion by bathing in the blood of young girls. And before he became an unhinged sultan at age 25, Mustafa I of Turkey was kept in a cage by his ruling brother. Some 40 mad rulers are profiled in all, making this the greatest collection of raving royals ever assembled.
