The international range of contributors and case studies provide clear perspectives on why scenographic design has become a central consideration for performance makers today. The extended introduction defines the characteristics of 21st-century scenography and examines the scope and potentials of this new field. This book, which Foucault himself has judged accurate, is the first to provide a sustained, coherent analysis of Foucault's work as a whole. To demonstrate the sense in which Foucault's work is beyond structuralism and hermeneutics, the authors unfold a careful, analytical exposition of his oeuvre. They argue that during the of Foucault's work became a sustained and largely successful effort to develop a new method—"interpretative analytics"—capable fo explaining both the logic of structuralism's claim to be an objective science and the apparent validity of the hermeneutical counterclaim that the human sciences can proceed only by understanding the deepest meaning of the subject and his tradition. "There are many new secondary sources [on Foucault]. None surpass the book by Hubert Dreyfus and Paul Rabinow. . . . The American paperback edition contains Foucault's 'On the Genealogy of Ethics,' a lucid interview that is now our best source for seeing how he construed the whole project of the history of sexuality."—David Hoy, London Review of Books

Expressionism and Film, originally published in German in 1926, is not only a classic of film history, but also an important work from the early phase of modern media history. Written with analytical brilliance and historical vision by a well-known contemporary of the expressionist movement, it captures Expressionism at the time of its impending conclusion—as an intersection of world view, resoluteness of form, and medial transition. Though one of the most frequently-cited works of Weimar culture, Kurtz's groundbreaking work, which is on a par with Siegfried Kracauer's From Caligari to Hitler and Lotte Eisner's The Haunted Screen, has never been published in English. Its relevance and historical contexts are analyzed in a concise afterword by the Swiss scholars Christian Kiening and Ulrich Johannes Beil.

Josef Svoboda, of Czechoslovakia, is probably the most innovative designer in the theatre today. Every year, throughout a 'season' of twelve months, Svoboda totally designs--'scenographs,' as he prefers to call his work--productions for the legitimate theatre, for operas and ballets and occasionally for films, not only in his native country, but also in England, Scandinavia, Germany, Italy and elsewhere in Europe. In this country he is best know for the series of multiscreen films shown in the Czechoslovak pavillion at Expo 67 in Montreal and for the stark, marvellously evocative sets for the Metropolitan Opera's opening-night production of Carmen in 1972. The major part of this study is devoted to detailed, professional considerations of some sixty key productions, described largely in Svoboda's own words, transcribed and translated from tape-recorded interviews with the author. More than two hundred black-and-white photographs visually reinforce Mr. Burian's explication of the development of Svoboda's methods. Svoboda's scenography emerges as total design, a synthesis of traditional methods and technical innovations that provide a dynamic atmosphere as well as the physical setting.--Back cover.

Coronada y el toro (Coronada and the Bull) is a play written in 1974 by Francisco Morales Nieva (1924–2016), a prominent figure in the history of Spanish theatre. Even though the aesthetic quality of his drama competed with that of his contemporaries, with many of whom he interacted (Ionesco, Genet, Brecht, Grotowski, et al.), Nieva's recognition was unduly delayed within Spain and, on the international scene, his name remains eclipsed by playwrights such as Federico García Lorca and Antonio Buero Vallejo. Traditionalist and populist yet cosmopolitan and neo-avant-garde, Nieva began writing plays in the late 1940s but never got the chance to perform any on the commercial stage until 1976, a few months after the death of General Francisco Franco, whose

copyright machine forced his work underground. Hard to subject to any single classification, Nieva's theatre is as complex as it is innovative in its combination of resources from a wide range of artistic trends, from the género chico to the Baroque to postmodernism. Coronada y el toro is a sophisticated masterpiece, rich in intertextuality, humour, and suspense.

Discusses four types of theatrical landscapes; the deadly theatre, the holy theatre, the rough theatre, and the immediate theatre. Over the past three decades, theater studies has undergone a radical worldwide development and renewal. This happened through two different yet complementary paths: the first (North American in origin) led to the birth of the discipline of performance studies; the second (European continental) is what Marco de Marinis calls "new teatrology." New teatrology arises from the dialogue between theatre history and the humanities and social sciences, yet de Marinis also characterizes it by a strong experimental imprint resulting from a close and participatory relationship with theatrical practice and its players. The first part of Understanding Theatre retraces the main steps that brought theater studies to make the transition from performance to the audience to their receptive act, giving proper attention to the documentary element. In the second part, de Marinis tests the new perspective of investigation on some fundamental innovative theatrical experiences of the twentieth century. In this way, the volume collects de Marinis's essays--written for magazines, conference programs, and edited collections--from a span of almost thirty years and documents key post-semiological developments in how we understand theater today.

Konstantin Stanislavsky is one of the colossi not simply of Russian, but American and European theatre. His reputation is based mainly on his famous theory of acting and its application in practice. This volume contains his posthumous work, The System and Methods of Creative Art, together with an introductory essay giving a careful exposition and a critical analysis of his 'system', and two appendices dealing with his views on stage ethics and melodrama. It provides an excellent opportunity for the study of 'the essential Stanislavsky' in a comprehensive and compact form.

'A dense, challenging and important book.' Philip French Observer 'At the very least, this blockbuster is probably the best single volume history of Hollywood we're likely to get for a very long time.' Paul Kerr City Limits 'Persuasively argued, the book is also packed with facts, figures and photographs.' Nigel Andrews Financial Times Acclaimed for their breakthrough approach, Bordwell, Staiger and Thompson analyze the basic conditions of American film-making as a historical institution and consider to what extent Hollywood film production constitutes a systematic enterprise, in both its style and its business operations. Despite differences of director, genre or studio, most Hollywood films operate within a set of shared assumptions about how a film should look and sound. Such assumptions are neither natural nor inevitable; but because classical-style films have been the type most widely seen, they have come to be accepted as the 'norm' of film-making and viewing. The authors show how these classical conventions were formulated and standardized, and how they responded to the arrival of sound, colour, widescreen ratios and stereophonic sound. They argue that each new technological development has served a function within an existing narrational system. The authors also examine how the Hollywood cinema standardized the film-making process itself. They describe how, over the course of its history, Hollywood developed distinct modes of production in a constant search for maximum efficiency, predictability and novelty. Set apart by its combination of theoretical analysis and empirical evidence, this book is the standard work on the classical Hollywood cinema style of film-making from the silent era to the 1960s. Now available in paperback, it is a 'must' for film students, lecturers and all those seriously interested in the development of the film industry.
