"The early settlers dubbed California The Golden State, and The Land of Milk and Honey. Today there are the obvious ironies -- sprawl, spaghetti junctions and skid row--but the place is not so easily distilled or visualized, either as a clichéd paradise or as its demise. There's a strange kind of harmony when it's all seen together--the sublime, the psychedelic, the self-destructive. Like all places, it's unpredictable and contradictory, but to greater extremes. Cultures and histories coexist, the beautiful sits next to the ugly, the redemptive next to the despairing, and all under a strange and singular light, as transcendent as it is harsh. The pictures in this book begin in the desert east of Los Angeles and move west through the city, ending at the Pacific. This general westward movement alludes to a thirst for water, as well as the original expansion of America, which was born in the East and which hungrily drove itself West until reaching the Pacific, thereby fulfilling its "manifest" destiny." -- Publisher's description

With the heart of Stand By Me and the genius horror of Christine, MILE 81 is Stephen King unleashing his imagination as he drives past one of those road

signs . . . At Mile 81 on the Maine Turnpike is a boarded up rest stop, a place where high school kids drink and get into the kind of trouble high school kids have always gotten into. It's the place where Pete Simmons goes when his older brother heads off to the gravel pit to play 'paratroopers over the side'. Pete, armed with only the magnifying glass he got for his tenth birthday, finds a discarded bottle of vodka in the boarded up burger shack and drinks enough to pass out. That's why he doesn't notice a freshly mud-spattered station wagon (which is strange because there hadn't been any rain in New England for over a week) which veers into the Mile 81 rest area, ignoring the sign that reads 'closed, no services'. The driver's door opens but nobody gets out . . .

Crisis workers make split-second decisions every day that affect the mental health and well-being of individuals, families, and entire communities. They support and guide people through health diagnoses, bankruptcies, sexual assaults, deaths of loved ones, suicide attempts, and natural or man-made disasters from the front lines. While professions vary from mental health professionals, emergency responders, educators, business managers or volunteers such as suicide hotline workers, all have a common and urgent need for a rapid reference that covers every type of traumatic event they may be asked to respond to in the course of an unpredictable and highly stressful day. The Pocket Guide to Crisis Intervention is a complete crisis toolkit, a trusted resource to consult on the fly, packed with easy-to-follow, step-by-step evidence-based protocols for responding effectively to a broad range of traumatic events. Checklists, bullets, and boxes highlight symptoms & warning signs and provide action plans, do's & don'ts, and screening & assessment questions. The open layout and two-color design

make this pocket guide as visually appealing as it practical, ensuring at-a-glance lookup of the essentials of managing the most common types of crisis. More than just a collection of action lists, though, this pocket guide explains theories and models in clear, jargon-free language, offering tips for clinical practice, treatment planning, referrals, and coordinating services as needed. It can be used as a field manual for seasoned professionals or as a training tool for new recruits and practitioners seeking to sharpen their skills.

This volume investigates the ways in which Italian women writers, filmmakers, and performers have represented female identity across genres from the immediate post-World War II period to the turn of the twenty-first century. Considering genres such as prose, poetry, drama, and film, these essays examine the vision of female agency and self-actualization arising from women

artists' critique of female identity. This dual approach reveals unique interpretations of womanhood in Italy spanning more than fifty years, while also providing a deep investigation of the manipulation of canvases historically centered on the male subject. With its unique coupling of generic and thematic concerns, the volume contributes to the ever expanding female artistic legacy, and to our understanding of postwar Italian women's evolving relationship to the narration of history, gender roles, and these artists' use and revision of generic convention to communicate their vision.

“Excuse me, are you Jewish?” With these words, the relentlessly cheerful, ideologically driven emissaries of Chabad-Lubavitch approach perfect strangers on street corners throughout the world in their ongoing efforts to persuade their fellow Jews to live religiously observant lives. In *The Rebbe’s Army*, award-winning journalist Sue Fishkoff gives us the first behind-the-scenes look at this small Brooklyn-based group of Hasidim and the extraordinary lengths to which they take their mission of outreach. They seem to be everywhere—in big cities, small towns, and suburbs throughout the United States, and in sixty-one countries around the world. They light giant Chanukah menorahs in public squares, run “Chabad houses” on college campuses from Berkeley to Cambridge, give weekly bible classes in the Capitol basement in Washington, D.C., run a nonsectarian drug treatment center in Los Angeles, sponsor the world’s biggest Passover Seder in Nepal, establish synagogues, Hebrew schools, and day-care centers in places that are often indifferent and occasionally hostile to their outreach efforts. They have built a billion-dollar

international empire, with their own news service, publishing house, and hundreds of Websites. Who are these people? How successful are they in making Jews more observant? What influence does their late Rebbe, Menachem Mendel Schneerson (who some thought was the Messiah), continue to have on his followers? Fishkoff spent a year interviewing Lubavitch emissaries from Anchorage to Miami and has written an engaging and fair-minded account of a Hasidic group whose motives and methodology continue to be the subject of speculation and controversy.

Years before they served together on board the U.S.S. Enterprise™, Commander William Riker and ship's counselor Deanna Troi had a tempestuous love affair on her home planet of Betazed. Now, their passions have cooled and they serve together as friends. Yet the memories of that time linger and Riker and Troi remain Imzadi- a powerful Betazoid term that describes the enduring bond they still share. During delicate negotiations with an aggressive race called the Sindareen Deanna Troi mysteriously falls ill and dies. But her death is only the beginning of the adventure for Commander Riker, an adventure that will take him across time, pit him against one of his closest friends, and force him to choose between Starfleet's strictest rule and the one he calls Imzadi.

Why have so many central and inner cities in Europe, North America and Australia been so radically revamped in the last three decades, converting urban decay into new chic? Will the process continue in the twenty-first century or has it ended? What does this mean for the people who live there? Can they do anything about it? This book challenges conventional wisdom, which holds gentrification to be the simple outcome of new middle-class tastes and a demand for urban living. It reveals gentrification as part of a much larger shift in the political economy and culture of the late twentieth century. Documenting in gritty detail the conflicts that gentrification brings to the new urban 'frontiers', the author

explores the interconnections of urban policy, patterns of investment, eviction, and homelessness. The failure of liberal urban policy and the end of the 1980s financial boom have made the end-of-the-century city a darker and more dangerous place. Public policy and the private market are conspiring against minorities, working people, the poor, and the homeless as never before. In the emerging revanchist city, gentrification has become part of this policy of revenge. With contributions from leading thinkers such as J. Bhagwati and Robert Solow, this edited collection examines some hotly debated issues in today's world. The significance of globalization and its effects on welfare states is discussed and analyzed. A special chapter is devoted to terrorism, and it is explained why some people are willing to sacrifice their lives to gain 'heavenly goods'. The role of multinationals in the globalization process is examined as is the importance of changing and evolving social norms regarding work and leisure for the survival of today's welfare states.

Twelve Years a Slave (1853) is a memoir and slave narrative by Solomon Northup, as told to and edited by David Wilson. Northup, a black man who was born free in New York, details his kidnapping in Washington, D.C. and subsequent sale into slavery. After having been kept in bondage for 12 years in Louisiana by various masters, Northup was able to write to friends and family in New York, who were in turn able to secure his release. Northup's account provides extensive details on the slave markets in Washington, D.C. and New Orleans and describes at length cotton and sugar

cultivation on major plantations in Louisiana.

So much for a “romantic getaway” at their secluded summer home. After Jessie is handcuffed to the bedposts—and Gerald crosses a line with his wife—the day ends with deadly consequences. Now Jessie is utterly trapped in an isolated lakeside house that has become her prison—and comes face-to-face with her deepest, darkest fears and memories. A distinction is made in formal semantics between "stage-level predicates," predicates that describe the general state of a noun, and "individual-level predicates," predicates that specify the specific properties of a noun. Fernald investigates various contexts in which this distinction is traditionally said to come into play. His aim is to show that the effects displayed are not uniform, and that the differences between the analyses proposed in the literature arise from the authors considering different subsets of data that they take to exemplify the "core" meaning of the stage/individual distinction.

Fernald presents alternatives and extensions that shed light on the limitations of

previous theories, as well as making original observations about important aspects of the topic, including coercion, and perceptual reports vs. other phenomena.

CAUTION! You are about to enter a world... where all engineering ingenuity has been employed for public spectacles of torture and death where the stock market operates with pari-mutuel machines where a court clerk transcribes testimony on punch cards, then feeds it to a jury machine where the dream real-estate development of today has become a cracked-concrete savage jungle In this world, young lawyer Charles Muddin battles a great combine of corporate interests—battles them in board meetings and in dark alleys—in a struggle that lays bare some brutal promises of the future...promises we are beginning to make right now. Situations involving conflict and forced migration have become increasingly commonplace in today's world. The need to understand the causes, consequences, and characteristics of these situations is creating a burgeoning field of research. But given the nature of complex emergency settings, traditional research guidelines may be inappropriate. The research and policy community has recognized this problem and has begun to address issues surrounding the ethics of doing research in emergency

settings and among conflict-affected and displaced populations. The Roundtable on the Demography of Forced Migration, under the aegis of the Committee on Population of the National Research Council, held a workshop to examine some of these issues. This report to the roundtable summarizes the workshop presentations and discussion.

Evaluating and treating patients with violent ideations and behaviors can be frustrating, anxiety-provoking, and even dangerous, as errors in judgment can lead to disastrous consequences. Fortunately, there is the Textbook of Violence Assessment and Management, the first and only comprehensive textbook on assessing the potentially violent patient for mental health clinicians on the front lines of patient care. Uniquely qualified to produce this comprehensive volume, the editors have assembled a distinguished roster of contributors who, in 28 practical chapters, combine evidence-based medicine with expert opinion to address the topic of patient violence in all its diversity of presentation and expression. Dr. Simon is Director of the Program in Psychiatry and Law at Georgetown University School of Medicine, as well as the author or co-

author of more than two dozen books. Dr. Tardiff, Professor of Psychiatry and Public Health at the Payne Whitney Clinic, The New York Hospital -- Cornell Medical Center, is the author of *The Concise Guide to Assessment and Management of Violent Patients*, an introduction to aggression management now in its second edition. Violence is both endemic to our society and epidemic in our age. Skilled assessment and management of violence is therefore critical for mental health professionals involved in patient care. *The Textbook of Violence Assessment and Management* includes many features designed to instruct and support these clinicians. For example: It is the first comprehensive textbook to take the mental health professional from evaluation and assessment to treatment and management of patients who are or may become violent. The 28 chapters address the diversity of clinical settings, patient demographics, psychopathology and treatment modalities, making this work useful as both a textbook and a reference that clinicians can consult as needed for particular cases. End-of-chapter "Key Points" highlight the most important concepts and conclusions, allowing students to review and consolidate their learning and practicing professionals to locate critical information quickly. Clinical case examples abound, providing rich and nuanced perspectives on patient behavior, evaluation and management. The textbook includes a separate chapter on evaluating patients from different cultures, a competency that becomes more crucial as patient populations become more diverse. Increasing numbers of veterans are diagnosed with PTSD and traumatic brain injury. Campus tragedies such as Virginia Tech are fresh in our collective memory. This text is both timely and necessary -- not just for mental health professionals and their patients, but for the families and communities whose safety depends upon competent professional judgment.

Have you heard about the man who lived with a hole in his head? Or the boy raised by his parents as a girl? From the woman with multiple personalities, to the man with no brain, this collection of case studies provides a compelling insight into the human mind. This is a fascinating collection of human stories. Some are well-known case studies that have informed clinical practice, others are relatively unknown. For this edition, Rolls has added recent research findings on each case study plus four brand new cases: the story of Washoe, the ape who could communicate; the much debated case of Holly Ramona and repressed memory; and Kim Peek, the real 'Rainman'. Classic Case Studies in Psychology is for everyone who has ever wondered about the stranger side of life. No prior knowledge of psychology is required, just an open mind. For those who wish to use this book as part of their studies, or who are just keen to learn more, fun multiple choice questions, fascinating further reading, helpful web links, and self-assessment questions are all available free on our website, www.routledge.com/cw/rolls.
