

## Marijuana Cultivation Plan Oregon State Of Oregon

If 'all politics is local', then it stands to reason that what is going on in the provinces must in fact be what counts for the people. This book tries to follow the statehood process, looks at state and local pension plans, follows the serpentine money trail of state and local grants while offering a brief history of them, examining high tech as it relates to local development and reviews citizen initiative proposals over a 15-year period.

MARIJUANA GROWING AND BUSINESS How do you start Cannabusiness? How do I write a business plan for a dispensary? Thinking about starting a cannabis business but don't know where to begin? THIS BOOK WILL TEACH YOU HOW TO GROW MARIJUANA YOURSELF, STEP BY STEP, AND MOST IMPORTANTLY HOW TO CREATE YOUR OWN BUSINESS The market value of the U.S. cannabis industry is projected to reach \$30 billion annually by 2025. Cannabis has crept out of the shadows of the stoner culture and emerged as a multi-billion-dollar industry. Before you start any business, you should have some idea of what the industry landscape is like: What are the earning potentials? What are the risks? Who is your competition? Before you get started Cannabis cultivation laws vary widely state-by-state. Also, we can't stress this enough: Growing cannabis is illegal in a lot of places, and the penalties - which include steep fines and prison time - can be much worse than possession, since growing can imply an intent to distribute. You need to be especially scrupulous about heeding these rules. Do your homework and read up on the laws in your state. Some states prohibit growing cannabis, while others, like my home state of California, permits anyone over age 21 to grow cannabis, but only up to a certain number of plants. Colorado, Oregon, Nevada, Vermont, and Maine also allow cultivation, but again, the specifics depend on the state. Definitely clarify what your rights are before you start the glorious path to at-home bud gardening. Let's start! Reading the first book you will learn: GROWING MARIJUANA FOR BEGINNERS Step-by-Step in 10 STEPS CANNABIS SATIVA CANNABIS INDICA CANNABIS RUDERALIS DIFFERENT PERCENTAGES OF THC THE RESIN CBD AND THC HOW GENETICS INFLUENCES RELATIONSHIPS BETWEEN THC AND CBD THE STAGES OF CANNABIS CULTIVATION ELEMENTS TO CHECK ON CANNABIS SEEDS TEMPERATURE PLAYS A FUNDAMENTAL ROLE IN GERMINATION GLASS OF WATER TECHNIQUE WET PAPER NAPKIN TECHNIQUE USE CUBES IN ROCK WOOL INDOOR OUTDOORS TRANSPLANT: STEP-BY-STEP GUIDE HARVEST DRYING HOW TO MAKE FEMINIZED CANNABIS SEEDS NUTRIENTS And much, much more! In the second book: CANNABIS BUSINESS - 32 WAYS TO MAKE MONEY - The Secret To GROW, OPEN and RUN a Marijuana Dispensary LEGALIZATION AMERICAN STATES WHERE CANNABIS REMAINS ILLEGAL: THE RED TRIDENT COFFEE SHOP /DISPENSARIES /GROW SHOP /HEAD SHOP THE CORE OF DUTCH TOURISM DISPENSARY: US CANNABIS STORES COLLECTIVE: NON-PROFIT ORGANIZATIONS SOCIAL CLUBS IN SPAIN HOW TO START A MARIJUANA BUSINESS IN 5 STEPS HOW TO OBTAIN A LICENSE FOR A MEDICAL MARIJUANA DISPENSARY LICENSES IN THE REST OF THE WORLD Starting a Cannabis Social Club in 4 steps THE TRANSITION FROM THE MARKET TO THERAPEUTIC USE PACKAGING, ADVERTISING AND MARKETING A CANNABIS BUSINESS PLAN (TEAM) CAN CONTROL STARTUP COSTS COSTS FOR EMPLOYEES OF THE CANNABIS DISPENSARY COSTS FOR YOUR PROFESSIONAL CANNABIS CONSULTANTS COSTS TO PROMOTE YOUR CANNABIS BUSINESS THE JOBS IN THE CANNABIS SECTOR, AND HOW MUCH THEY ARE PAID 32 IDEAS TO MAKE MONEY IN THE CANNABIS INDUSTRY And much, much more!

As a recreational marijuana business lawyer in Washington State, Heather Wolf has witnessed first-hand the challenges, as well as what it takes to succeed as a new marijuana business. The book has been recently updated to include Washington State's new medical marijuana laws and new rules governing taxation of marijuana businesses. Wolf describes the basic rules governing marijuana legalization in Washington State and the major issues faced by marijuana businesses. Anyone looking to enter the legal marijuana market will want to read this book, which covers - licensing of marijuana businesses; financing of marijuana business; choosing a location for a marijuana business; taxation of marijuana businesses; banking and lending options; and federal law enforcement issues. Wolf draws from her experience advising marijuana businesses and provides tips for addressing each of these issues. Also included are hypothetical scenarios, which provide practical solutions to typical problems faced by marijuana businesses. New marijuana businesses face a complex regulatory environment both at the state and federal level. But, as Wolf demonstrates, with the right business planning, savvy marijuana entrepreneurs stand to profit from the end of marijuana prohibition.

Introduction to Criminology: Why Do They Do It? offers a contemporary and integrated discussion of key criminological theories to help students understand crime in the 21st century. Focusing on why offenders commit crimes, authors Pamela J. Schram and Stephen G. Tibbetts apply established theories to real-life examples to explain criminal behavior. Coverage of violent and property crimes is included throughout theory chapters so that students can clearly understand the application of theory to criminal behavior.

This practical, informative guide is packed with more than 700 full-color illustrations, photographs, and descriptive text that deal with more than 150 affordable marijuana growing setups. Additional Actions Taken to Control Marijuana Cultivation and Other Crimes on Federal Lands Report to the Chairman, Subcommittee on Public Lands and National Parks, Committee on Interior and Insular Affairs, House of Representatives Cannabis Business Startup A Step-By-Step Guide to Starting A Marijuana Business from Grow to Sale, with 32 WAYS TO MAKE MONEY

Cannabis cultivation has come a long way since the 1960's and 70's, yielding bigger, more potent bud today than that of yesteryear, but one thing we've learned in our quest for the best buds is that Mother Nature had it right all along. Whether growing outdoors or in a well-controlled grow room, feeding cannabis with soil is perhaps the best way to yield awesome results with minimum effort.

Contents: Intro.: Launching a New Approach to America's Drug Problem; (1) Strengthen Efforts to Prevent Drug Use; Drug-Related Challenges in Tribal Communities; (2) Early Intervention Opportunities in Health Care; Oper. Med. Cabinet NJ: Statewide Day of Disposal of Unused, Unwanted, and Expired Medicine; (3) Integrate Treatment for Substance Use Disorders into Health Care, and Expand Support for Recovery; Family Treatment for Addicted Mothers and Their Children; (4) Break the Cycle of Drug Use, Crime,

Delinquency, and Incarceration; Vets Treatment Courts; Reducing Recidivism through Testing and Sanctions; (5) Disrupt Domestic Drug Trafficking and Production; Fighting Meth Labs; (6) Plan Colombia; Internat. Interdiction. Charts and tables.

Should we legalize marijuana? If we legalize, what in particular should be legal? Just possessing marijuana and growing your own? Selling and advertising? If selling becomes legal, who gets to sell? Corporations? Co-ops? The government? What regulations should apply? How high should taxes be? Different forms of legalization could bring very different results. This second edition of *Marijuana Legalization: What Everyone Needs to Know*® discusses what is happening with marijuana policy, describing both the risks and the benefits of using marijuana, without taking sides in the legalization debate. The book details the potential gains and losses from legalization, explores the "middle ground" options between prohibition and commercialized production, and considers the likely impacts of legal marijuana on occasional users, daily users, patients, parents, and employers - and even on drug traffickers.

Mike Davis grew up in eastern Oregon riding dirt bikes, hunting, fishing, and attempting to avoid the Oregon State Police. It was not until after a stint in the US Marines, however, that Davis joined the very department he once tried to evade and realized his long-held dream of arresting bad guys. He soon learned that there were citizens who did not respect law enforcement—and some who wanted to kill anyone in uniform. As Davis chronicles his diverse law enforcement experiences from 1977 until 2004, he provides a glimpse into a career path that led him from recruit school to stints as a patrol officer, detective, and SWAT team member specially trained in explosive disposal and breaching, weapons of mass destruction, arson investigations, and narcotics infiltrations. While sharing raw details from risky encounters that led him from arresting intoxicated citizens to heading undercover drug operations to posing as a hit man, Davis provides eye-opening insight into how a naïve country boy transformed himself into a hardened hunter of men. *Hunting Men* shares the compelling story of an Oregon state police officer's twenty-eight-year journey through law enforcement, facing many challenges along the way to uphold his oath to protect and serve the citizens of his state.

When someone wants to start growing cannabis, they may be filled with questions: Is it legal? Can it be done inside or outside? It is hard to grow? In this book, you'll find a clear, step-by-step manual to the world of marijuana. Longtime licensed Oregon-based medical-grower Alicia Williamson explains the entire process--from choosing seeds or clones to proper curing and storage of harvest. You'll also find: Information on the legality of growing Tips on growing indoors, outdoors, and in containers Troubleshooting information for plants that just won't grow Recipes for edibles such as fruit rollups and chocolate lollies Growing cannabis can be challenging, yet rewarding. From the beginner just starting out to the experienced gardener wanting to improve quality and productivity, this is the complete guide to everything marijuana.

Colorado. Washington. Oregon. Colorado. Since 2012 nine states and DC have legalized cannabis, with more states to follow. Already a \$9.7 billion dollar industry creating hundreds of thousands of new jobs, legal cannabis is not only one of the fastest growing industries, but it is changing the dynamics of American society. Through interviews and fieldwork, Peter M. Birkeland shines a sociological lens on the relevant issues of legal cannabis and investigates the most pressing issues. Who are the cannabis industry participants? What are the costs in running a marijuana business and how much money is generated? Who are the users of cannabis in this newly legal market? What are the challenges in creating a regulatory framework? What has happened to crime, teenage use, and the black market? Birkeland's book provides a documentary-like account of the emerging cannabis industry in Colorado, the first jurisdiction in the world to legalize cannabis cultivation, manufacturing, and retail sales. Birkeland worked with cannabis business owners, interviewed regulators, policy-makers (including Governor Hickenlooper), industry participants, and opponents to legalization. He attended tradeshows, symposiums, meet-ups, penetrated the black market, and visited communities that have embraced cannabis sales. Through his firsthand experience, interviews and research, Birkeland traces the evolution of the cannabis industry from strictly illegal to legal, and he documents the challenges operators, regulators, and consumers face in the quest to carry out sales of a federally illegal product. Is cannabis legalization a short-lived social experiment, or is it ushering a new era of herbal medicine and recreational use that will transform society? The author uncovers the realities of the newly legal cannabis industry in Colorado, a litmus test for other states considering legalizing cannabis.

This e-Book will inform you about the history and breaking news of Cannabis (marijuana and hemp), compiled by the author. Topics include ancient Chinese healthcare with MA (hemp), discovery of marijuana found in an ancient Euro-Asia tomb, marijuana pollen found in Egyptian pharaoh's tombs and marijuana mentioned in the Bible. This publication is divided into 2 sections: Marijuana and Hemp. In the Marijuana Section, Bruce Meland and Fred Gardner, editor of OShaughnessy's News Service, write an article about Charlotte's Web, the miracle marijuana plant that is helping children with epilepsy. After great client success with Charlotte's Web in Colorado, Stanley Brother's, Realm of Caring Foundation, established another client program in California and then to many other states. Sabrina Fendrick, Director of Women's Out Reach, and member of NORML, National Organization for the Reform of Marijuana, writes an article about The Prohibition Industrial Complex. Articles in the hemp section include hemp farming and hemp manufacturing in Canada and China. Canada and China are marketing their hemp products to the United States and worldwide. Ben Aalvik of Pure Happiness Clothing, writes an article about "The Dangers of Synthetic And Treated Fabrics" Other articles include information about EnviroTextiles, the largest distributor of hemp fabrics, clothing and textiles worldwide. In other articles include the use of hemp fibers in making better batteries hemp CBD oils in helping brain injuries and cancer. Information contained herein should give the reader a better understanding of cannabis and its use in societies worldwide. Updated information will be available on our website: [www.marijuanaingardenofeden.com](http://www.marijuanaingardenofeden.com)

Hearing held by the Subcommittee on Crime. Witnesses include: Ronald E. Brooks, Chair, Drug Policy Committee, California Narcotic Officers' Assoc.; James E. Copple, Pres.

and CEO, Community Anti-Drug Coalitions of Harvard Medical School; Janet D. Lapey, M.D., Exec. Dir., Concerned Citizens for Drug Prevention, Inc.; Gen. Barry R. McCaffrey, Dir., Office of Nat. Drug Control Policy, The White House; Roger Pilon, Ph.D., J.D., Senior Fellow and Dir., Center for Constitutional Studies, Cato Institute; and Richard M. Romley, Maricopa County Attorney, Maricopa County, AZ.

A beginner's guide to growing weed at home, featuring straightforward advice for designing indoor and outdoor cannabis gardens, choosing seed varieties, buying equipment, planting, pot harvesting, storage, stash security, troubleshooting, and more. This beginner's guide to growing cannabis at home features straightforward advice for designing both indoor and outdoor marijuana gardens, from choosing and obtaining the most potent and prolific seed varieties to buying the right equipment and setting up your grow room. Steering clear of unnecessary scientific and technical jargon, Growing Medical Marijuana offers step-by-step instructions, 125 helpful photographs, and detailed illustrations to help you plant, harvest, and store your crop, whether you're a novice pot gardener or an experienced grower who wants to go legit. Outlining the ins and outs of marijuana cultivation in the states in which it's legal, this guide also presents easy-to-master approaches to fertilizing, pruning, controlling pests, maximizing flower production, cloning, producing your own seeds, and more. And once your stash is trimmed, cured, and ready to enjoy, nearly thirty recipes—along with dosage instructions—provide a delicious alternative to smoking your healing herb.

A definitive guide to medical marijuana cultivation and consumption & explains all the essential techniques to grow cannabis. 2,000+ beautiful color images illustrate this book. Medical cannabis history, cannabinoid measurement & medical varieties provide a background for medical patients & caregivers. The Medicinal Concentrates & Cooking with Medicinal Cannabis chapters feature different methods to concentrate & consume cannabis. Each stage of plant growth is detailed and graphically explained -- seed, seedling, vegetative growth, clones & mother plants & flowering. Harvest, drying & curing information aims to preserve cannabinoids. Garden room & greenhouse design, construction, maintenance & care. Each aspect of cannabis cultivation is examined in detail with a focus on organic practices, preserving the sanctuary, meters, air, light, lamps & electricity, soil, containers, water, nutrients, additives, container culture & hydroponics, diseases, pests & breeding.

Interested in Starting a Medical Marijuana Business? How to Write a Business Plan for the Cannabis Industry? Whether you're looking to start a GROW HOUSE or DISTRIBUTION NETWORK, an online CBD STORE or DISPENSARY... this book MARIJUANA BUSINESS 2021 - The Legal Cannabis Industry in The U.S. And Globally - Objective Market-Driven Coverage of Global Cannabis Industry Trends and Opportunities by ELIA FRIEDENTHAL will help you get started. If you want to get a cannabis LICENSE or CAPITAL to fund a cannabis business, then you need a business plan. But not just any plan will do. You need an amazing business plan to stand out in the cannabis industry. Medical marijuana is legal in 33 STATES PLUS WASHINGTON, D.C., while adult-use cannabis (sometimes called "recreational marijuana") is legal in 10 states plus D.C. An additional 15 states have decriminalized cannabis, reducing possession under certain amounts to a civil charge rather than a criminal one. The rash of legalizations began with California's passage of medicinal cannabis measure Proposition 215 in 1996 and culminated in Colorado and Washington's legalization of recreational cannabis in 2012. Since then, more states have followed suit. In just 20 years, what was previously a black-market product has become the cash crop of a new industry. However, as the cannabis industry RISES TO PROMINENCE - multiple estimates place anticipated growth eclipsing the \$20 billion mark by the early 2020s. In this book you will find: Legal Cannabis Around the World: A Patchy Reality Legal Marijuana: The Legislation Coffee Shop, Smart Shop, Dispensaries How to Get into the Legal Marijuana Business How to become a light cannabis dealer Open a legal marijuana store How to buy wholesale hemp How to open a legal cannabis online shop PREPARE A BUSINESS PLAN YOU NEED CAPITAL TO START FIND A SUITABLE OFFICE FEES AND LICENSE FEES Light Hemp Shop in Franchising Licenses and Bureaucratic Procedures in the USA Packaging, advertising, and marketing The Dispensary for Marijuana in: Alaska Arizona Arkansas California Colorado Connecticut Delaware Florida Hawaii 86 Illinois Iowa Louisiana Maine Maryland Massachusetts Michigan Minnesota Montana Nevada New Hampshire New Jersey New Mexico New York North Dakota Ohio Oklahoma Oregon Rhode Island Tennessee Texas Utah Vermont Washington Wisconsin Opening A Dispensary The extraction of THC resin by the butane procedure How to open a Grow shop: procedure and legal precautions Opening A Dispensary in Illinois Cost Cannabis business (team) plan Safety plan for the distribution of cannabis or artisanal cultivation Financial ability to design, build and manage cannabis businesses Costs for cannabis employees Costs to promote your cannabis business How to Obtain A Commercial License for Cannabis In New Jersey Ideas for Working with Legal Cannabis How to Obtain A Medical Marijuana Card in The United States Growing Hemp in the USA Income from Cultivation and much more!!! Buy NOW this BOOK and start TODAY your MARIJUANA BUSINESS!!

Truly global in scope and with contributions from leading researchers around the world, The Handbook of Cannabis is the definitive resource on this fascinating drug. Combining scientific perspectives and clinical applications, it covers a vast array of topics, from why over the centuries cannabis has been used as a medicine, through the regulations facing those wishing to self-administer cannabis or provide cannabis-based medicines, to the chemical structure of its many constituents and the rapidly growing group of synthetic cannabinoids that are currently being used for 'legal highs'. With each chapter written by a group of one or more internationally recognised subject experts, it provides academics and researchers with authoritative scientific material on the main pharmacological actions and their effects, as well as their pharmacokinetics, metabolism, and forensic detection. In addition it also examines the complex morphology, cultivation, harvesting, and processing of cannabis and the ways in which the plant's chemical composition can be controlled. As well as offering a raft of scientific information there is extensive coverage of cannabinoid-based medicines. Helping readers to identify and evaluate their benefits,

chapters explore pharmacological actions and the effects that seem to underlie approved therapeutic uses, how they are currently used to treat certain disorders, and the ever-growing number of wide-ranging potential clinical applications. There is also coverage of both the legal and illegal sources of cannabis, including 'coffee shops' and 'cannabis dispensaries'. The complex issue of 'recreational cannabis' is also tackled. The sought-after and adverse psychological and non-psychological effects are described and discussions are included on how some adverse effects can be lessened by at least one constituent of cannabis, and that it might be possible to reduce the harm that cannabis does to some by changing current regulatory policies. The Handbook of Cannabis is a one-stop reference; essential reading for all clinicians, pharmacologists, psychologists, and psychiatrists interested in this drug, as well as those working in the field of public health.

Written by experienced clinicians for practicing physicians and other health care providers, this timely handbook presents today's available information on cannabis and its uses in all areas of patient care. *Medical Marijuana: A Clinical Handbook* summarizes what is currently known about the positive and negative health impacts of cannabis, detailed pharmacological profiles of both THC and CBD, considerations for each medical specialty, treatment approaches used by practicing clinicians, and insights into the history of cannabis and the current regulatory environment in the United States. This concise, easy-to-navigate guide is an invaluable resource for physicians and residents, nurse practitioners, pharmacists, and other clinicians who seek reliable clinical guidelines in this growing area of health care.

*Medical Tourism and Wellness: Hospitality Bridging Healthcare (H2H)* takes a systems approach to examining the growing field of medical tourism, one of the field's hottest niches, with billions of dollars spent each year. This important book fills the need for a modern management book that looks at medical tourism in depth from a medical and hospitality operational management perspective. Growing numbers of people are going abroad to find affordable quality medical care for both necessary and cosmetic medical services. When they require surgery or dental work, they combine it with a trip to the Taj Mahal, a photo safari on the African veldt, or a stay at a luxury hotel—or at a hospital that feels like one—all at bargain-basement prices. The book takes a comprehensive look at medical tourism, covering such topics as: The history of medical tourism Why patients/tourists decide to travel for medical care The role of professional facilitators of medical tourism Key countries and medical disciplines in medical tourism Transportation, food, entertainment, and hotel/hospitality services Hotel and spa designs for medical tourism Best practices in medical tourism Patient follow-up after medical discharge Future trends in medical tourism Careers in medical tourism With the inclusion of case studies, the book provides a comprehensive look into this growing trend and will be valuable to upper-level undergraduate and graduate students in health care administration and those pursuing MBAs in healthcare, medical students pursuing a management focus, and students in hospitality management. It will also be a must-have resource for professionals working in hotels and in health care.

On marijuana, there is no mutual federal-state policy; will this cause federalism to go up in smoke? More than one-half the 50 states have legalized the use of marijuana at least for medical purposes, and about a dozen of those states have gone further, legalizing it for recreational use. Either step would have been almost inconceivable just a couple decades ago. But marijuana remains an illegal "controlled substance" under a 1970 federal law, so those who sell or grow it could still face federal prosecution. How can state and federal laws be in such conflict? And could federal law put the new state laws in jeopardy at some point? This book, an edited volume with contributions by highly regarded legal scholars and policy analysts, is the first detailed examination of these and other questions surrounding a highly unusual conflict between state and federal policies and laws. *Marijuana Federalism* surveys the constitutional issues that come into play with this conflict, as well as the policy questions related to law enforcement at the federal versus state levels. It also describes specific areas—such as banking regulations—in which federal law has particularly far-reaching effects. Readers will gain a greater understanding of federalism in general, including how the division of authority between the federal and state governments operates in the context of policy and legal disputes between the two levels. This book also will help inform debates as other states consider whether to jump on the bandwagon of marijuana legalization.

Significant changes have taken place in the policy landscape surrounding cannabis legalization, production, and use. During the past 20 years, 25 states and the District of Columbia have legalized cannabis and/or cannabidiol (a component of cannabis) for medical conditions or retail sales at the state level and 4 states have legalized both the medical and recreational use of cannabis. These landmark changes in policy have impacted cannabis use patterns and perceived levels of risk. However, despite this changing landscape, evidence regarding the short- and long-term health effects of cannabis use remains elusive. While a myriad of studies have examined cannabis use in all its various forms, often these research conclusions are not appropriately synthesized, translated for, or communicated to policy makers, health care providers, state health officials, or other stakeholders who have been charged with influencing and enacting policies, procedures, and laws related to cannabis use. Unlike other controlled substances such as alcohol or tobacco, no accepted standards for safe use or appropriate dose are available to help guide individuals as they make choices regarding the issues of if, when, where, and how to use cannabis safely and, in regard to therapeutic uses, effectively. Shifting public sentiment, conflicting and impeded scientific research, and legislative battles have fueled the debate about what, if any, harms or benefits can be attributed to the use of cannabis or its derivatives, and this lack of aggregated knowledge has broad public health implications. *The Health Effects of Cannabis and Cannabinoids* provides a comprehensive review of scientific evidence related to the health effects and potential therapeutic benefits of cannabis. This report provides a research agenda—outlining gaps in current knowledge and opportunities for providing additional insight into these issues—that summarizes and prioritizes pressing research needs.

How the future of post-legalization marijuana farming can be sustainable, local, and artisanal. What will the marijuana industry look like as legalization spreads? Will corporations sweep in and create Big Marijuana, flooding the market with mass-produced weed? Or will marijuana agriculture stay true to its roots in family farming, and reflect a sustainable, local, and artisanal ethic? In *Craft Weed*, Ryan Stoa argues that the future of the marijuana industry should be powered by small farms—that its model should be more craft beer than Anheuser-Busch. To make his case for craft weed, Stoa interviews veteran and novice marijuana growers, politicians, activists, and investors. He provides a history of marijuana farming and its post-hippie resurgence in the United States. He reports on the amazing adaptability of the cannabis plant and its genetic gifts, the legalization movement, regulatory efforts, the tradeoffs of indoor versus outdoor farms, and the environmental impacts of marijuana agriculture. To protect and promote small farmers and their communities, Stoa proposes a Marijuana Appellation system, modeled after the wine industry, which would provide a certified designation of origin to local crops. A sustainable, local, and artisanal farming model is not an inevitable future for the marijuana industry, but *Craft Weed* makes clear that marijuana legalization has the potential to revitalize rural communities and the American

family farm. As the era of marijuana prohibition comes to an end, now is the time to think about what kind of marijuana industry and marijuana agriculture we want. Craft Weed will help us plan for a future that is almost here.
